The Things They Carried Tim O'Brien,2009-10-13 Look for O'Brien's new book, American Fantastica, on sale October 24th A classic work of American literature that has not stopped changing

minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

Horrified by the people who have come to cut down their forest homeland, Aani and other women from her village try to make them understand how important the trees are, and a single act of bravery

helps save the forest

Life Traces of the Georgia Coast Anthony J. Martin, 2013-01-14 Have you ever wondered what left behind those prints and tracks on the seashore, or what made those marks or dug those holes in the dunes? Life Traces of the Georgia Coast is an up-close look at these traces of life and the animals and plants that made them. It tells about the how the tracemakers lived and how they interacted with their environments. This is a book about ichnology (the study of such traces), a wonderful way to learn about the behavior of organisms, living and long extinct. Life Traces presents an overview of the traces left by modern animals and plants in this biologically rich region; shows how life traces relate to the environments, natural history, and behaviors of their tracemakers; and applies that knowledge toward a better understanding of the fossilized traces that ancient life left in the geologic record. Augmented by numerous illustrations of traces made by both ancient and modern organisms, the book shows how ancient trace fossils directly relate to modern traces and tracemakers, among them, insects, grasses, crabs, shorebirds, alligators, and sea turtles. The result is an aesthetically appealing and scientifically

accurate book that will serve as both a source book for scientists and for anyone interested in the natural history of the Georgia coast.

Plantation Life Tania Murray Li, Pujo Semedi, 2021-09-27 In *Plantation Life* Tania Murray Li and Pujo Semedi examine the structure and governance of Indonesia's contemporary oil palm plantations in Indonesia, which supply 50 percent of the world's palm oil. They attend to the exploitative nature of plantation life, wherein villagers' well-being is sacrificed in the name of economic development. While plantations are often plagued by ruined ecologies, injury among workers, and a devastating loss of livelihoods for former landholders, small-scale independent farmers produce palm oil more efficiently and with far less damage to life and land. Li and Semedi theorize “corporate occupation” to underscore how massive forms of capitalist production and control over the palm oil industry replicate colonial-style relations that undermine citizenship. In so doing, they question the assumption that corporations are necessary for rural development, contending that the dominance of plantations stems from a political system that privileges corporations.

To Life! Linda Weintraub,2012-09-01 This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

The Mangrove Tree Susan L. Roth,Cindy Trumbore,2018-08-23 For a long time, the people of Hargigo, a village in the tiny African country of Eritrea, were living without enough food for themselves and their animals. Then along came a scientist, Dr Gordon Sato, who helped to change their lives for the better. And it all started by planting some special mangrove trees. This fascinating story of environmental innovation is a celebration of creativity, hard work and the ability of one man to make a positive difference in the lives of many.

Refugee Alan Gratz,2017-07-25 The award-winning, #1 New York Times bestselling novel from Alan Gratz tells the timely--and timeless--story of three different kids seeking refuge. A New York Times bestseller! JOSEF is a Jewish boy living in 1930s Nazi Germany. With the threat of

concentration camps looming, he and his family board a ship bound for the other side of the world... ISABEL is a Cuban girl in 1994. With riots and unrest plaguing her country, she and her family set out on a raft, hoping to find safety in America... MAHMOUD is a Syrian boy in 2015. With his homeland torn apart by violence and destruction, he and his family begin a long trek toward Europe... All three kids go on harrowing journeys in search of refuge. All will face unimaginable dangers -- from drownings to bombings to betrayals. But there is always the hope of tomorrow. And although Josef, Isabel, and Mahmoud are separated by continents and decades, shocking connections will tie their stories together in the end. As powerful and poignant as it is action-packed and page-turning, this highly acclaimed novel has been on the New York Times bestseller list for more than four years and continues to change readers' lives with its meaningful takes on survival, courage, and the quest for home.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide”

Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

Fandom Culture and The Archers Cara Courage,Nicola Headlam,2022-05-18 Fandom Culture and The Archers looks beyond the popular success of the Archers to explore how the program, and the themes it discusses, are used in teaching, learning, research and professional settings, and how the Academic Archers fandom helps shape these real life impacts.

The Age of Em Robin Hanson,2016-05-13 Robots may one day rule the world, but what is a robot-ruled Earth like? Many think the first truly smart robots will be brain emulations or ems. Scan a human brain, then run a model with the same connections on a fast computer, and you have a robot brain, but recognizably human. Train an em to do some job and copy it a million times: an army of workers is at your disposal. When they can be made cheaply, within perhaps a century, ems will displace humans in most jobs. In this new economic era, the world economy may double in size every few weeks. Some say we can't know the future, especially following such a disruptive new technology, but Professor Robin Hanson sets out to prove them wrong. Applying decades of expertise in physics, computer science, and economics, he uses standard theories to paint a detailed picture of a world

dominated by ems. While human lives don't change greatly in the em era, em lives are as different from ours as our lives are from those of our farmer and forager ancestors. Ems make us question common assumptions of moral progress, because they reject many of the values we hold dear. Read about em mind speeds, body sizes, job training and career paths, energy use and cooling infrastructure, virtual reality, aging and retirement, death and immortality, security, wealth inequality, religion, teleportation, identity, cities, politics, law, war, status, friendship and love. This book shows you just how strange your descendants may be, though ems are no stranger than we would appear to our ancestors. To most ems, it seems good to be an em.

Under the Greenwood Tree Thomas Hardy, 1873

Montgomery Village ,2011 In the early 1960s, architect and visionary Clarence Kettler and his brothers, Milton and Charles, dreamed of building a unique new town modeled after a European planned community. This town would be family oriented and would emphasize recreation with open space and a sense of community. With careful planning, their vision, which included schools, places of

worship, a golf course, shopping areas, and recreational amenities, was realized--Montgomery Village. Over time, as the Village grew, farms were replaced by well-manicured residential areas and mature trees. Each community adheres to architectural standards and community covenants set by the developers to help maintain continuity and home values. Today, more than 40,000 people call Montgomery Village home. Montgomery Village takes pride in its active volunteers, parks, and recreational facilities and its commitment to maintain and enhance the natural environment and coexist with our many species of wildlife. Though no longer a new town, the Village continues to serve as an admirable and viable model for communities everywhere. The year 2011 marks Montgomery Village's 45th anniversary.

The Mushroom at the End of the World Anna Lowenhaupt Tsing,2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern

hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Unbroken (Movie Tie-in Edition) Laura Hillenbrand, 2018-08-21 #1 NEW YORK TIMES

BESTSELLER • The incredible true story of survival and salvation that is the basis for two major motion pictures: 2014's *Unbroken* and the upcoming *Unbroken: Path to Redemption*. On a May afternoon in 1943, an Army Air Forces bomber crashed into the Pacific Ocean and disappeared, leaving only a spray of debris and a slick of oil, gasoline, and blood. Then, on the ocean surface, a face appeared. It was that of a young lieutenant, the plane's bombardier, who was struggling to a life raft and pulling himself aboard. So began one of the most extraordinary odysseys of the Second World War. The lieutenant's name was Louis Zamperini. In boyhood, he'd been a cunning and incorrigible delinquent, breaking into houses, brawling, and fleeing his home to ride the rails. As a teenager, he had channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics and within sight of the four-minute mile. But when war had come, the athlete had become an airman, embarking on a journey that led to his doomed flight, a tiny raft, and a drift into the unknown. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, a foundering raft,

thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. In her long-awaited new book, Laura Hillenbrand writes with the same rich and vivid narrative voice she displayed in *Seabiscuit*. Telling an unforgettable story of a man's journey into extremity, *Unbroken* is a testament to the resilience of the human mind, body, and spirit. Praise for *Unbroken* "Extraordinarily moving . . . a powerfully drawn survival epic."—The Wall Street Journal "[A] one-in-a-billion story . . . designed to wrench from self-respecting critics all the blurby adjectives we normally try to avoid: It is amazing, unforgettable, gripping, harrowing, chilling, and inspiring."—New York "Staggering . . . mesmerizing . . . Hillenbrand's writing is so ferociously cinematic, the events she describes so incredible, you don't dare take your eyes off the page."—People "A meticulous, soaring and beautifully written account of an extraordinary life."—The Washington Post "Ambitious and powerful . . . a startling narrative and an inspirational book."—The New York Times Book Review

“Marvelous . . . Unbroken is wonderful twice over, for the tale it tells and for the way it’s told. . . . It manages maximum velocity with no loss of subtlety.”—Newsweek “Moving and, yes, inspirational . . . [Laura] Hillenbrand’s unforgettable book . . . deserve[s] pride of place alongside the best works of literature that chart the complications and the hard-won triumphs of so-called ordinary Americans and their extraordinary time.”—Maureen Corrigan, Fresh Air “Hillenbrand . . . tells [this] story with cool elegance but at a thrilling sprinter’s pace.”—Time “Unbroken is too much book to hope for: a hellride of a story in the grip of the one writer who can handle it.”—Christopher McDougall, author of *Born to Run*

Road to Mekong Piya Bahadur, 2019-10-17 For fifty-six days, four women left their ‘regular lives’, homes, families and comfort, to ride their motorbikes through scenic landscapes, inhospitable terrain and diverse regions. In this process, they covered 17,000 kilometres through six countries. What inspired them to follow this dangerous, and at times maddening, adventure trail? In *Road to Mekong*, Piya Bahadur recounts her once-in-a-lifetime journey through Southeast Asia. With little prior

experience in expeditions of this nature, the group successfully planned and executed an exhilarating trip from Hyderabad, through the east Indian coast and the northeast of India, weaving through Myanmar, Thailand, Laos and Vietnam, along the river Mekong, and finally to Cambodia. By the time they returned, the lives of these audacious women had changed forever. Piya takes the reader along on her travels through places rarely visited by the itinerant Indian and shares the new world that unfolds as she journeys from being a working mother constrained by her own inhibitions to a confident traveller accepting of whatever adventures life has to offer. ‘The inspirational and adventurous journey of these four women across nations and through thousands of kilometres makes for an exhilarating read. The book should lead many more people to explore India and it’s scenic places’ MEENAKSHI SHARMA, Director General for Tourism, Incredible India

Gone to Ground Emily Brownell, 2020-03-10 Finalist, 2021 ASA Bethwell A. Ogot Book Prize **Gone to Ground** is an investigation into the material and political forces that transformed the cityscape of Dar es Salaam, Tanzania in the 1970s and early 1980s. It is both the story of a particular city and the

history of a global moment of massive urban transformation from the perspective of those at the center of this shift. Built around an archive of newspapers, oral history interviews, planning documents, and a broad compendium of development reports, Emily Brownell writes about how urbanites navigated the state's anti-urban planning policies along with the city's fracturing infrastructures and profound shortages of staple goods to shape Dar's environment. They did so most frequently by "going to ground" in the urban periphery, orienting their lives to the city's outskirts where they could plant small farms, find building materials, produce charcoal, and escape the state's policing of urban space. Taking seriously as historical subject the daily hurdles of families to find housing, food, transportation, and space in the city, these quotidian concerns are drawn into conversation with broader national and transnational anxieties about the oil crisis, resource shortages, infrastructure, and African socialism. In bringing these concerns together into the same frame, *Gone to Ground* considers how the material and political anxieties of the era were made manifest in debates about building materials, imported technologies, urban agriculture, energy use, and who defines living and laboring in the city.

Touching Spirit Bear Ben Mikaelson, 2010-04-20 In his Nautilus Award-winning classic *Touching Spirit Bear*, author Ben Mikaelson delivers a powerful coming-of-age story of a boy who must overcome the effects that violence has had on his life. After severely injuring Peter Driscall in an empty parking lot, mischief-maker Cole Matthews is in major trouble. But instead of jail time, Cole is given another option: attend Circle Justice, an alternative program that sends juvenile offenders to a remote Alaskan Island to focus on changing their ways. Desperate to avoid prison, Cole fakes humility and agrees to go. While there, Cole is mauled by a mysterious white bear and left for dead. Thoughts of his abusive parents, helpless Peter, and his own anger cause him to examine his actions and seek redemption—from the spirit bear that attacked him, from his victims, and, most importantly, from himself. Ben Mikaelson paints a vivid picture of a juvenile offender, examining the roots of his anger without absolving him of responsibility for his actions, and questioning a society in which angry people make victims of their peers and communities. *Touching Spirit Bear* is a poignant testimonial to the power of a pain that can destroy, or lead to healing. A strong choice for independent reading, sharing

in the classroom, homeschooling, and book groups.
