Chinese Village Life Today Gonalo Santos,2021-08-22 China has undergone a remarkable process of urbanization, but a significant portion of its citizens still live in rural villages. To gain better access to jobs, health care, and consumer goods, villagers often travel or migrate to cities, and that cyclical transit and engagement with new technoscientific and medical practices is transforming village life. In this thoughtful ethnography, Gonalo Santos paints a richly detailed portrait of one rural township in Guangdong Province, north of the industrialized Pearl River Delta region. Unlike previous studies of rural-urban relations and migration in China, *Chinese Village Life Today*—based on Santos’s more than twenty years of field research—starts from a rural community’s point of view rather than the perspective of major urban centers. Santos considers the intimate choices of village families in the face of larger forces of modernization, showing how these negotiations shape the configuration of daily village life, from marriage, childbirth, and childcare to personal hygiene and public sanitation. Santos also outlines the advantages of a rural existence, including a degree of autonomy over family planning and community life that is rare in urban China. Filled with vivid anecdotes and keen observations, this book presents a fresh perspective on China’s urban-rural divide and a grounded theoretical approach to rural transformation.

The Origins of the Arab-Iranian Conflict Chelsi Mueller,2020-08-13 The interwar period marked a transition from a Gulf society characterized by symbiosis and interdependency to a sub-region characterized by national divisions, sectarian suspicions, rivalries and political tension. In this study, Chelsi Mueller tells the story of a formative period in the Gulf, examining the triangular relationship between Iran, Britain and the Gulf Arab shaykhdoms. By doing so Mueller reveals how the revival of Iranian national ambitions in the Gulf had a significant effect on the dense web of Arab-Iranian relations during the interwar period. Shedding new light on our current understanding of the present-day Arab-Iranian conflict, this study, which pays particular attention to Bahrain and the Trucial states (United Arab Emirates), fills a significant gap in the literature on the history of Arab-Iranian relations in the Gulf and Iran's Persian Gulf policy during the Reza Shah period.

Virtual War and Magical Death Neil L. Whitehead,Sverker Finnstr m,2013-03-28 *Virtual War and Magical Death* is a provocative examination of the relations between anthropology and contemporary global war. Several arguments unite the collected essays, which are based on ethnographic research in varied locations, including Guatemala, Uganda, and Tanzania, as well as Afghanistan, Pakistan, Iraq, and the United States. Foremost is the contention that modern high-tech warfare—as it is practiced and represented by the military, the media, and civilians—is analogous to rituals of magic and sorcery. Technologies of virtual warfare, such as high-altitude bombing, remote drone attacks, night-vision goggles, and even music videos and computer games that simulate battle, reproduce the imaginative worlds and subjective experiences of witchcraft, magic, and assault sorcery long studied by cultural anthropologists. Another significant focus of the collection is the U.S. military's exploitation of ethnographic research, particularly through its controversial Human Terrain Systems (HTS) Program, which embeds anthropologists as cultural experts in military units. Several pieces address the ethical dilemmas that HTS and other counterinsurgency projects pose for anthropologists. Other essays reveal the relatively small scale of those programs in relation to the military's broader use of, and ambitions for, social scientific data. Contributors. Christian Origins Richard Horsley,2010-03-01 Dealing with a time when Christians were moving towards separation from the movement's Jewish origins, this inaugural volume of *A People's History of Christianity* tells the people's story by gathering together evidence from the New Testament

texts, archaeology, and other contemporary sources. Of particular interest to the distinguished group of scholar-contributors are the often overlooked aspects of the earliest Christian consciousness: How, for example, did they manage to negotiate allegiances to two social groups? How did they deal with crucial issues of wealth and poverty? What about the participation of slaves and women in these communities? How did living in the shadow of the Roman Empire color their religious experience and economic values?

Yucatán's Maya Peasantry and the Origins of the Caste War Terry Rugeley, 1996 Social history that challenges earlier views of the Caste War. Examines the development of the social, political, and economic structure of the Yucatán during the first half of the 19th century and profiles four towns involved in the Caste War. Emphasizes the eroding status of Maya elites as a key to the revolt--*Handbook of Latin American Studies*, v. 58.

The Origins of the Inquisition in Fifteenth Century Spain Ben Zion Netanyahu, 2001 The Spanish Inquisition remains a fearful symbol of state terror. Its principal target was the conversos, descendants of Spanish Jews who had been forced to convert to Christianity some three generations earlier. Since thousands of them confessed to charges of practicing Judaism in secret, historians have long understood the Inquisition as an attempt to suppress the Jews of Spain. In this magisterial reexamination of the origins of the Inquisition, Netanyahu argues for a different view: that the conversos were in fact almost all genuine Christians who were persecuted for political ends. The Inquisition's attacks not only on the conversos' religious beliefs but also on their impure blood gave birth to an anti-Semitism based on race that would have terrible consequences for centuries to come. This book has become essential reading and an indispensable reference book for both the interested layman and the scholar of history and religion.

Global Filipinos Deirdre McKay, 2012 Contract workers from the Philippines make up one of the world's largest movements of temporary labor migrants. Deirdre McKay follows Filipino migrants from one rural community to work sites overseas and then home again. Focusing on the experiences of individuals, McKay interrogates current approaches to globalization, multi-sited research, subjectivity, and the village itself. She shows that rather than weakening village ties, temporary labor migration gives the village a new global dimension created in and through the relationships, imaginations, and faith of its members in its potential as a site for a better future.

The Village Effect Susan Pinker, 2014-08-26 In her surprising, entertaining, and persuasive new book, award-winning author and psychologist Susan Pinker shows how face-to-face contact is crucial for learning, happiness, resilience, and longevity. From birth to death, human beings are hardwired to connect to other human beings. Face-to-face contact matters: tight bonds of friendship and love heal us, help children learn, extend our lives, and make us happy. Looser in-person bonds matter, too, combining with our close relationships to form a personal "village" around us, one that exerts unique effects. Not just any social networks will do: we need the real, in-the-flesh encounters that tie human families, groups of friends, and

communities together. Marrying the findings of the new field of social neuroscience with gripping human stories, Susan Pinker explores the impact of face-to-face contact from cradle to grave, from city to Sardinian mountain village, from classroom to workplace, from love to marriage to divorce. Her results are enlightening and enlivening, and they challenge many of our assumptions. Most of us have left the literal village behind and don't want to give up our new technologies to go back there. But, as Pinker writes so compellingly, we need close social bonds and uninterrupted face-time with our friends and families in order to thrive—even to survive. Creating our own “village effect” makes us happier. It can also save our lives. Praise for *The Village Effect* “The benefits of the digital age have been oversold. Or to put it another way: there is plenty of life left in face-to-face, human interaction. That is the message emerging from this entertaining book by Susan Pinker, a Canadian psychologist. Citing a wealth of research and reinforced with her own arguments, Pinker suggests we should make an effort—at work and in our private lives—to promote greater levels of personal intimacy.”—Financial Times “Drawing on scores of psychological and sociological studies, [Pinker] suggests that living as our ancestors did, steeped in face-to-face contact and physical proximity, is the key to health, while loneliness is ‘less an exalted existential state than a public health risk.’ That her point is fairly obvious doesn’t diminish its importance; smart readers will take the book out to a park to enjoy in the company of others.”—The Boston Globe “A hopeful, warm guide to living more intimately in an disconnected era.”—Publishers Weekly “A terrific book . . . Pinker makes a hardheaded case for a softhearted virtue. Read this book. Then talk about it—in person!—with a friend.”—Daniel H. Pink, New York Times bestselling author of *Drive* and *To Sell Is Human* “What do Sardinian men, Trader Joe’s employees, and nuns have in common? Real social networks—though not the kind you’ll find on Facebook or Twitter. Susan Pinker’s delightful book shows why face-to-face interaction at home, school, and work makes us healthier, smarter, and more successful.”—Charles Duhigg, New York Times bestselling author of *The Power of Habit: Why We Do What We Do in Life and Business* “Provocative and engaging . . . Pinker is a great storyteller and a thoughtful scholar. This is an important book, one that will shape how we think about the increasingly virtual world we all live in.”—Paul Bloom, author of *Just Babies: The Origins of Good and Evil* From the Hardcover edition.

Science, Society and Power James Fairhead, Melissa Leach, 2003-10-16 In this book, James Fairhead and Melissa Leach bring science to the heart of debates about globalisation, exploring transformations in global science and contrasting effects in Guinea, one of the world's poorest countries, and Trinidad, a more prosperous, industrialised and urbanised island. The book focuses on environment, forestry and conservation sciences that are central to these countries and involve resources that many depend upon for their livelihoods. It examines the relationships between policies, bureaucracies and particular types of scientific enquiry and explores how ordinary people, the media and educational practices engage with this. In particular it shows how science becomes part of struggles over power, resources and legitimacy. The authors take a unique ethnographic perspective, linking approaches in anthropology, development and science studies. They address critically prominent debates in each, and explore opportunities for new forms of participation, public engagement and transformation in the social relations of science.

Key Concepts in Community Studies Tony Blackshaw, 2010 This book is both insightful and engaging, enriched with diverse and up-to-date readings. Tony Blackshaw lays bare debates surrounding the uses and abuses of key concepts of community studies and breathes new life into community as theory and community studies as method. - Peter Bramham, Leeds Metropolitan University I would highly recommend this book to any student who is studying communities and groups in society. The book and chapters are structured in a way that students will find it easy to move from one theme to another; to dip into relevant chapters when needed; to gain a good understanding of concepts and how and why they are applied to individuals and communities. The book encompasses both breadth and depth of key concepts and issues. This book will be compulsory reading on our Community Studies degree. - Lesley Groom, University of Bolton This book defines the current identity of community studies, provides a critical but reliable introduction to its key concepts and is an engaging guide to the key social research methods used by community researchers and practitioners. Concise but clear, it caters for the needs of those interested in community studies by offering cross-referenced, accessible overviews of the key theoretical issues that have the most influence on community studies today. It incorporates all of the important frames of reference including those which are: theoretical research focused practice and policy oriented political concerned about the place of community in everyday life. The extensive bibliographies and up-to-date guides to further reading reinforce the aim of the book to provide an invaluable learning resource. Interdisciplinary in approach and inventive in its range of applications this book will be of value to students studying sociology, social policy, politics and community development.

Napoleon's Cursed War Ronald Fraser, 2023-01-10 A magisterial history of "Napoleon's Vietnam", by the highly acclaimed historian of Spain In this definitive account of the Peninsular War (1808-14), Napoleon's six-year war against Spain, Ronald Fraser examines what led to the emperor's devastating defeat against the popular opposition—the guerrillas—and their British and Portuguese allies. As well as relating the histories of the great political and military figures of the war, Fraser brings to life the anonymous masses—the artisans, peasants and women who fought, suffered and died—and restores their role in this barbaric war to its rightful place while overturning the view that this was a straightforward military campaign. This vivid, meticulously researched book offers a distinct and profound vision of "Napoleon's Vietnam" and shows the reality of the disasters of war: the suffering, discontents and social upheaval that accompanied the fighting.
