*Unrequited Infatuations* Stevie Van Zandt, 2021-09-28 Uncover never-before-told stories in this epic tale of self-discovery by a Rock n Roll disciple and member of the E Street Band. What story begins in a bedroom in suburban New Jersey in the early '60s, unfolds on some of the country's largest stages, and then ranges across the globe, demonstrating over and over again how Rock and Roll has the power to change the world for the better? This story. The first true heartbeat of *Unrequited Infatuations* is the moment when Stevie Van Zandt trades in his devotion to the Baptist religion for an obsession with Rock and Roll. Groups like the Beatles and the Rolling Stones created new ideas of community, creative risk, and principled rebellion. They changed him forever. While still a teenager, he met Bruce Springsteen, a like-minded outcast/true believer who became one of his most important friends and bandmates. As Miami Steve, Van Zandt anchored the E Street Band as they conquered the Rock and Roll world. And then, in the early '80s, Van Zandt stepped away from E Street to embark on his own odyssey. He refashioned himself as Little Steven, a political songwriter and performer, fell in love with Maureen Santoro who greatly expanded his artistic palette, and visited the world's hot spots as an artist/journalist to not just better understand them, but to help change them. Most famously, he masterminded the recording of *Sun City*, an anti-apartheid anthem that sped the demise of South Africa's institutionalized racism and helped get Nelson Mandela out of prison. By the '90s, Van Zandt had lived at least two lives—one as a mainstream rocker, one as a hardcore activist. It was time for a third. David Chase invited Van Zandt to be a part of his new television show, the *Sopranos*—as Silvio Dante, he was the unconditionally loyal consigliere who sat at the right hand of Tony Soprano (a relationship that oddly mirrored his real-life relationship with Bruce Springsteen). Underlying all of Van Zandt's various incarnations was a devotion to preserving the centrality of the arts, especially the endangered species of Rock. In the twenty-first century, Van Zandt founded a groundbreaking radio show (Little Steven's Underground Garage), created the first two 24/7 branded music channels on SiriusXM (Underground Garage and Outlaw Country), started a fiercely independent record label (Wicked Cool), and developed a curriculum to teach students of all ages through the medium of music history. He also rejoined the E Street Band for what has now been a twenty-year victory lap. *Unrequited Infatuations* chronicles the twists and turns of Stevie Van Zandt's always surprising life. It is more than just the testimony of a globe-trotting nomad, more than the story of a groundbreaking activist, more than the odyssey of a spiritual seeker, and more than a master class in rock and roll (not to mention a dozen other crafts). It's the best book of its kind because it's the only book of its kind. \*\*Instant International Bestseller, New York Times Bestseller, USA Today Bestseller, Wall Street Journal Bestseller, Los Angeles Times Bestseller, Publishers Weekly Bestseller\*\*

**Music Habits - The Mental Game of Electronic Music Production** Jason Timothy, 2020-07-18 Music Production can be an elusive art form for many, and the challenges that face someone who is new to this can easily create overwhelm and lead to complete paralysis. The goal of this book, is to cover music production from many different angles in a way that will change your thinking on the subject and build your confidence. Music making is a very mental and psychological game, and more often than not, all the technical stuff can hold you back from achieving your goals if you don't have the right creative habits in place first. With all the information available with a simple Google search, I wanted to really get to the heart of things that aren't being discussed nearly enough. I want to clear out all the garbage you may have been told and replace it with the essentials you can put to immediate use. Many people new to music may dive into forums and mindlessly watch video tutorials attempting to gather more and more information until they think they have enough to get going (hint: you never feel like you know enough). That would be like reading a whole encyclopedia and then being asked to recall only the important things that will get you from point A to point B. Even worse, much of the information you get will contradict the last thing you read. It's like finding a needle in a haystack only to be told it's the wrong needle. There is a much better approach. It's an approach that doesn't require you to know a lot to get started. You only need to know enough to get to the next step in your process. There is truly nothing stopping you from becoming a music producer. The ones who are successful now are the ones who started from nothing and chipped away at it until they found a way to express their unique voice. There are no gatekeepers making decisions on who is worthy and who isn't. The determining factor is you, your habits and your confidence in yourself. This book

can be read from start to finish, or as a choose your own adventure, going directly to what you think can help you most right now. Don't get caught up thinking you have to devour everything before getting started. That isn't necessary, and isn't the point of the book.The core concepts in the book will come up time & time again which should help you retain them & be able to recall them when the need arrives. By exploring these concepts from several angles you should gain a broad view of their many uses.My hope is that this book is used as a toolbox. You simply find the right tool that moves you forward and get back to work. So few people, who have more than enough information in their heads, ever start. Of those who do start, even fewer finish what they started and are satisfied with the results. I want you to be in that small group of finishers.Let's get started.

**Group Recommender Systems** Alexander Felfernig,Ludovico Boratto,Martin Stettinger,Marko Tkalčič,2023-11-27 This book discusses different aspects of group recommender systems, which are systems that help to identify recommendations for groups instead of single users. In this context, the authors present different related techniques and applications. The book includes in-depth summaries of group recommendation algorithms, related industrial applications, different aspects of preference construction and explanations, user interface aspects of group recommender systems, and related psychological aspects that play a crucial role in group decision scenarios.

Yet recent technological developments are increasingly changing how we use and consume music. This book collects together the most recent studies of music consumption, and new developments in music technology. With a specific focus on the social nature of music, the book breaks new ground in bringing together discussions of both the social and technological aspects of music use. Chapters cover topics such as the use of the iPod, music technologies which encourage social interaction in public places, and music sharing on the internet.
