Building a Dedicated GSM GPS Module Tracking System for Fleet Management Franjieh El Khoury,Antoine Zgheib,2018-01-31 This book shows how to build a INFelecPHY GPS Unit (IEP-GPS) tracking system for fleet management that is based on 3G and GPRS modules. This model should provide reliability since it deals with several protocols: 1) HTTP and HTTPS to navigate, download and upload in real time the information to a web server, 2) FFTP and FTTPS to handle in a non-real time the files to the web application, and 3) SMTP and POP3 to send and receive email directly from the unit in case of any alert. Similar to a mobile device, but without screen for display, it is multifunctional because it links to a GPRS module, a camera, a speaker, headphone, a keypad and screen.

Ambient Assisted Living and Daily Activities Leandro Pecchia,Liming Chen,Chris Nugent,Jose Bravo,2014-11-10 This book constitutes the refereed proceedings of the 6th International Workshop on Ambient Assisted Living, IWAAL 2014, held in Belfast, UK, in December 2014. The 42 full papers presented with 12 papers of the workshop WAGER 2014 and 10 papers of a special session HTA were carefully reviewed and selected from numerous submissions. The focus of the papers is on following topics: ADL detection, recognition, classification; behavioural changes, coaching and education; AAL design and technical evaluation; expression, mood and speech recognition; health monitoring, risk prediction and assessment; localization; and user preferences, usability, AAL acceptance and adoption.

Data Protection in the Internet Dário Moura Vicente,Sofia de Vasconcelos Casimiro,2019-12-01 This book identifies and explains the different national approaches to data protection – the legal regulation of the collection, storage, transmission and use of information concerning identified or identifiable individuals – and determines the extent to which they could be harmonised in the foreseeable future. In recent years, data protection has become a major concern in many countries, as well as at supranational and international levels. In fact, the emergence of computing technologies that allow lower-cost processing of increasing amounts of information, associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans-border flow of information have enabled the large-scale collection and processing of personal data, not only for scientific or commercial uses, but also for political uses. A growing number of governmental and private organizations now possess and use data processing in order to determine, predict and influence individual behavior in all fields of human activity. This inevitably entails new risks, from the perspective of individual privacy, but also other fundamental rights, such as the right not to be discriminated against, fair competition between commercial enterprises and the proper functioning of democratic institutions. These phenomena have not been ignored from a legal point of view: at the national, supranational and international levels, an increasing number of regulatory instruments – including the European Union’s General Data Protection Regulation applicable as of 25 May 2018 – have been adopted with the purpose of preventing personal data misuse. Nevertheless, distinct national approaches still prevail in this domain, notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal data from the more fragmented and liberal attitude of American courts and legislators in this respect. In a globalized world, in which personal data can instantly circulate and be used simultaneously in communications networks that are ubiquitous by nature, these different national and regional approaches are a major source of legal conflict.

The Rise of Security and Why We Always Want More Mike Croll,2023-04-15 Security is now a \$500 billion global business, and it’s growing fast. It’s developed from the night watchman keeping a sleepy eye out, to the guard patrolling the shopping mall, to smart surveillance systems monitoring everything, everywhere, all the time. This book explains: --how demand for security is generated by an alignment of interests between big business, insurance companies, the media, lawyers, politicians, and human nature; --how our response to terrorism is driven by fear rather than risk; --and how security has become a key feature of our lives at home, on-line, at work, when shopping, and when flying. This is a panoramic view from an industry insider who describes why the more security we have, the more we want. And crucial question emerges, as security incorporates new technology including facial recognition, drones, artificial intelligence, digital analytics, location and heart rate monitoring: are we creating Big Brother or Big Mother? It’s probably the most interesting book on security that you’ll ever read.

Slovak Wine Guide Vladimír Hronský,2017-06 How can you get to know the history, culture and gastronomy of a country in just a few seconds? Taste its wine! Whether you're a restaurant owner, wine trader or tourist looking for a liquid souvenir from Slovakia, this book will help you to find your way around the current wines on offer on the Slovak market. Vladimír Hronský, the author, is a famous enologist, sommelier and Slovak wine popularizer, and his guide introduces readers to 50 wineries and their 365 most interesting Slovak wines. The introductory chapters describe the characteristics of the viticultural regions of Slovakia and the traditional and new grapevine varieties cultivated here. Hronský also explains the labelling of Slovak wines and current trends in wine making. He goes on to offer experts and non-experts alike a selection of the most interesting wines on the market based on various requirements (wines made of traditional varieties and popular new clones, innovative wines, classical Tokaj wines, sparkling wines, and others). Lovers of local cheeses will also appreciate this first English edition which includes a chapter on the best Slovak wine and cheese combinations.

The Illusion Of Presidential Government Hugh Heclo,Lester M Salamon,2019-07-11 Presidential government is an illusion. It is an image that misleads presidents no less than the media and the American public. Thus begins this realistic look at the presidency, in which nine leading presidential scholars examine how and why we are under the illusion of presidential government and ask such questions as: What is the president's actual role? What has happened to his traditional tools of executive leadership? How is the office of the president organized to deal with domestic, economic, and national security affairs? Is federal regulation an area of potential power for the president? And, if presidential government is indeed a myth, what can be done to help the presidency play a more effective part in constitutional government? Each chapter probes a different facet of the image of presidential government by looking at the major operations of the modern presidency—from struggles with Congress for control of administrative detail to problems of managing the economy and national security. The book closes with the final report of the National Academy of Public Administration's Panel on Presidential Management. Not surprisingly, the authors do not always agree; nevertheless, they are united in the view that the managerial role of the president must be seen as a whole-and without illusions.

Understanding Augmented Reality Alan B. Craig,2013-04-26 Understanding Augmented Reality addresses the elements that are required to create augmented reality experiences. The technology that supports augmented reality will come and go, evolve and change. The underlying principles for creating exciting, useful augmented reality experiences are timeless. Augmented reality designed from a purely technological perspective will lead to an AR experience that is novel and fun for one-time consumption - but is no more than a toy. Imagine a filmmaking book that discussed cameras and special effects software, but ignored cinematography and storytelling! In order to create compelling augmented reality experiences that stand the test of time and cause the participant in the AR experience to focus on the content of the experience - rather than the technology - one must consider how to maximally exploit the affordances of the medium. Understanding Augmented Reality addresses core conceptual issues regarding the medium of augmented reality as well as the technology required to support compelling augmented reality. By addressing AR as a medium at the conceptual level in addition to the technological level, the reader will learn to conceive of AR applications that are not limited by today’s technology. At the same time, ample examples are provided that show what is possible with current technology. Explore the different techniques, technologies and approaches used in developing AR applications Learn from the author's deep experience in virtual reality and augmented reality applications to succeed right off the bat, and avoid many of the traps that catch new developers and users of augmented

reality experiences Some AR examples can be experienced from within the book using downloadable software

The Re-invention of the European Radical Right Andrej Zaslove,2011 Political commentators were surprised at the re-emergence of right-wing parties in Western Europe in the 1970s and early 1980s given that right-wing extremists had largely disappeared from successful electoral politics after the end of the Second World War. Since their resurgence, such parties have become permanent fixtures across Europe. The Re-invention of the European Radical Right examines what accounts for their initial rise and their continued success as well as how they should be classified: are they fascist, neo-fascist, radical, extreme, or populist? Combining an in-depth case study of the Italian Northern League with a comparative focus on other parties, Andrej Zaslove employs a socio-economic, institutional, and ideological analysis to argue that the new wave of right-wing parties in Western Europe converged into a radical right populist party family in the 1990s. He examines the transformation of the Northern League from its regionalist roots while focusing on the party's nationalism, authoritarianism, support for a market economy, opposition to globalization, and scepticism regarding Italian integration into the European Union. He also scrutinizes the Northern League's participation in political power between 2001 and 2006 and its influence on federalism, immigration, economic policy, and European integration. A thorough and thought-provoking work, The Re-invention of the European Radical Right offers remarkable insight into the ongoing effects of radical right populism on politics and public policy in Europe.

European Data Protection: Coming of Age Serge Gutwirth, Ronald Leenes, Paul de Hert, Yves Poullet,2012-11-22 On 25 January 2012, the European Commission presented its long awaited new "Data protection package". With this proposal for a drastic revision of the data protection framework in Europe, it is fair to say that we are witnessing a rebirth of European data protection, and perhaps, its passage from an impulsive youth to a more mature state. Technology advances rapidly and mobile devices are significantly changing the landscape. Increasingly, we carry powerful, connected, devices, whose location and activities can be monitored by various stakeholders. Very powerful social network sites emerged in the first half of last decade, processing personal data of many millions of users. Updating the regulatory network was imminent and the presentation of the new package will initiate a period of intense debate in which the proposals will be thoroughly commented upon and criticized, and numerous amendments will undoubtedly be proposed. This volume brings together some 19 chapters offering conceptual analyses, highlighting issues, proposing solutions, and discussing practices regarding privacy and data protection. In the first part of the book, conceptual analyses of concepts such as privacy and anonymity are provided. The second section focuses on the contrasted positions of digital natives and ageing users in the information society. The third section provides four chapters on privacy by design, including discussions on roadmapping and concrete techniques. The fourth section is devoted to surveillance and profiling, with illustrations from the domain of smart metering, self-surveillance and the benefits and risks of profiling. The book concludes with case studies pertaining to communicating privacy in organisations, the fate of a data protection supervisor in one of the EU member states and data protection in social network sites and online media. Best Practices in School Neuropsychology Daniel C. Miller,2009-10-15 A comprehensive guide to the practice of school neuropsychology It is an exciting time to specialize in school neuropsychology, with countless theoretically and psychometrically sound assessment instruments available for practitioners to use in their evaluations of children with special needs. Yet the field faces the challenges of establishing evidence-based linkages between assessment and interventions and of broadening its approaches to culturally diverse populations. Edited by a leading expert in school neuropsychology, Best Practices in School Neuropsychology: Guidelines for Effective Practice, Assessment, and Evidence-Based Intervention addresses these challenges and their solutions and provides learning specialists and school psychologists with clear coverage and vital information on this burgeoning area of practice within school psychology. This insightful reference features comprehensive discussion of: Current school neuropsychological assessment and intervention models Best practices in assessing cognitive processes An overview of what neuroscience offers to the practice of school neuropsychology How school neuropsychology fits within a Response to Intervention (RTI) model The rationale for the importance of school psychologists' collaboration with parents, educators, and other professionals to maximize services to children Clinical applications of school neuropsychology with special populations, academic disabilities, processing deficits, and medical disorders Unique challenges in working with culturally diverse populations Featuring contributions from internationally renowned school psychologists, neuropsychologists, clinicians, and academics, Best Practices in School Neuropsychology is the first book of its kind to present best practices and evidence-informed guidelines for the assessment and intervention of children with learning disabilities, as well as other issues practitioners working with children encounter in school settings. DANIEL C. MILLER, PhD, is a Professor and Chair of the Department of Psychology and Philosophy at Texas Woman's University in Denton, Texas. He is a former director of the School Psychology Graduate Training Programs and past president of the National Association of School Psychologists. He is the author of Essentials of School Neuropsychological Assessment. Dr. Miller is also the President and founder of KIDS, Inc., a company that specializes in early childhood education and screening products.

Drug Trafficking, Organized Crime, and Violence in the Americas Today Bruce M. Bagley, Jonathan D. Rosen,2017-07-25 An extensive overview of the drug trade in the Americas and its impact on politics, economics, and society throughout the region. . . . Highly recommended.--Choice A first-rate update on the state of the long-fought hemispheric 'war on drugs.' It is particularly timely, as the perception that the war is lost and needs to be changed has never been stronger in Latin and North America.--Paul Gootenberg, author of Andean Cocaine: The Making of a Global Drug A must-read volume for policy makers, concerned citizens, and students alike in the current search for new approaches to forty-year-old policies largely considered to have failed.--David Scott Palmer, coauthor of Power, Institutions, and Leadership in War and Peace A very useful primer for anyone trying to keep up with the ever-evolving relationship between drug enforcement and drug trafficking.--Peter Andreas, author of Smuggler Nation: How Illicit Trade Made America In 1971, Richard Nixon declared a war on drugs. Despite foreign policy efforts and attempts to combat supply lines, the United States has been for decades, and remains today, the largest single consumer market for illicit drugs on the planet. This volume argues that the war on drugs has been ineffective at best and, at worst, has been highly detrimental to many countries. Leading experts in the fields of public health, political science, and national security analyze how U.S. policies have affected the internal dynamics of Mexico, Colombia, Bolivia, Peru, Brazil, Argentina, Central America, and the Caribbean islands. Together, they present a comprehensive overview of the major trends in drug trafficking and organized crime in the early twenty-first century. In addition, the editors and contributors identify emerging issues and propose several policy options to address them. This accessible and expansive volume provides a framework for understanding the limits and liabilities in the U.S.-championed war on drugs throughout the Americas.

Managing Nano-Bio-Info-Cogno Innovations William Sims Bainbridge, 2006-06-14 With the convergence of Nanotechnology, Biotechnology, Information technology and Cognitive science (NBIC) fields promising to change our competitive, operational, and employment landscape in fundamental ways, we find ourselves on the brink of a new technological and science-driven business revolution. The already emerging reality of convergence is to be found in genomics, robotics, bio-information and artificial intelligence applications, such as: • Self-assembled, self-cleaning and self-healing manufactured materials and textiles, and much stronger, lighter and more customizable structural materials, • Miniature sensors allowing unobtrusive real-time health monitoring and dramatically improved diagnosis; with greatly enhanced real time information to vehicles and drivers on the way, • New generations of supercomputers and efficient energy generators based on biological processes, • Greatly enhanced drug delivery from unprecedented control over fundamental structural properties and biocompatibility of materials. These advances are here already, or in development. And Japan, other Asian nations and Western European countries are investing heavily and moving aggressively to develop and apply NBIC technologies. Notwithstanding the passage of the 21st Century Nanotechnology Research and Development Act, significant further funding and action by both government and private industry will be critical to maintaining US scientific and industry leadership.

Video Games as Culture Daniel Muriel, Garry Crawford, 2018-03-14 Video games are becoming culturally dominant. But what does their popularity say about our contemporary society? This book explores video game culture, but in doing so, utilizes video games as a lens through which to understand contemporary social life. Video games are becoming an increasingly central part of our cultural lives, impacting on various aspects of everyday life such as our consumption, communities, and identity formation. Drawing on new and original empirical data – including interviews with gamers, as well as key representatives from the video game industry, media, education, and cultural sector – *Video Games as Culture* not only considers contemporary video game culture, but also explores how video games provide important insights into the modern nature of digital and participatory culture, patterns of consumption and identity formation, late modernity, and contemporary political rationalities. This book will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, interested in fields such as Video Games, Sociology, and Media and Cultural Studies. It will also be useful for those interested in the wider role of culture, technology, and consumption in the transformation of society, identities, and communities.
