Street Matters Fernando Lara, Ana Paula Koury, 2022-05-03 *Street Matters* links urban policy and planning with street protests in Brazil. It begins with the 2013 demonstrations that ostensibly began over public transportation fare increases but quickly grew to address larger questions of inequality. This inequality is physically manifested across Brazil, most visibly in its sprawling urban favelas. The authors propose an understanding of the social and spatial dynamics at play that is based on property, labor, and security. They stitch together the history of plans for urban space with the popular protests that Brazilians organized to fight for property and land. They embed the history of civil society within the history of urban planning and its institutionalization to show how urban and regional planning played a key role in the management of the social conflicts surrounding land ownership. If urban and regional planning at times benefited the expansion of civil rights, it also often worked on behalf of class exploitation, deepening spatial inequalities and conflicts embedded in different city spaces.

iVIVA! Deborah Barndt, 2011-11-20 This compelling collection of inspiring case studies from community arts projects in five countries will inform and inspire students, artists, and activists. iVIVA! is the product of a five-year transnational research project that integrates place, politics, passion, and praxis. Framed by postcolonial theories of decolonization, the pedagogy of the oppressed articulated by Brazilian educator Paulo Freire, and the burgeoning field of community arts, this collection not only analyzes the dynamic integration of the critical and the creative in social justice movements, it embodies such a praxis. Learn from Central America: Kuna children's art workshops, a community television station in Nicaragua, a cultural marketplace in Guadalajara, Mexico, community mural production in Chiapas; and from North America: arts education in Los Angeles inner-city schools, theater probing ancestral memory, community plays with over one hundred participants, and training programs for young artists in Canada. These practices offer critical hope for movements hungry for new ways of knowing and expressing histories, identities, and aspirations, as well as mobilizing communities for social transformation. Beautifully illustrated with more than one hundred color photographs, the book also includes a DVD with videos that bring the projects to life.

Applications of Photovoltaics Rebecca Hill, 1989-01-01 Photovoltaics (PV) play a vital role in an energy-conscious society where the demand for cheap, convenient, and environmentally benign sources of energy is certain to increase. The range of applications is immense, encompassing many spheres of activity, from modern consumer electronics to the supply of power. Bringing together experts in their fields, *Applications of Photovoltaics* provides a stimulating account of the technical and economic aspects of the many areas that PV technology has been or is soon to be implemented.

The book includes chapters on terrestrial applications of PV; PV for development, placing PV in the context of an energy policy for developing countries; PV for developing countries, which discusses the techno-economics of PV applications; PV systems for professional applications, which include hybrid systems; and low-power applications of PV for consumer, leisure, and other systems. Applications of Photovoltaics is appealing to all engineers, from energy advisors and policy makers, with an interest in or need for off-grid electrical supplies, from microwatts to megawatts. Its level of presentation makes it accessible to those without an engineering or economics background.

Indomitus Vivat Robert W. Brady, Jr, 2012-08-16 I was brought to Fovea, a land where magic is real and justice is found at the point of a sword, with a mission from the god, War: Live a successful life. With a sword and a horse, I rose from a traveling vagabond to the Duke of Thera, built a city, raised a mercenary army and met the love of my life. King Glennen of Eldador named me his Heir - I thought I did a pretty good job. War disagrees - He wants more, and he means to have it. Meanwhile, I've made a lot of enemies along the way. The Bounty Hunter's guild wants my head, the Uman-Chi, my title, and the daughters of other nations? Well, let's not get into that! The stakes are higher now that I have to cover for a depressed King, a fledgling economy and my commitments to my allies, and the secrets tied to a city forgotten for 1,100 years.

Christus Vivit Pope Francis,2019-04-04 To young Christians of the world, Pope Francis has a message for you: Christ is alive, and he wants you to be alive! In his fourth apostolic exhortation, *Christus Vivit*, Pope Francis encapsulates the work of the 2018 synod of bishops on Young People, The Faith, and Vocational Discernment. Pope Francis has always had a special relationship with young people, and in his fatherly love for you he shows that: You can relate to young people in Scripture who made a difference You identify with the Christ who is always young You face difficult issues in the world today You yearn for the truth of the Gospel You are capable of amazing things when you respond to the Gospel You learn and grow with help from the faithful of all generations You need bold and creative youth ministry You can discover who God made you to be You are urged to pray for discernment *Christus Vivit* is written for and to young people, but Pope Francis also wrote it for the entire Church, because, as he says, reflecting on our young people inspires us all. May the Holy Spirit urge you on as you run this race. The Church needs your momentum, your intuitions, your faith. We need them! And when you arrive where we have not yet reached, have the patience to wait for us.

Urban Health Sandro Galea,Catherine K. Ettman,David Vlahov,2019-04-04 An essential collection that advances our understanding of how cities influence our health More than half the world's population lives in cities -- a figure that will grow to two-thirds by 2030. As global

populations rapidly consolidate around urban centers, the scientific understanding of what this means for human health faces a new and greater urgency. Urban Health connects urban exposures - the experiences, choices, and behaviors shaped by living in a city -- to their impact on population health. By using the ubiquitous aspects of the urban experience as a lens to study these exposures across borders and demographics, it offers a new, scalable framework for understanding health and disease. Its applications to public health, epidemiology, and social science are virtually unlimited. Enriched with case studies that consider the state of health in cities all over the world, this book does more than capture the state of a nascent field; it holds a critical mirror to itself, considering the next decade and arming a new generation with the tools for research and practice.

Agricultural Impacts of Climate Change [Volume 1] Rohitashw Kumar,Vijay P Singh,Deepak Jhajharia,Rasoul Mirabbasi,2019-11-25 Conservation agriculture is a sustainable production model that not only optimizes crop yields, but also reaps economic and environmental benefits as well. The adoption of successful conservation agriculture methods has resulted in energy savings, higher organic matter content and biotic activity in soil, increased crop-water availability and thus resilience to drought, improved recharge of aquifers, less erosion, and reduced impacts from the weather associated with climate change in general. Agricultural Impacts of Climate Change examines several important aspects of crop production, such as climate change, soil management, farm machinery, and different methods for sustainable conservation agriculture. It presents spatial distribution of a daily, monthly and annual precipitation concentration indices, Diffuse Reflectance Fourier Transform Infrared Spectroscopy for analyzing the organic matter in soil, and adaptation strategies for climate-related plant disease scenarios. It also discusses solar energy-based

greenhouse modeling, precision farming using remote sensing and GIS, and various types of machinery used for conservation agriculture. Features: Examines the effects of climate change on agriculture and the related strategies for mitigation through practical, real-world examples Explores innovative on-farm technology options to increase system efficiency resulting in improved water usage Presents examples of precision farming using climate-resilient technologies

Healthy Urbanism Helen Pineo, 2022-05-11 The globally distributed health impacts of environmental degradation and widening inequalities require a fundamental shift in understandings of healthy urbanism. This book redefines the meaning and form of healthy urban environments, urging planners and design professionals to consider how their work impacts population health and wellbeing at multiple spatial and temporal scales. The concepts of equity, inclusion and sustainability are central to this framing, reversing the traditional focus on individuals, their genes and 'lifestyle choices' to one of structural factors that affect health. Integrating theory and concepts from social epidemiology, sustainable development and systems thinking with practical case studies, this book will be of value for students and practitioners.
