Cooked Michael Pollan,2013-04-23 THE INSPIRATION FOR THE NEW NETFLIX SERIES 'It's not often that a life-changing book falls into one's lap ... Yet Michael Pollan's Cooked is one of them.' SundayTelegraph 'This is a love song to old, slow kitchen skills at their delicious best' Kathryn Huges, GUARDIAN BOOKS OF THE YEAR The New York Times Top Five Bestseller - Michael Pollan's uniquely enjoyable quest to understand the transformative magic of cooking Michael Pollan's Cooked takes us back to basics and first principles: cooking with fire, with water, with air and with earth. Meeting cooks from all over the world, who share their wisdom and stories, Pollan shows how cooking is at the heart of our culture and that when it gets down to it, it also fundamentally shapes our lives. Filled with fascinating facts and curious, mouthwatering tales from cast of eccentrics, Cooked explores the deepest mysteries of how and why we cook.

101 Reasons why I'm a Vegetarian Pamela Rice,2005 An expanded, updated version of Pam Rice's widely read pamphlet. Without sentimentality or preaching, [Rice] provides a clear and thoughtful understanding of one of the most important choices a person can make.--John Robbins, author of Diet for a New America and The Food Revolution.

The Three Little Tamales Eric A. Kimmel,2009 In this variation of The Three Little Pigs set in the Southwest, three little tamales escape from a restaurant before they can be eaten, and set up homes in the prairie, cornfield, and desert.

A Pattern Language Christopher Alexander,2018-09-20 You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely. The three books are The Timeless Way of Building, The Oregon Experiment, and this book, A Pattern Language. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain languages, which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. Patterns, the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

The New Farm Brent Preston,2018-03-27 This “must-read” memoir of human-scale agriculture offers an insider’s view of today’s food system by a leading voice in sustainable farming (Daniel Boulud). After years of working at the ends of the earth in human rights and development, Brent Preston and his wife were die-hard city dwellers. But when their second child arrived, the shine came off urban living. In 2003 they bought a hundred acres and a rundown farmhouse, determined to build a farm that would sustain their family, nourish their community, heal their environment—and turn a profit. The New Farm is Preston’s memoir of a decade of toil and perseverance. Farming is a complex and precarious business, and they made plenty of mistakes along the way. But as they learned how to grow food, and to succeed at the business of farming, they also found that a small, sustainable, organic farm could be an engine for change, a path to a more just and sustainable food system. Today, The New Farm supplies top restaurants, supports community food banks, hosts events with leading chefs, and grows extraordinary produce. Told with humor and heart, The New Farm is a joy, a passionate book by an important new voice.

The Coding Manual for Qualitative Researchers Johnny Saldana,2012-10-04 The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: -describes how coding initiates qualitative data analysis -demonstrates the writing of analytic memos -discusses available analytic software -suggests how best to use The Coding Manual for Qualitative Researchers for particular studies. In total, 32 coding methods are profiled that can be applied to a range of research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences.

Skye Falling Mia McKenzie,2021-06-22 GOOD MORNING AMERICA BUZZ PICK • A woman who’s used to going solo discovers that there’s one relationship she can’t run away from in this “hilarious, electric” (The New York Times) novel, a probing examination of the complexities of family, queerness, race, and community LAMBDA LITERARY AWARD WINNER• ONE OF THE BEST BOOKS OF THE YEAR: The Boston Globe, Autostraddle, Shondaland • “A new kind of love story, the best kind.”—Ashley C. Ford, New York Times bestselling author of Somebody’s Daughter When she was twenty-six and broke, Skye didn’t think twice before selling her eggs and happily pocketing the cash. Now approaching forty, Skye still moves through life entirely—and unrepentantly—on her own terms, living out of a suitcase and avoiding all manner of serious relationships. Maybe her junior high classmates weren’t wrong when they voted her “Most Likely to Be Single” instead of “Most Ride-or-Die Homie,” but at least she’s always been free to do as she pleases. Then a twelve-year-old girl tracks Skye down during one of her brief visits to her hometown of Philadelphia and informs Skye that she’s “her egg.” Skye’s life is thrown into sharp relief and she decides that it might be time to actually try to have a meaningful relationship with another human being. Spoiler alert: It’s not easy. Things get even more complicated when Skye realizes that the woman she tried and failed to pick up the other day is the girl’s aunt, and now it’s awkward.

All the while, her brother is trying to get in touch, her mother is being bewilderingly kind, and the West Philly pool halls and hoagie shops of her youth have been replaced by hipster cafés. With its endearingly prickly narrator and a cast of characters willing to both challenge her and catch her when she falls, this novel is a clever, moving portrait of a woman and the relationships she thought she could live without.

Building a StoryBrand Donald Miller, 2017-10-10 More than half-a-million business leaders have discovered the power of the StoryBrand Framework, created by New York Times best-selling author and marketing expert Donald Miller. And they are making millions. If you use the wrong words to talk about your product, nobody will buy it. Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers. The StoryBrand process is a proven solution to the struggle business leaders face when talking about their companies. Without a clear, distinct message, customers will not understand what you can do for them and are unwilling to engage, causing you to lose potential sales, opportunities for customer engagement, and much more. In *Building a StoryBrand*, Donald Miller teaches marketers and business owners to use the seven universal elements of powerful stories to dramatically improve how they connect with customers and grow their businesses. His proven process has helped thousands of companies engage with their existing customers, giving them the ultimate competitive advantage. Building a StoryBrand does this by teaching you: The seven universal story points all humans respond to; The real reason customers make purchases; How to simplify a brand message so people understand it; and How to create the most effective messaging for websites, brochures, and social media. Whether you are the marketing director of a multibillion-dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, *Building a StoryBrand* will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers.

How We Think John Dewey, 1910 Our schools are troubled with a multiplication of studies, each in turn having its own multiplication of materials and principles. Our teachers find their tasks made heavier in that they have come to deal with pupils individually and not merely in mass. Unless these steps in advance are to end in distraction, some clew of unity, some principle that makes for simplification, must be found. This book represents the conviction that the needed steadying and centralizing factor is found in adopting as the end of endeavor that attitude of mind, that habit of thought, which we call scientific. This scientific attitude of mind might, conceivably, be quite irrelevant to teaching children and youth. But this book also represents the conviction that such is not the case; that the native and unspoiled attitude of childhood, marked by ardent curiosity, fertile imagination, and love of experimental inquiry, is near, very near, to the attitude of the scientific mind. If these pages assist any to appreciate this kinship and to consider seriously how its recognition in educational practice would make for individual happiness and the reduction of social waste, the book will amply have served its purpose. It is hardly necessary to enumerate the authors to whom I am indebted. My fundamental indebtedness is to my wife, by whom the ideas of this book were inspired, and through whose work in connection with the Laboratory School, existing in Chicago between 1896 and 1903, the ideas attained such concreteness as comes from embodiment and testing in practice. It is a pleasure, also, to acknowledge indebtedness to the intelligence and sympathy of those who coöperated as teachers and supervisors in the conduct of that school, and especially to Mrs. Ella Flagg Young, then a colleague in the University, and now Superintendent of the Schools of Chicago.
