*Hotel Magnifique* Emily J. Taylor,2022-04-05 AN INSTANT NEW YORK TIMES BESTSELLER "Hotel Magnifique opened the door to a sumptuous and glittering world of magic and mysteries and left me enchanted. Perfect for fans of Caraval and The Night Circus." -Erin A. Craig, New York Times bestselling author of House of Salt and Sorrows and Small Favors Decadent and darkly enchanting, this lavish YA fantasy debut follows seventeen-year-old Jani as she uncovers the deeply disturbing

secrets of the legendary Hotel Magnifique. All her life, Jani has dreamed of Elsewhere. Just barely scraping by with her job at a tannery, she's resigned to a dreary life in the port town of Durc, caring for her younger sister Zosa. That is, until the Hotel Magnifique comes to town. The hotel is legendary not only for its whimsical enchantments, but also for its ability to travel—appearing in a different destination every morning. While Jani and Zosa can't afford the exorbitant costs of a guest's stay, they can interview to join the staff, and are soon whisked away on the greatest adventure of their lives. But once inside, Jani quickly discovers their contracts are unbreakable and that beneath the marvelous glamour, the hotel is hiding dangerous secrets. With the vexingly handsome doorman Bel as her only ally, Jani embarks on a mission to unravel the mystery of the magic at the heart of the hotel and free Zosa—and the other staff—from the cruelty of the ruthless maître d'hôtel. To succeed, she'll have to risk everything she loves, but failure would mean a fate far worse than never returning home.

**Making the Modern World** Vaclav Smil,2013-12-16 How much further should the affluent world push its material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in *Making the Modern World: Materials and Dematerialization*. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. *Making the Modern World: Materials and Dematerialization* considers the principal materials used throughout history, from wood and stone, through to metals, alloys, plastics and silicon, describing their extraction and production as well as their dominant applications. The evolving productivities of material extraction, processing, synthesis, finishing and distribution, and the energy costs and environmental impact of rising material consumption are examined in detail. The book concludes with an outlook for the future, discussing the prospects for dematerialization and potential constraints on materials. This interdisciplinary text provides useful perspectives for readers with backgrounds including resource economics, environmental studies, energy analysis, mineral geology, industrial organization, manufacturing and material science.
