Russia's Changing Economic and Political Regimes Andrey Makarychev, Andre Mommen, 2013-07-18 The book reveals the interconnection between social, cultural and political protest movements and social and economic changes in a post-communist country like Russia still dominated by bureaucratic rulers and oligarchs controlling all basic industries and mining activities. Those interests are also dominating Russia's foreign policy and explain why Russia did not succeed in becoming an integral part of Europe. The latter is, at least, wished by many Russian citizens.

Cyber-Physical Systems and Control II Dmitry G. Arseniev, Nabil Aouf, 2023-01-20 The book contains selected research papers presented at the 2nd International Conference on Cyber-Physical Systems and Control (CPS&C'2021) which was held from 29 June to 2 July 2021 in St. Petersburg, Russia. The CPS&C'2021 Conference continues the series of international conferences that began in 2019 when the first International Conference on Cyber-Physical Systems and Control (CPS&C'2019) took place. Cyber-physical systems (CPSs) considered a modern and rapidly emerging generation of systems with integrated wide computational, information processing, and physical capabilities that can interact with humans through many new modalities and application areas of implementation. The book covers the latest advances, developments and achievements in new theories, algorithms, models, and applications of prospective problems associated with CPSs with an emphasis on control theory and related areas. The multidisciplinary fundamental scientific and engineering principles that underpin the integration of cyber and physical elements across all application areas are discussed in the book chapters. The materials of the book may be of interest to scientists and engineers working in the field of cyber-physical systems, systems analysis, control systems, computer technologies, and similar fields.

Eastern European Music Industries and Policies after the Fall of Communism Patryk Galuszka, 2021-04-06 During the last thirty years Eastern Europe has been a place of radical political, economic, and social transformation, and these changes have affected the cultural industries of its countries. This volume consists of twelve chapters by leading international researchers. Stories are documented of various organisations that once dominated the 'communist music industries' – such as state-owned record companies, music festivals, and collecting societies. The strategies employed by artists and industries to join international music markets after the fall of communism are explained and evaluated. Political and economic transformations that coincided with the advent of digitalisation and the Internet intensified the changes. All these issues posed challenges both to record labels and artists who, after adjusting to the rules of the free-market economy, were faced with the falling record sales of records caused by the advent of new communication technologies. This book examines how these processes have all affected the music scene, industries, and markets in various Eastern European countries.

New Media in New Europe-Asia Jeremy Morris, Natalya Rulyova, Vlad Strukov, 2016-04-14 This volume offers an in-depth investigation of the role of new media in the political, social and cultural life in the region of Europe-Asia. By focusing on new media, which is understood primarily as internet-enabled networked social practice, the book puts forward a political and cultural redefinition of the region which is determined by the recognition of the diversity of new media uses in the countries included in the study. This book focuses on the period prior to the advent of 'world internet revolutions', and it registers the region at its pivotal moment—at the time of its entry into the post-broadcast era. Does the Internet aid democratisation or is it conditioned by socio-political norms? Has the Internet changed politics or has it had to fit existing political structures? Has the use of digital technologies revolutionized election campaigns? How is hyperlinked society different from society prior to the advent of the web? How do ordinary people actually use the Internet. These and other pressing questions – crucial to understanding the post-socialist world – are investigated in the current volume. This book was published as a special issue of Europe-Asia Studies.

Ruling by Other Means Grzegorz Ekiert, Elizabeth J. Perry, Xiaojun Yan, 2020-07-30 What do states gain by sending citizens into the streets? Ruling by Other Means investigates this question through the lens of State-Mobilized Movements (SMMs), an umbrella concept that includes a range of (often covertly organized) collective actions intended to advance state interests. The SMMs research agenda departs significantly from that of classic social movement and contentious politics theory, focused on threats to the state from seemingly autonomous societal actors. Existing theories assume that the goal of popular protest is to voice societal grievances, represent oppressed groups, and challenge state authorities and other powerholders. The chapters in this volume show, however, that states themselves organize citizens (sometimes surreptitiously and even transnationally) to act collectively to advance state goals. Drawn from different historical periods and diverse

geographical regions, these case studies expand and improve our understanding of social movements, civil society and state-society relations under authoritarian regimes.

Social Informatics Steffen Staab, Olessia Koltsova, Dmitry I. Ignatov, 2018-09-19 The two-volume set LNCS 11185 + 11186 constitutes the proceedings of the 10th International Conference on Social Informatics, SocInfo 2018, held in Saint-Petersburg, Russia, in September 2018. The 30 full and 32 short papers presented in these proceedings were carefully reviewed and selected from 110 submissions. They deal with the applications of methods of the social sciences in the study of socio-technical systems, and computer science methods to analyze complex social processes, as well as those that make use of social concepts in the design of information systems.

Social Informatics Emma Spiro, Yong-Yeol Ahn, 2016-11-01 The two-volume set LNCS 10046 and 10047 constitutes the proceedings of the 8th International Conference on Social Informatics, SocInfo 2016, held in Bellevue, WA, USA, in November 2016. The 36 full papers and 39 poster papers presented in this volume were carefully reviewed and selected from 120 submissions. The Donbas Conflict in Ukraine Daria Platonova, 2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.
