XV International Scientific Conference “INTERAGROMASH 2022” Alexey

Beskopylny,Mark Shamtsyan,Viktor Artiukh,2023-02-04 The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022, Rostov-on-Don, Russia. The agro-industrial complex is the most extensive and vital industry. It is rapidly developing by introducing the latest technologies and automating various processes necessary for the functioning of this area. The book is dedicated to engineering technologies of precision farming and agricultural robotics. It includes studies on natural resources variability, sustainable soil management, Agro Big Data, Internet of Things, software and mobile apps for precision agriculture, smart weather for precision agriculture, simulations models and decision support systems, expert systems, DGPS, soil physical and chemical characteristic sensors, machinery, etc. Different types of agricultural robots are presented in the book: autonomous fruit picking robots, farming bots that can seed and water plants, test the soil and remove weeds, completely autonomous robot for ecological and economical ultra-high precision spraying and weeding, harvesting robots with the special vision systems that can “see” fruits and understand whether they're ripe and ready to pick, and others. Also, the book covers advances in agricultural biotechnology in such areas of research as crop production improvement practices, genetic modification, as well as microbial biotechnology in agriculture, etc. The book is aimed for scientists, researchers, and graduate students. It is also useful for representatives of regional authorities, as it gives an idea of existing high-tech solutions for agriculture. The book is written and edited by international researchers, academics, and experts in the corresponding research areas.

Creating Breakthrough Products: Revealing the Secrets that Drive Global Innovation (Special Second Edition) Craig M. Vogel,Jonathan Cagan,

The Rise of Chinese as a Global Language Jeffrey Gil,2021-06-07 This book investigates the macroacquisition of Chinese – its large-scale acquisition and adoption for various purposes by individuals, governments and organisations – and the implications of this process for the future of English as a global language. The author contextualises the macroacquisition of Chinese within the global ecology of languages, then analyses the factors responsible for the macroacquisition of Chinese, showing, in contrast to most academic and popular commentary, that a character-based writing system will not stop Chinese from becoming a global language. He then articulates three possible future scenarios: English remaining a dominant global language, English and Chinese both being global languages, and Chinese becoming a global language instead of English. The book concludes by outlining directions for further research on the acquisition and use of Chinese around the world. It will be of interest to students and scholars with an interest in English as a global language, Chinese as a second/foreign language, language education policy, and applied linguistics more generally.

Educating for Global Competence Veronica Boix Mansilla,Anthony W. Jackson,2022-11-28 Preparing students to participate fully in today's and

tomorrow's world demands that we nurture their global competence, and this book shows teachers how to do just that. In a world rife with rapid change, environmental vulnerabilities, and racial inequities, this second edition of Educating for Global Competence poses an urgent question: What matters most for students to understand about our complex and interconnected world so they can participate fully in its future? Veronica Boix Mansilla from and Anthony W. Jackson identify the key skills, values, and attitudes that K-12 students must cultivate to thrive in the 21st century. The book features a practical framework for global competence education. The framework's four dimensions focus on developing students' capacity to * Examine local, global, and intercultural issues. * Understand and appreciate the perspectives and worldviews of others. * Engage in open, appropriate, and effective interactions across cultures. * Take action toward collective well-being and sustainable development. This edition includes many new authentic examples of integrating global competence into curriculum, instruction, and assessment across subject areas. Through these examples, we see the practical ways educators can prepare young people to see the complexities of the world and to develop the skills needed to explore and solve problems on a global scale. Educating for Global Competence shows teachers, administrators, and policymakers how they can leverage their influence to make teaching for global competence a compelling endeavor that yields world-changing results.

Passport to World Band Radio, 2004 Edition Lawrence Magne, 2003-10 Explains how to tune in news and entertainment from countries around the world, rates various world band radios, and provides a detailed broadcasting schedule.

Global-National Networks in Education Policy Rino Wiseman Adhikary, Bob Lingard, Ian Hardy, 2021-10-07 Set against the backdrop of globalization and global philanthropy, this book offers new perspectives on the sociological dynamics and governance implications of 'social entrepreneurial' policy in education. It examines the spatialities, relationships and culture that powerfully mediated the making and localisation of 'Teach for Bangladesh'. This globalised and philanthropy-backed reform model is based on 'Teach for America/All' (TfA) which promotes social entrepreneurial solutions to educational problems across continents. The authors demonstrate how TfB's policy model travelled through networks of diaspora, finance, technology and media and became established in Bangladesh through complex policy work. The book documents empirical research from Bangladesh to draw out broader implications in relation to education policy-making and policy content in today's globalizing world. The book also contributes to ongoing debates in contemporary comparative education about North-South dialogue, policy mobility and transfer, philanthrocapitalism, and international teacher education.

Computer-Assisted Language Learning: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-01-04 In a diverse society, the ability to cross communication barriers is critical to the success of any individual personally, professionally, and academically. With the constant acceleration of course programs and technology, educators are continually being challenged to develop and implement creative methods for engaging English-speaking and non-English-speaking learners. Computer-Assisted Language Learning: Concepts, Methodologies, Tools, and Applications is a vital reference source that examines the relationship between language education and technology and the potential for curriculum enhancements

through the use of mobile technologies, flipped instruction, and language-learning software. This multi-volume book is geared toward educators, researchers, academics, linguists, and upper-level students seeking relevant research on the improvement of language education through the use of technology.

TERRORISM AND POLITICAL VIOLENCE IN WEST AFRICA: A GLOBAL PERSPECTIVE

Mahmoud N. Musa / Adebayo E. Adeyemi, 2015-07-30 While it could be arguably stated that West Africa has achieved remarkable and sustainable progress in the areas of democratic governance and economic growth, the sub-region, over the past few years, has been challenged by terrorism and other transnational security threats. Innocent civilians are continuously killed; security operatives and providers of humanitarian assistance targeted; properties and infrastructure wantonly destroyed; thus culminating in significant displacement of people and acute poverty. If these developments are not carefully and timeously addressed, they are capable of eroding progress so far recorded. It is against this background, that this Thesis undertakes a study of the different manifestations of terrorism and related transnational security challenges in West Africa, to explore the internal and external sources and drivers of instability; establish the linkages between terrorism and transnational threats; examine the various steps taken in recent time to strengthen the sub-region's capacity to prevent and address the menace of terrorism and other security challenges, and make necessary policy recommendations based on comprehensive best practices.

Selected Readings of International Financial and Economic News 2015 SUNG TZU-WEN, 2015-02-26 This e-book aims to enhance the undergraduate students' ability to understand, absorb, and analyze international financial and economic news. All contents in this e-book are taken from the website of VOA Learning English (<http://learningenglish.voanews.com>). Design Solutions for Adaptive Hypermedia Listening Software Turel, Vehbi, 2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in

any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.
