Managing IT for Innovation Mitsuru Kodama,2021-07-27 With recent advances in IT in areas such as AI and IoT, collaboration systems such as business chat, cloud services, conferencing systems, and unified communications are rapidly becoming widely used as new IT applications in global corporations' strategic activities. Through in-depth longitudinal studies of global corporations, the book presents a new theoretical framework and implications for IT-enabled dynamic capabilities using collaboration systems from the perspective of micro strategy theory and organization theory. The content of the book is based on longitudinal analyses that employ various qualitative research methods including ethnography, participant observation, action research and in-depth case studies of global corporations in Europe, the United States and Asia that actively use collaboration systems. It presents a new concept of micro dynamism whereby dynamic IT-enabled knowledge communities such as IT-enabled communities of practice and IT-enabled strategic communities create IT-enabled dynamic capabilities through the integration of four research streams - an information systems view, micro strategy view, micro organization view and knowledge-based view. The book demonstrates that collaboration systems create, maintain and develop IT-enabled knowledge communities within companies and are strategic IT applications for enhancing the competitiveness of companies in the ongoing creation of new innovation and the realization of sustainable growth in a 21st century knowledge-based society. This book is primarily written for academics, researchers and graduate students, but will also offer practical implications for business leaders and managers. Its use is anticipated not only in business and management schools, graduate schools and university education environments around the world but also in the broad business environment including management and leadership development training.

Spectrum Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2011-11-03 This report looks at the way in which commercial spectrum holdings are allocated and regulated. This investigation was prompted by the imminence of the next spectrum auction in 2012. Ofcom, as spectrum regulator, has a very difficult role to play in striking a balance between the needs of consumers, spectrum users and service providers, and the public purse. The report finds that Ofcom is doing a good job in striking this balance and is often having to make very difficult and commercially sensitive judgements. Ofcom's consultation on the rules for the next auction has divided opinion among the four mobile network operators, but the Committee remarks that they rarely agree on matters concerning spectrum allocation. Ofcom proposes that one of the spectrum licences available at the auction will contain a coverage obligation requiring the successful bidder to offer mobile internet coverage to an area in which at least 95% of the population lives. The Committee believes that this does not go far enough to hasten the roll-out of mobile broadband, and recommends that the coverage obligation should be set at 98% and that Ofcom consider applying this obligation to more than one licence. The Committee agree with proposals to implement spectrum caps and floors at the auction, this being the best viable option to ensure a competitive tension in the spectrum market place. Ofcom's remit should be widened in order that the interests of British businesses, whose spectrum use plays an important part in the UK economy, are best served.

Administration and effectiveness of HM Revenue and Customs Great Britain: Parliament: House of Commons: Treasury Committee, 2011-07-30 This report identified serious concerns in a number of areas, including: unacceptable difficulties contacting HMRC by phone during peak periods; endemic delays in responding to post; and an increasing focus on online communication that may exclude those without reliable internet access. The Committee recognises that the Department performs a crucial role and operates under significant external pressures including continuing resource reductions, deficiencies in tax legislation and the legacy of the merger. It also acknowledges the commitment of management to tackling these problems and the dedication and professionalism of HMRC staff. However, it concluded that the Department has a difficult few years ahead of it, as it attempts to improve its service. The Committee makes recommendations in the following areas: Improving the service provided by contact centres; providing robust alternative to online contact; ensuring greater awareness of the impact of process changes on individuals and businesses; ensuring reductions in resources are managed in a way that is commensurate with the enabling IT and process improvements and minimises the loss of Departmental tax expertise; reviewing the division of responsibilities between HMRC and HM Treasury in relation to making tax policy, to ensure practical considerations are taken into account at the earliest possible stage; better targeting of letters that threaten serious consequences against individuals; having the National Audit Office externally audit preparations for Real-time Information, to ensure Ministers can be held accountable for progress against the Government's ambitious timetable; and examining how the Department can achieve better accountability around the settlement of large tax cases

Understanding the Media Eoin Devereux, 2007-07-25 'The second edition of Understanding the Media updates what has been recognised as a successful introduction to the study of the mass media.... The author furnishes examples from all around the world, underpinning the emphasis the book places on the concept of globalisation in understanding the modern media. The readings and questions force students to reflect critically on issues and encourage them to explore their own media-consumption habits.... The chapters are well organised and user friendly, with the chapter on globalisation highly recommended. Introductions to media globalisation often fail to provide a succinct and clear overview for first-year students - this chapter cracks the problem with a pithy description of the basic concepts and debates, interlaced with illuminating case studies and illustrative examples... The strength of Eoin Devereux's text is that the examples are familiar and relevant to present-day students and his style does not patronise or talk down to them.... Clearly written, comprehensive, well organised and up to date... This is an excellent introductory text for media studies students' - Times Higher Education Praise for the first edition: 'An interesting book to read, written in a simple and transparent style and interlaced with topical, up-to-date examples of media events' - Journal of Educational Media 'This is...a well-organized, well-informed, student-friendly textbook, ideal for first-year undergraduates as a kicking-off point into the field of media and communications research. It deserves to be widely taken up' - European Journal of Communication Understanding the Media introduces key theoretical issues in media analysis and encourages students to use case studies to examine their own personal media use and exposure. Devereux applies a model of media analysis that gives equal weight to the production, content and reception of media texts. A particular emphasis is placed on understanding the mass media in a social context, and readers are invited to engage with a variety of questions about the increasingly complex mediascape in which we live our everyday lives. Now thoroughly revised and expanded this Second Edition: Includes an additional chapter which draws together the book's key themes Contains new and revised case studies with expanded discussions on media audiences and fandom and 'blogging' New and revised extracted readings in every chapter In addition, the book is now accompanied by an ancillary website with resources for students as well as slides for tutorials/lectures. Each chapter contains concise summaries, exercises, extracts from experts in the field, model exam and essay questions, as well as directions for further reading and research. This practical dimension to Understanding the Media will ensure that the book appeals to both teachers and students of the media in the 21st Century.

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons,2014

HM Revenue & Customs accounts 2010-11 Great Britain: Parliament: House of Commons: Committee of Public

Accounts,2011-12-20 The Commons Public Accounts Committee publishes its 61st Report of the Session which, on the basis of evidence from the Cabinet Office and HM Revenue and Customs (HMRC), examined tax disputes. At 31 March 2011 HM Revenue & Customs was seeking to resolve tax issues valued at over £25 billion with large companies, some of which included disputes over outstanding tax. In this report, the Committee expresses concern about how the Department handled some cases involving large settlements and that there needs to be proper separation between the negotiation of tax settlements and the authorization of such settlements. The Committee also states that HMRC made matters worse by trying to avoid scrutiny of these settlements, keeping confidential the details of specific settlements with large companies. This effects Parliament's ability to establish value for money, compounded further by imprecise, inconsistent and potentially misleading answers given by senior departmental officials, including the Permanent Secretary for Tax in particular over his evidence on his relationship with Goldman Sachs, in facilitating a settlement with the company over their tax dispute. HMRC governance processes in these matters were inconsistent and it has now appointed two new Commissioners with tax expertise, and plans to introduce a new assessor role to permit independent review of large settlements before they are finalised. The Committee further states that it saw little evidence of personal accountability within the Department, and that a perception has developed that large companies are treated more favourably, receiving preferential treatment compared to small businesses and individuals.

Constructive Engagement Nicholas Beale,2017-11-28 The relationships between investors, directors and companies have never been so vital, or so confusing. Gone are the days when being a non-executive director (NED) meant an agreeable lunch and when CEOs wanted them to meet investors 'over my dead body'. Even the most admired companies can be engulfed in scandal and the NEDs find themselves having to drive through fundamental changes. The corporate environment is full of pitfalls for unwary boards. And there are plenty of headline stories of directors who have failed to measure up. Equally, a high quality board which has the confidence of the investors is a major strategic asset: making better decisions, attracting better people and allowing bolder strategies to succeed with investor backing. Nicholas Beale uses research gathered from leading FTSE 100 chairmen, directors, non-executive directors and investors to explore their changing roles. What emerges is a fascinating and instructive picture of constructive engagement; an approach that sees these companies (and the people behind them), each in their own way, address the challenges that are at the heart of global capitalism, and that have lead to the Higgs Review, Sarbanes-Oxley and other regulatory attempts to address corporate mismanagement. From discussions with over 100 leading practitioners, detailed studies of three leading companies, three leading investors and an extended case study on investor engagement at Royal Dutch Shell, the author draws a series of ideas and guidance for all of the parties involved. Sadly this book has come too late for the directors and investors of those companies that have crashed and burned, but all others who are, or aspire to be, directors or significant investors in listed companies should read this book, learn the lessons it has to offer and start adopting them in the organization(s) with which you work and in the portfolios you develop. Rollercoaster Trevor Merriden,2003-06-27 Rollercoaster is a fast-paced and compelling business narrative that chronicles one of the most dramatic periods in business history. It is the story of Chris Gent and Vodafone. Loved by the City as a brilliant dealmaker, Gent himself is often described by those who know him as affable and self-effacing. Yet he has somehow fostered a deeply engrained culture of ruthless ambition in those who run Vodafone in his name. But as the telecommunications sector has imploded, Vodafone has been swept along by bad news amongst accusations of poor acquisitions, over-investment and fat cat payouts for Gent himself. Trevor Merriden charts the dramatic rise of Gent and Vodafone and assesses the underlying forces driving the man and the company. He examines the turbulent recent history, of Gent's resignation, and asks searching questions about the future of the company.

Draft Communications Data Bill Great Britain: Parliament: Joint Committee on the Draft Communications Data Bill,2012-12-11 The Joint Committee finds that draft Bill must be significantly amended to deliver only necessary data that law enforcement needs, and the Home Secretary should not be given carte blanche to order retention of any type of data. Whilst calling for a narrower focus, the Committee recognises that more needs to be done to provide law enforcement and other agencies access to data they cannot currently obtain and so makes a range of constructive proposals to enable the Home Office to present a better Bill to Parliament. There must also be much better consultation with industry, technical experts, civil liberties groups, public authorities and law enforcement bodies before a new Bill is introduced.

Remote Work Revolution Tsedal Neeley,2021-03-30 LONGLISTED FOR THE FINANCIAL TIMES & MCKINSEY BUSINESS BOOK OF THE YEAR "I often talk about the importance of trust when it comes to work: the trust of your employees and building trust with your customers. This book provides a blueprint for how to build and maintain that trust and connection in a digital environment." —Eric S. Yuan, founder and CEO of Zoom A Harvard Business School professor and leading expert in virtual and global work provides remote workers and leaders with the best practices necessary to perform at the highest levels in their organizations. The rapid and unprecedented changes brought on by Covid-19 have accelerated the transition to remote working, requiring the wholesale migration of nearly entire companies to virtual work in just weeks, leaving managers and employees scrambling to adjust. This massive transition has forced companies to rapidly advance their digital footprint, using cloud, storage, cybersecurity, and device tools to accommodate their new remote workforce. Experiencing the benefits of remote working—including nonexistent commute times, lower operational costs, and a larger pool of global job applicants—many companies, including Twitter and Google, plan to permanently incorporate remote days or give employees the option to work from home full-time. But virtual work has its challenges. Employees feel lost, isolated, out of sync, and out of sight. They want to know how to build trust, maintain connections without in-person interactions, and a proper work/life balance. Managers want to know how to lead virtually, how to keep their teams motivated, what digital tools they'll need, and how to keep employees productive. Providing compelling, evidence-based answers to these and other pressing issues, Remote Work Revolution is essential for navigating the enduring challenges teams and managers face. Filled with specific actionable steps and interactive tools, this timely book will help team members deliver results previously out of reach. Following Neeley's advice, employees

will be able to break through routine norms to successfully use remote work to benefit themselves, their groups, and ultimately their organizations.

The Business of Projects Andrew Davies,Michael Hobday,2005-10-27 The Business of Projects broke ground when it was first published in 2005, by showing how leading businesses create and implement projects to drive strategy and innovation. Projects are used to coordinate activities with customers and suppliers and ensure that organisations become more dynamic and adaptable. The book extends the resource-based view of the firm to focus on the business lessons learned from the design and production of high-value complex products and systems (CoPS), which have always been project-based. As well as frameworks and management tools, it provides case studies of high-technology industries - such as telecommunications, flight simulation and medical devices - to show how projects are used to achieve strategic objectives, perform systems integration, organise productive activities, manage software, achieve organisational learning and deliver solutions for customers. This book is essential reading for project professionals, academics, students, engineers, managers and policy makers seeking a strategic, innovative perspective on projects.

Intelligent M & A Scott Moeller,Chris Brady,2014-05-16 Almost 70% of mergers fail, yet deals are essential for growing world-class companies. Therefore they must use all the tools and techniques at their disposal to improve their chances of success. Applying the techniques advocated in this book can help managers beat the odds - and employees themselves - to have an impact on whether a deal will be successful both for the company and for themselves. This book looks at the process of a merger or acquisition and pinpoints the areas where business intelligence can raise the odds of success in each phase of the deal. Using techniques developed by governmental intelligence services and a wide range of recent case studies, quotations and anecdotes, the expert authors from the renowned Cass Business School show how to build success into any M&A situation. The first edition of Intelligent M&A was written in 2006 and published in 2007. This preceded the peak year (2007) of the last merger wave, including the excesses in a number of industries and deals (e.g., financial services with RBS' dramatically failed acquisition of ABN AMRO as a key example), and the global economic downturn that led to a completely new way of operating for many industries and companies. Therefore, there is a need to update the book to incorporate not just more relevant and up-to-date case studies of deals but to show the 'new' way of operating in a post-Lehman environment. Chapters will be comprehensively re-written and populated with new and relevant case studies.
