With detailed case studies from a range of countries, this book will be useful reading on a range of courses at Masters and MBA level, including e-business, mobile technologies,

operations management, technology management and change management.

It's Your Call: The Complete Guide to Mobile Phones Andrew Mennen, 2005

The New Digital Age Eric Schmidt, Jared Cohen, 2013-04-23 In an unparalleled collaboration, two leading global thinkers in technology and foreign affairs give us their widely anticipated, transformational vision of the future: a world where everyone is connected—a world full of challenges and benefits that are ours to meet and to harness. Eric Schmidt is one of Silicon Valley's great leaders, having taken Google from a small startup to one of the world's most influential companies. Jared Cohen is the director of Google Ideas and a former adviser to secretaries of state Condoleezza Rice and Hillary Clinton. With their combined knowledge and experiences, the authors are uniquely positioned to take on some of the toughest questions about our future: Who will be more powerful in the future, the citizen or the state? Will technology make terrorism easier or harder to carry out? What is the relationship between privacy and security, and how much will we have to give up to be part of the new digital age? In this groundbreaking book, Schmidt and Cohen combine observation and insight to outline the promise and peril awaiting us in the coming decades. At once pragmatic and inspirational, this is a forward-thinking account of where our world is headed and what this means for people, states and businesses. With the confidence and clarity of visionaries, Schmidt and Cohen illustrate just how much we have to look forward to—and beware of—as the greatest information and technology revolution in human history continues to evolve. On individual, community and state levels, across every geographical and socioeconomic spectrum, they reveal the dramatic developments—good and bad—that will transform both our everyday lives and our

understanding of self and society, as technology advances and our virtual identities become more and more fundamentally real. As Schmidt and Cohen's nuanced vision of the near future unfolds, an urban professional takes his driverless car to work, attends meetings via hologram and dispenses housekeeping robots by voice; a Congolese fisherwoman uses her smart phone to monitor market demand and coordinate sales (saving on costly refrigeration and preventing overfishing); the potential arises for "virtual statehood" and "Internet asylum" to liberate political dissidents and oppressed minorities, but also for tech-savvy autocracies (and perhaps democracies) to exploit their citizens' mobile devices for ever more ubiquitous surveillance. Along the way, we meet a cadre of international figures—including Julian Assange—who explain their own visions of our technology-saturated future. Inspiring, provocative and absorbing, *The New Digital Age* is a brilliant analysis of how our hyper-connected world will soon look, from two of our most prescient and informed public thinkers.

Corporate Social Responsibility Andrew Crane, Dirk Matten, Laura Spence, 2014 As a relatively young subject matter, corporate social responsibility has unsurprisingly developed and evolved in numerous ways since the first edition of this textbook was published. Retaining the features which made the first edition a top selling text in the field, the new edition continues to be the only textbook available which provides a ready-made, enhanced course pack for CSR classes. Authoritative editor introductions provide accessible entry points to the subjects covered - an approach which is particularly suited to advanced undergraduate and postgraduate teaching that emphasises a research-led approach. New case studies are integrated throughout the text to enable students to think and analyze the subject from every angle. The entire textbook reflects the global nature of CSR as a discipline and further pedagogical features include chapter learning outcomes; study questions; 'challenges for practice' boxes and additional 'further reading' features at the end of each chapter. This highly rated textbook now also benefits from a regularly updated companion website which features a brand new 'CSR Case Club' presenting students and lecturers with further case suggestions with which to enhance learning; lecture slides; updates from the popular Crane and Matten blog, links to further reading and career sites, YouTube clips and suggested answers to study questions. An Ivey CaseMate has also been created for this book at <https://www.iveycases.com/CaseMateBookDetail.aspx?id=335>.

Cell Phone Culture Gerard Goggin, 2006
Comprehensive introduction to cell phone culture

and theory.

MMS Daniel Ralph, Paul Graham, 2004-04-21 MMS has evolved from the huge popularity of the SMS text service for GSM networks. It is a departure from the transport mechanism used for SMS (which is based on the GSM signalling channels) to the use of IP to transport messages within the MMS network. To this end MMS has similarities with Internet email and standard IETF protocols. As with any new technology it is difficult to accurately predict the position within the next 5 years, although based on previous experience with WAP and SMS it would be fair to say that these protocols will increase in usage over the next 5 years and become legacy for a further 5 years following which, users will migrate onto the next wave of messaging. Significant revenue growth and data usage is expected to be driven by consumer usage of MMS. But MMS technology offers more than just a broadening of message content. With MMS, it is not only possible to send your multimedia messages from one phone to another, but also from phone to email, and vice versa. This feature dramatically increases the possibilities of mobile communication, both for private and corporate use. Multimedia messaging will reshape the landscape of mobile communication, making it more personal, more versatile, and more expressive than ever before. MMS: Is the first book to address how MMS (and the use of IP to transport messages) will affect existing infrastructure and business models Covers the fundamental changes to mail and billing systems Includes future recommendations, such as interoperability and evolution Presents an overview of the MMS technology components Drawing on the authors hands-on experience in the implementation of MMS technology (developing, billing and delivering services) at BT, this innovative book will appeal to engineering managers, network operators, market analysts,

business decision makers, content providers and operator organizations.

Weaving Services and People on the World Wide

Web Irwin King, Ricardo Baeza-Yates, 2009-06-23 Ever since its inception, the Web has changed the landscape of human experiences on how we interact with one another and data through service infrastructures via various computing devices. This interweaving environment is now becoming ever more embedded into devices and systems that integrate seamlessly on how we live, both in our working or leisure time. For this volume, King and Baeza-Yates selected some pioneering and cutting-edge research work that is pointing to the future of the Web. Based on the Workshop Track of the 17th International World Wide Web Conference (WWW2008) in Beijing, they selected the top contributions and asked the authors to resubmit their work with a minimum of one third of additional material from their original workshop manuscripts to be considered for this volume. After a second-round of reviews and selection, 16 contributions were finally accepted. The work within this volume represents the tip of an iceberg of the many exciting advancements on the WWW. It covers topics like semantic web services, location-based and mobile applications, personalized and context-dependent user interfaces, social networks, and folksonomies. The presentations aim at researchers in academia and industry by showcasing latest research findings. Overall they deliver an excellent picture of the current state-of-the-art, and will also serve as the basis for ongoing research discussions and point to new directions.

Handbook of Research in International Marketing

Subhash C. Jain, David A. Griffith, 2011 The global expansion of business has generated a tremendous interest among scholars, but there remains a strong need for theoretical insights into

conducting marketing operations abroad. This thoroughly revised edition addresses this lack in the extant literature. The book consists of insights from leading scholars in international marketing, working not only to advance the theoretical underpinnings of today's most important international marketing issues, but also to provide insights for how the field of scholarship and practice of international marketing might develop in the future. The authors, top scholars from around the world, provide useful theoretical insights designed to stimulate contemplation and discussion, and to provide guidelines for future research on international marketing. The volume includes coverage of topics in four main areas: Part I looks at global branding while Part II examines issues of marketing strategy on a world stage. Part III offers chapters on cultural issues and the book closes with a more detailed look at marketing at the bottom of the pyramid in Part IV. Scholars and students in marketing and international business will find much of value in this comprehensive volume.

Competition Law in India Abir Roy, 2016-03-24
Although relatively young in terms of its lifespan as a regulator, the Competition Commission of India (established by the Competition Act of 2002 but came into existence in 2009) has been extremely assertive in its enforcement outlook, and competition law in India continues to grow in importance as inward investment increases. This comprehensive, practical guide outlines the highly distinctive manner in which competition law is interpreted in this major global market. Highlighting differences from EU practice, the author - a leading Indian competition law practitioner - describes elements of practice and procedures in Indian competition law encompassing the following: • the dual regulatory-judicial

nature of the Competition Commission; • investigatory powers of the Commission's Director General; • mandated business conduct policies (e.g., active risk management procedures); • availability of sanctions, remedies, and private actions; • cartels and leniency programmes; • extraterritorial application of the Competition Commission; • merger review; • pricing and non-pricing abuse; • international coordination; • appeal process; • fines - companies, directors and officers; • fines for non-cooperation or furnishing false information; and • liability of state-owned enterprises. Analysis of numerous leading cases decided by the Indian competition authorities enhances the book's practical value. This comprehensive guide provides an incomparable overview of practice in a key jurisdiction that is poised to become increasingly important in the international recognition and enforcement of competition law. As a guide to the 'landscape' of competition law in India, it has no peers. The book will be of inestimable value to professionals in this area of legal practice, whether in law firms, corporations, academia, government or the judiciary, as well as to investors, economists and business executives.

Making Sustainability Work Marc J.

Epstein,Adriana Rejc Buhovac,2014-03-10 NEW EDITION, REVISED AND UPDATED Most companies today have some commitment to corporate social responsibility, but implementing these initiatives can be particularly challenging. While a lot has been written on ethical and strategic factors,

there is still a dearth of information on the practical nuts and bolts. And whereas with most other organizational initiatives the sole objective is improved financial performance, sustainability broadens the focus to include social and environmental performance, which is much more difficult to measure. Now updated throughout with new examples and new research, this is a complete guide to implementing and measuring the effectiveness of sustainability initiatives. It draws on Marc Epstein's and new coauthor Adriana Rejc Buhovac's solid academic foundation and extensive consulting work and includes best practices from dozens of companies in Europe, Asia, North America, South America, Australia, and Africa. This is the ultimate how-to guide for corporate leaders, strategists, academics, sustainability consultants, and anyone else with an interest in actually putting sustainability ideas into practice and making sure they accomplish their goals.
