"Listening to your mum's voice can make your day". An explorative study about the social functions of voice messages in messaging apps for international students Lisa Fritsch, 2020-01-08 Master's Thesis from the year 2019 in the subject Communications - Interpersonal Communication, grade: 1,6, European University Viadrina Frankfurt (Oder), language: English, abstract: Since 2013, voice messages can be sent using messaging services such as WhatsApp. Thus, the oral information transfer enters the digital messenger communication, which was previously exclusively based in written form. In German research of communication and linguistics, there are few scientists who have so far dealt with voice messages. They present a new challenge for the media linguistic conception of digital communication, as they fall into a gap between oral and written language utterances. The linguistics professor Katharina König emphasizes this decisive new aspect: With the integration of voice messages[...] media orality enters the non-simultaneous, quasi-synchronous messenger communication. Voice messages bring a kind of 'answering machine' option to messenger chats. How does this change digital communication? What are the social functions for the interpersonal exchange of them? These questions were investigated as part of a qualitative research, for which 20 international students between the ages of 20 and 34 were interviewed in Paris and Sofia. The selection of this sample favors the preservation of a homogeneous group of young adults in the same life situation. The research results showed that, despite the different countries of origin, the students have a similar usage of voice messages. The main benefit of voice messages is that they can be sent faster and easier and are therefore particularly practical in stressful situations. The speed allows more complex information to be recorded in less time. Furthermore, the increased emotionality through one's own voice and consequently a bigger intimacy between two chat partners, play an important role in the social functions of voice messages.

The 100 Trillion Dollar Wealth Transfer Ken Costa, 2023-09-28 An insider's look into how Generation Z's focus on ethics, climate change and purpose will change capitalism forever. In the next ten years there will be an unprecedented wealth transfer from the so-called 'baby boomer' generation to the young. Never before will so much money – in housing, land, stocks and cash – be shifted so suddenly from one generation to the next, and never before does the next generation feel so differently about the future of the planet and of capitalism. Ken Costa works with this new generation and shows how environmental concerns and anxiety about equality and diversity are more than mere slogans; instead they are driving the future of the markets. So many issues stem from the reality of the financial gap between age groups - from cancel culture and fears about wokeness, to generation rent, protest movements and re-evaluations of history around subjects such as empire. Costa also shows how we can build a more inclusive, purposeful capitalism, which shifts focus away from the individual and more towards collaboration, compassion and community. For readers of Rebecca Henderson's Reimagining Capitalism, and Rutger Bregman's Utopia for Realists, as well as business leaders and tech watchers, this is what the future of capitalism looks like, how our current systems may be upended, and above all how boomers must work with the invigorating and inspiring young, who see their mission not just to increase value for shareholders, but also to save the planet.

The Mirror of Beauty Shamsur Rahman Faruqi, 2014-03-21 It is the sunset of the Mughal Empire. The splendour of imperial Delhi flares one last time. The young daughter of a craftsman in the city elopes with an officer of the East India Company. And so we are drawn into the story of Wazir Khanam: a dazzlingly beautiful and fiercely independent woman who takes a series of lovers, including a Navab and a Mughal prince—and whom history remembers as the mother of the famous poet Dagh. But it is not just one life that this novel sets out to capture: it paints in rapturous detail an entire civilization. Beginning with the story of an enigmatic and gifted painter in a village near Kishangarh, *The Mirror of Beauty* embarks on an epic journey that sweeps through the death-giving deserts of Rajputana, the verdant valley of Kashmir and the glorious cosmopolis of Delhi, the craft of miniature painting and the art of carpet designing, scintillating musical performances and recurring paintings of mysterious, alluring women. Its scope breathtaking, its language beguiling, and its style sumptuous, this is a work of profound beauty, depth and power.

Your Post Has Been Removed Frederik Stjernfelt,Anne Mette Lauritzen,2019-01-01 This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, hate speech and fake news will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as *Dit opslag er blevet fjernet - techgiganter & ytringsfrihed*. Praise for 'Your Post has been Removed' From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the 21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future. Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed! Nadine Strossen, Professor, New York Law School. Author, *HATE: Why We Should Resist It with Free Speech, Not Censorship*.

Digital and Social Media Marketing Nripendra P. Rana,Emma L. Slade,Ganesh P. Sahu,Hatice Kizgin,Nitish Singh,Bidit Dey,Anabel Gutierrez,Yogesh K. Dwivedi,2019-11-11 This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

Disability Media Studies Elizabeth Ellcessor,Bill Kirkpatrick,2017-10-03 Introduces key ideas and offers a sense of the new frontiers and questions in the emerging field of disability media studies *Disability Media Studies* articulates the formation of a new field of study, based in the rich traditions of media, cultural, and disability studies. Necessarily interdisciplinary and diverse, this collection weaves together work from scholars from a variety of disciplinary homes, into a broader conversation about exploring media artifacts in relation to disability. The book provides a comprehensive overview for anyone interested in the study of disability and media today. Case studies include familiar contemporary examples—such as Iron Man 3, Lady Gaga, and Oscar Pistorius—as well as historical media, independent disability media, reality television, and media technologies. The contributors consider disability representation, the role of media in forming cultural assumptions about ability, the construction of disability via media technologies, and how disabled audiences respond to particular media artifacts. The volume concludes with afterwords from two different perspectives on the field—one by disability scholar Rachel Adams, the other by media scholars Mara Mills and Jonathan Sterne—that reflect upon the collection, the ongoing conversations, and the future of disability media studies. *Disability Media Studies* is a crucial text for those interested in this flourishing field, and will pave the way for a greater understanding of disability media studies and its critical concepts and conversations.
