Conflict Reporting Strategies and the Identities of Ethnic and Religious Communities in Jos, Nigeria Godfrey Naanlang Danaan,2020-05-19 This book examines journalistic strategies in terms of the appropriation of media logics in the conflict frame-building process. Relying on three models (objectivity, mediatisation and news framing), it interrogates the role orientations and performance of journalists who reported the conflict involving the 'indigenous' Christians and Hausa Fulani Muslim 'settlers' of Jos, a city in North Central Nigeria inhabited by approximately one million people. The book provides empirical evidence of the strategies and the representations of ethnic and religious identities in the conflict narratives focusing on the most-cited and vicious conflicts in Jos which occurred in 2001, 2008 and 2010. Thus, mediatised conflict research is revisited, placing media logics at the heart of the conflict. The text proposes Solutions-Review Journalism (SRJ) as a framework for conflict reporting, and argues that a review process is necessary to measure impact.

Information and Communication Technology in Physical Education Dr. Rakesh Gupta,2021-05-19 Information and Communication Technology (ICT) is an extended term for Information Technology (IT) which stresses the role of unified communications. The term ICT is also used to refer to the convergence of audio-visual and telephone networks with computer networks through a single cabling or link system. There are large economic incentives (huge cost savings due to elimination of the telephone network) to merge the telephone network with the computer network system using a single unified system of cabling, signal distribution and management. However, ICT has no universal definition, as the concepts, methods and applications involved in ICT are constantly evolving on an almost daily basis. The broadness of ICT covers any product that will store, retrieve, manipulate, transmit or receive information electronically in a digital form, e.g. personal computers, digital television, email, robots. For clarity, Zuppo provided an ICT hierarchy where all levels of the hierarchy contain some degree of commonality in that they are related to technologies that facilitate the transfer of information and various types of electronically mediated communications. Skills Framework for the Information Age is one of many models for describing and managing competencies for ICT professionals for the 21st century. Physical education, also known as Phys Ed., PE, Gym or Gym class, and known in many Commonwealth countries as physical training or PT, is an educational course related of maintaining the human body through physical exercises (i.e. calisthenics). It is taken during primary and secondary education and

encourages psychomotor learning in a play or movement exploration setting to promote health. Information and Communication Technologies (ICT) in the field of physical education by the professed and the students. Finally the main problems related to the use of these technologies in classrooms are analyzed. All this in order t to shed light on a very topical issue regarding the education of our youth. Studies show that ICTs are increasingly present in the field of physical education, but much remains to be done to make an effective use of them in education.
