The Predictive Retailer Andrew Pearson,2017-10-23 The Predictive Retailer is a retail company that utilizes the latest technological developments to deliver an exceptional personalized experience to each and every customer. Today, technology such as AI, Machine Learning, Augmented Reality, IoT, Real-time stream processing, social media, and wearables are altering the Customer Experience (CX) landscape and retailers need to jump aboard this fast moving technology or run the risk of being left out in the cold. The Predictive Retailer reveals how these and other technologies can help shape the customer journey. The book details how the five types of analytics-descriptive, diagnostic, predictive, prescriptive, and edge analytics-affect not only the customer journey, but also just about every operating function of the retailer. An IoT connected retailer can make its operations smart. Connected devices can help with inventory optimization, supply chain management, labor management, waste management, as well as keep the retailer's data centers green and its energy use smart. Social media is no longer a vanity platform, but rather it is a place to both connect with current customers as well as court new ones. It is also a powerful branding channel that can be utilized to both understand a retailer's position in the market, as well as a place to benchmark its position against its competitors. Today, technology moves at break-neck speed and it can offer the potential of anticipatory capabilities, but it also comes with a confusing variety of technological terms--Big Data, Cognitive Computing, CX, Data Lakes, Hadoop, Kafka, Personalization, Spark, etc., etc. The Predictive Retailer will help make sense of it all, so that a retail executive can cut through the confusing technological jargon and understand why a Spark-based real-time stream processing data stream might be preferable to a TIBCO Streambase one, or an IBM Streaming Analytics one. This book will help retail executives break through the technological clutter so that they can deliver an unrivaled customer experience to each and every patron that comes through their doors.

The Predictive Casino - 2nd Edition Andrew Pearson,2017-12-15 The Predictive Casino is a casino that utilizes the latest technological developments to connect with its customers to deliver an exceptional personalized experience that will keep them coming back. Today, technology such as AI, Machine Learning, Augmented Reality, facial recognition, IoT, Real-time stream processing, social media, and wearables are altering the Customer Experience (CX) landscape and casino operators need to jump aboard this fast moving technology or run the risk of being left out in the cold. The Predictive Casino reveals how these and other technologies can help shape the customer journey as well as provide insights into every facet of the business. The book details how the five types of analytics-descriptive, diagnostic, predictive, prescriptive, and edge analytics-affect not only the customer journey, but also just about every department in a casino operation. Facial recognition technology can spot a customer stepping onto a casino bus at the Macau/China border and that can set off alerts which will notify he necessary departments, where that is a host on the floor, a restaurant manager, a dealer, or even the hotel's GM should the player be a high-end VIP. A whole other sequence of events can get triggered as the player's favorite table is prepared, his favorite meal is cooked, and his or her Theo gets added to a real-time table games revenue management model that takes into account his personal play. Labor needs are also considered and alerts can be sent to the required or unneeded staff. An IoT connected casino can make its operations smart. Connected devices can help with inventory optimization, supply chain management, labor management, and waste management. With machine learning algorithms, data centers can be kept green and their energy use smart. For a casino operator, social media is no longer a vanity platform, but rather a place to both connect with current customers as well as court new ones. It is also a powerful branding channel that can be utilized to both understand a casino's position in the market, as well as a place to benchmark its position against its competitors. Today, technology moves at break-neck speed and it can offer the power of deep customer understanding and insight, but it also comes with a confusing variety of technology and technological terms--Big Data, Cognitive Computing, CX, Data Lakes, Hadoop, Kafka, Personalization, Spark, etc., etc. The Predictive Casino will help make sense of it all, so that a casino executive can cut through the confusing clutters of technological jargons and understand why a Spark-based real-time stream processing data stream might be preferable over a TIBCO Streambase one, or an even IBM InfoSphere one. Or maybe not. This book will help casino executives break through the technological clutter so that they can deliver an unrivaled customer experience to each and every patron coming through their doors.

Teach Yourself VISUALLY LinkedIn Lance Whitney,2014-07-22 A complete visual guide to the world's largest professional network Teach Yourself VISUALLY LinkedIn is your guide to becoming a part of the world's largest professional network, with over 259 million users across 200 countries and territories. Using full-color screen shots, this visually rich guide provides step-by-step instructions that show you how to get the most out of the myriad tools and features LinkedIn has to offer. The book is organized for quick, easy navigation, and written in clear, concise language that allows you to get up to speed quickly. LinkedIn has become the premier destination both for those seeking employment, and those looking to employ others. A professional take on social media, the site allows users to post resume-like profiles and network with others in their fields, connecting with past, present, and potentially future colleagues. LinkedIn is growing at a rate of two users per second, making it a major hub and networking tool for those looking to establish, maintain, or grow a professional network. This guide discusses the purpose and benefits of LinkedIn, and shows you how to set up a professional profile that will stand out from the crowd. Topics include: Setting up your account Adding endorsements and recommendations Networking with colleagues Posting status updates Showing off your strengths, talents, and accomplishments is an important part of networking, and interacting with others in your industry is an excellent way to get your name out there and make new contacts. LinkedIn facilitates both, allowing you to broaden your reach without leaving your desk. Teach Yourself VISUALLY LinkedIn helps you get on board today.

Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—“In the future, everyone will be world-famous for 15 minutes.” Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I’ve never met a person I couldn’t call a beauty.New things are always better than old things.I’m still a commercial artist. I was always a commercial artist.

Bitter Music Harry Partch,2000 Now in paper for the first time, Bitter Music is a generous volume of writings by one of the twentieth century's great musical iconoclasts. Rejecting the equal temperament and concert traditions that have dominated western music, Harry Partch adopted the pure intervals of just intonation and devised a 43-tone-to-the-octave scale, which in turn forced him into inventing numerous musical instruments. His compositions realize his ideal of a corporeal music that unites music, dance, and theater. Winner of the ASCAP-Deems Taylor Award, Bitter Music includes two journals kept by Partch, one while wandering the West Coast during the Depression and the other while hiking the rugged northern California coastline. It also includes essays and discussions by Partch of his own compositions, as well as librettos and scenarios for six major narrative/dramatic compositions.

Better, Best, Brilliant Denise Meyerson,2013 Better, Best, Brilliant contains a vast repertoire of tools and techniques, practical advice and a series of sophisticated roadmaps for new learning and development practitioners as well as for the seasoned trainers who are looking to rejuvenate their sessions and inject new ideas into their programs.

Nonsequiturs Frederic Rzewski, 2007

Close Listening Charles Bernstein, 1998-04-30 Close Listening brings together seventeen strikingly original essays, especially written for this volume, on the poetry reading, the sound of poetry, and the visual performance of poetry. While the performance of poetry is as old as poetry itself, critical attention to modern and postmodern poetry performance has been surprisingly slight. This volume, featuring work by critics and poets such as Marjorie Perloff, Susan Stewart, Johanna Drucker, Dennis Tedlock, and Susan Howe, is the first comprehensive introduction to the ways in which twentieth-century poetry has been practiced as a performance art. From the performance styles of individual poets and types of poetry to the relation of sound to meaning, from historical and social approaches to poetry readings to new imaginations of prosody, the entries gathered here investigate a compelling range of topics for anyone interested in poetry. Taken together, these essays encourage new forms of close listenings--not only to the printed text of poems but also to tapes, performances, and other expressions of the sounded and visualized word. The time is right for such a volume: with readings, spoken word events, and the Web gaining an increasing audience for poetry, Close Listening opens a number of new avenues for the critical discussion of the sound and performance of poetry.

Writing Aloud Brandon LaBelle, Christof Migone, 2001 Edited by Christof Migone, Brandon LaBelle.

Of Ong and Media Ecology Thomas J. Farrell, Paul A. Soukup, 2012 Each of the essays in this collection builds on the scholarship or ideas of Walter J. Ong, S.J., and, in so doing, suggests avenues of exploration for contemporary scholars. Taken as a whole, these essays call attention to human expression and expressiveness--orality, writing, print, decoration: the whole variety of human communication.

Audiobooks, Literature, and Sound Studies Matthew Rubery, 2011-05-09 This is the first scholarly work to examine the cultural significance of the talking book since the invention of the phonograph in 1877, the earliest machine to enable the reproduction of the human voice. Recent advances in sound technology make this an opportune moment to reflect on the evolution of our reading practices since this remarkable invention. Some questions addressed by the collection include: How does auditory literature adapt printed texts? What skills in close listening are necessary for its reception? What are the social consequences of new listening technologies? In sum, the essays gathered together by this collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways. Bringing together a set of reflections on the enrichments and impoverishments of the reading experience brought about by developments in sound technology, this collection spans the earliest adaptations of printed texts into sound by Charles Dickens, Thomas Hardy, and other novelists from the late nineteenth century to recordings by contemporary figures such as Toni Morrison and Barack Obama at the turn of the twenty-first century. As the voices gathered here suggest, it is time to give a hearing to one of the most talked about new media of the past century.

Talk Fiction Irene Kacandes, 2001-01-01 Everywhere you turn today, someone (or something) is talking to you?the television, the radio, cell phones, your computer. If you think some of the novels and stories you read are talking to you too, you're not alone, and you're not mistaken. In this innovative, multidisciplinary work, Irene Kacandes reads contemporary fiction as a form of conversation and as part of the larger conversation that is modern culture. Within a framework of talk as interaction, Kacandes considers texts that can be classified as statements, that is, texts that wholly or in part ask for their readers to react? to talk back?to them in certain ways. The works she addresses?from writers as varied as Harriet O. Wilson, Margaret Atwood, William Faulkner, Virginia Woolf, Graham Swift, Ginter Grass, John Barth, Julio Cortázar, and Italo Calvino?conduct their interactions in certain modes to accomplish different sorts of cultural work: storytelling, testimony, apostrophe, and interactivity. By focusing on texts within these groupings, Kacandes is able to relate the different modes of talk fiction to extraliterary cultural developments in our oral age?and to show how such interactions, however contrary to the dominant twentieth-century view of literature as art for art's sake, help to keep literature alive and speaking to us.

Fighting Globesity Philip Mills, Jackie Mills, 2007 One of the most significant books to have been written by a New Zealand business leader. Phillip Mills, the Ernst and Young Entrepreneur of the Year and a global exporter of fitness programmes to 71 countries, has spent the last year forming his views on health and fitness and sustainability into an engaging and challenging book, Fighting Globesity. All New Zealanders should read it. As Phillip jokes, What would a couple of gym bunnies know about climate change and sustainability? As it turns out, rather a lot. Phillip has done wide reading and research in this area over the last few years. From that he has distilled a carefully argued message: we need to get fit and stay fit, we need to consume fewer resources, we need to urgently engage with health and climate change issues - and we can make a difference. In this he may well be a step ahead of many other business thinkers. Accompanied by exercise and training programmes, nutritional information, recipes and more, FIGHTING GLOBESITY is a perfect health, fitness and philosophy package. FIGHTING GLOBESITY - A Practical Guide To Personal Health And Global Sustainability combines the Mills's experience to create a cutting-edge lifestyle prescription which will be sustainable for both the individual and the planet.

Reflections Alvin Lucier, 1995

Big Data in Practice Bernard Marr, 2016-03-22 The best-selling author of Big Data is back, this time with a unique and in-depth insight into how specific companies use big data. Big data is on the tip of everyone's tongue. Everyone understands its power and importance, but many fail to grasp the actionable steps and resources required to utilise it effectively. This book fills the knowledge gap by showing how major companies are using big data every day, from an up-close, on-the-ground perspective. From technology, media and retail, to sport teams, government agencies and financial institutions, learn the actual strategies and processes being used to learn about customers, improve manufacturing, spur innovation, improve safety and so much more. Organised for easy dip-in navigation, each chapter follows the same structure to give you the information you need quickly. For each company profiled, learn what data was used, what problem it solved and the processes put it place to make it practical, as well as the technical details, challenges and lessons learned from each unique scenario. Learn how predictive analytics helps Amazon, Target, John Deere and Apple understand their customers Discover how big data is behind the success of Walmart, LinkedIn, Microsoft and more Learn how big data is changing medicine, law enforcement, hospitality, fashion, science and banking Develop your own big data strategy by accessing additional reading materials at the end of each chapter

Strategic Marketing Approaches within Airline Management: How the Passenger Market causes the Business Concepts of Full Service Network Carriers, Low Cost Carriers, Regional Carriers and Leisure Carriers to overlap Susanne Bölke, 2014-05-01 On the German passenger market, airlines approach different business concepts in order to cope with the threats and to be successful. The case of the Lufthansa Passenger Airline and its subsidiary Germanwings has been discussed many times currently. Together they have implemented a restructured concept of the Low Cost Carrier Germanwings in order to overcome their weaknesses. The purpose of this paper is to evaluate the potential of economic success of this strategy change. Therefore, the paper comprises three main areas. The first one is the theoretical part, which explains the differences between Full Service Network Carriers, Low Cost Carriers, Regional Carriers and Leisure Carriers. Secondly, the analysis takes place by applying Porter's five forces model. Subsequently, the strengths and weaknesses of the Lufthansa Passenger Airline and Germanwings are highlighted and the new business concept is introduced. Finally, all findings are put into relation using the SWOT-analysis.

Postmodern Music/Postmodern Thought Judy Lochhead, Joseph Auner, 2013-10-08 First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Errant Bodies Brandon LaBelle, 1998-03 Described as one of the most impressive new literature journals by Small Press magazine, this issue of Errant Bodies includes contributions by Simon Leung, Norman Klein, Nicky Hirst, Steve Roden, Ed Fella, Steve Hall and many others.
