*A Social-Scientific Examination of the Dynamics of Communication, Thought, and Selves* Sekalala, Seif, 2022-06-17 Intrapersonal communication has been considered and studied less in comparison to general communication and other related topics. Moreover, intrapersonal communication is usually mentioned in the context of studying other topics, as opposed to being studied singularly. To fully understand the complexity and potential uses of this field of study, intrapersonal communication must be researched further. *A Social-Scientific Examination of the Dynamics of Communication, Thought, and Selves* focuses on the concept of intrapersonal communication, discusses how and why we communicate with ourselves, and considers how scholars can help humans improve and harness intrapersonal communication in fields such as artificial intelligence. The book also makes a forceful case for the importance and potential utility of intrapersonal communication. Covering topics such as language, sociology, and cognitive science, this reference work is ideal for sociologists, psychologists, industry professionals, academicians, scholars, researchers, practitioners, instructors, and students.

**Grammatical Voice** M. H. Klaiman, 1991-11-29 Categories of the verb in natural languages include tense, aspect, modality (mood) and voice. Among these, voice, in its rich and diverse manifestations, is perhaps the most complex. But most prior research concentrates on only certain types, predominantly passives. Voice expresses relations between a predicate and a set of nominal positions - or their referents - in a clause or other structure. *Grammatical Voice* is the first typological study of voice systems based on a multi-language survey. It introduces a threefold classification of voice types, in the first place distinguishing passivization phenomena (derived voice) from active-middle systems (basic voice); and further, distinguishing each of these from pragmatically grounded voice behaviours, such as focus and inverse systems. As the first comprehensive study of voice systems and voice typology, this book makes a significant contribution to current research in linguistics and grammatical theory.

**Complete Songs, 1844-1889** Herrman S. Saroni, This volume includes all of the surviving songs by German-American composer, performer, critic, and businessman Herrman S. Saroni (1823/24-1900), who is now most remembered as the owner and editor of Saroni's Musical Times (one of America's first significant music magazines). The entire date range of these songs is 1844-89, but the vast majority appeared in the 1840s and early 1850s. Saroni was among the first composers in America to combine aspects of German lieder and various features associated with popular song, and these works fuse accessibility to amateurs with sophisticated compositional techniques. Despite several indicators of success in his era, Saroni's songs are almost completely unknown today. These

works deserve reconsideration and modern performance both for their historical significance and for their aesthetic value. Most of the songs in this edition were published in Saroni's lifetime, but an appendix includes a transcription of an unpublished holograph manuscript song, the original of which is also shown in two plate images.

**Together, Somehow** Luis Manuel Garcia-Mispireta,2023-06-30 In *Together, Somehow*, Luis Manuel Garcia-Mispireta examines how people find ways to get along and share a dancefloor, a vibe, and a sound. Drawing on time spent in the minimal techno and house music subscenes in Chicago, Paris, and Berlin as the first decade of the new millennium came to a close, Garcia-Mispireta explains this bonding in terms of what he calls stranger-intimacy: the kind of warmth, sharing, and vulnerability between people that happens surprisingly often at popular electronic dance music parties. He shows how affect lubricates the connections between music and the dancers. Intense shared senses of sound and touch help support a feeling of belonging to a larger social world. However, as Garcia-Mispireta points out, this sense of belonging can be vague, fluid, and may hide exclusions and injustices. By showing how sharing a dancefloor involves feeling, touch, sound, sexuality, and subculture, Garcia-Mispireta rethinks intimacy and belonging through dancing crowds and the utopian vision of throbbing dancefloors.

*Complete Songs for Solo Voice and Piano, Part 1* Hamish MacCunn,2016-01-01 Britain, long revered for its choral music and partsongs, had largely neglected art songs since the Elizabethan era. The middle of the nineteenth century witnessed efforts to revive the genre, particularly in the works of Sir C. Hubert Parry and Sir Charles Villiers Stanford. The following generation, including the Scottish composer Hamish MacCunn (1868–1916), built on the foundations laid by Parry and Stanford and served as the bridge to the vocal music of Ralph Vaughan Williams, Sir Edward Elgar, Ivor Gurney, John Ireland, and ultimately Benjamin Britten. Though best known for his Scottish-influenced compositions, MacCunn composed over 100 songs that, free from national constraints, are some of the most refined and sophisticated examples of his music. Almost no modern editions of MacCunn's song exist, though many were published during the composer's lifetime. The current two-part edition presents the composer's 102 extant songs. Part 1 contains 53 individual songs; part 2 presents the songs that were first published as sets.

**Academic Capitalism and the New Economy** Sheila Slaughter,Gary Rhoades,2009-06-01 As colleges and universities become more entrepreneurial in a post-industrial economy, they focus on knowledge less as a public good than as a commodity to be capitalized on in profit-oriented activities. In *Academic Capitalism and the New Economy*, higher education scholars Sheila Slaughter and Gary Rhoades detail the aggressive engagement of U.S. higher education institutions in the knowledge-based economy and analyze the efforts of colleges and universities to develop, market, and sell

research products, educational services, and consumer goods in the private marketplace. Slaughter and Rhoades track changes in policy and practice, revealing new social networks and circuits of knowledge creation and dissemination, as well as new organizational structures and expanded managerial capacity to link higher education institutions and markets. They depict an ascendant academic capitalist knowledge/learning regime expressed in faculty work, departmental activity, and administrative behavior. Clarifying the regime's internal contradictions, they note the public subsidies embedded in new revenue streams and the shift in emphasis from serving student customers to leveraging resources from them. Defining the terms of academic capitalism in the new economy, this groundbreaking study offers essential insights into the trajectory of American higher education.
