Teardrop Lauren Kate,2013-10-22 An epic saga of heart-stopping romance, devastating secrets, and dark magic . . . a world where everything you love can be washed away. The first book in the new series from the #1 New York Times bestselling author of the Fallen series Never, ever cry. . . . Eureka Boudreaux's mother drilled that rule into her daughter years ago. But now her mother is gone, and everywhere Eureka goes he is there: Ander, the tall, pale blond boy who seems to know things he shouldn't, who tells Eureka she is in grave danger, who comes closer to making her cry than anyone has before. But Ander doesn't know Eureka's darkest secret: ever since her mother drowned in a freak accident, Eureka wishes she were dead, too. She has little left that she cares about, just her oldest friend, Brooks, and a strange inheritance—a locket, a letter, a mysterious stone, and an ancient book no one understands. The book contains a haunting tale about a girl who got her heart broken and cried an entire continent into the sea. Eureka is about to discover that the ancient tale is more than a story, that Ander might be telling the truth . . . and that her life has far darker undercurrents than she ever imagined.

Android Smartphones For Seniors For Dummies Marsha Collier,2021-10-25 The quickest and easiest way to outsmart your Android smartphone Android smartphones, like the Samsung Galaxy and Google Pixel models, offer great ways to simplify and enhance your life. The Ringtone Dialectic Sumanth Gopinath,2013-07-19 The rise and fall of the ringtone industry and its effect on mobile entertainment, music, television, film, and politics. A decade ago, the customizable ringtone was ubiquitous. Almost any crowd of cell phone owners could produce a carillon of tinkly, beeping, synthy, musicalized ringer signals. Ringtones quickly became a multi-billion-dollar global industry and almost as quickly faded away. In *The Ringtone Dialectic*, Sumanth Gopinath charts the rise and fall of the ringtone economy and assesses its effect on cultural production. Gopinath describes the technical and economic structure of the ringtone industry, considering the transformation of ringtones from monophonic, single-line synthesizer files to polyphonic MIDI files to digital sound files and the concomitant change in the nature of capital and rent accumulation within the industry. He discusses sociocultural practices that seemed to wane as a result of these shifts, including ringtone labor, certain forms of musical notation and representation, and the creation of musical and artistic works quoting ringtones. Gopinath examines “declines,” “reversals,” and “revivals” of cultural forms associated with the ringtone and its changes, including the Crazy Frog fad, the use of ringtones in political movements (as in the Philippine “Glorigate” scandal), the ringtone's narrative function in film and television (including its striking use in the films of the Chinese director Jia Zhangke), and the ringtone's relation to pop music (including possible race and class aspects of ringtone consumption). Finally, Gopinath considers the attempt to rebrand ringtones as “mobile music” and the emergence of cloud computing.

With a Little Help Cory Doctorow,2015-07-16 *With a Little Help* is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. *With a Little Help* consists of 12 stories, all reprints except for *Epoch* (commissioned by Mark Shuttleworth).

Reading Sounds Sean Zdenek,2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue, as one might assume at first, but consists largely of making rhetorical choices. For Sean Zdenek, when captioners describe a sound they are interpreting and creating contexts, they are assigning significance, they are creating meaning that doesn't necessarily exist in the soundtrack or the script. And in nine chapters he analyzes the numerous complex rhetorical choices captioners make, from abbreviating dialogue so it will fit on the screen and keep pace with the editing, to whether and how to describe background sounds, accents, or slurred speech, to nonlinguistic forms of sound communication such as sighing, screaming, or laughing, to describing music, captioned silences (as when a continuous noise suddenly stops), and sarcasm, surprise, and other forms of meaning associated with vocal tone. Throughout, he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing-impaired viewers. Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning, thereby better serve the needs of hearing-impaired viewers. The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet, where captioning can take on additional functions such as enhancing searchability. While scholarly work has been done on captioning from a legal perspective, from a historical perspective, and from a technical perspective, no one has ever done what Zdenek does here, and the original analytical models he offers are richly interdisciplinary, drawing on work from the fields of technical communication, rhetoric, media studies, and disability studies.
