*Daytona Beach Lifeguards* Patti Light, 2010-01-01 On May 22, 1931, the American National Red Cross issued its second charter for a life preserving organization to the Daytona Beach Red Cross Life Saving Corps. Composed of 30 young men aged 17 to 26 and trained in lifesaving and first aid, this volunteer corps protected 3 miles of beach, compiling daily records of the number of bathers, weather, first aid, and rescues. The neighboring communities of Ormond Beach and New Smyrna Beach maintained their own lifesaving units, and Volusia County monitored the remaining coastline. By 1972, these four corps had united, and the Volusia County Beach Patrol became one of the nation's most highly trained surf lifesaving rescue units. Protecting 47 continuous miles of Atlantic coastline, which holds the dubious honor of the shark bite capital of the world, the Volusia County Beach Patrol welcomes 10 million visitors and performs an average of 3,000 rescues annually.

Mary Mcleod Bethune in Florida Ashley N. Robertson,2015 Mary McLeod Bethune was often called the First Lady of Negro America, but she made significant contributions to the political climate of Florida as well. From the founding of the Daytona Literary and Industrial School for Training Negro Girls in 1904, Bethune galvanized African American women for change. She created an environment in Daytona Beach that, despite racial tension throughout the state, allowed Jackie Robinson to begin his journey to integrating Major League Baseball less than two miles away from her school. Today, her legacy lives through a number of institutions, including Bethune-Cookman University and the Mary McLeod Bethune Foundation National Historic Landmark. Historian Ashley Robertson explores the life, leadership and amazing contributions of this dynamic activist.

**Sharks and Their Relatives II** Jeffrey C. Carrier, John A. Musick, Michael R. Heithaus, 2010-03-09  
Since the award-winning first volume, *The Biology of Sharks and Their Relatives*, published in 2004, the field has witnessed tremendous developments in research, rapid advances in technology, and the emergence of new investigators beginning to explore issues of biodiversity, distribution, physiology, and ecology in ways that eluded more traditional studies. As an entirely new companion volume, *Sharks and Their Relatives II: Biodiversity, Adaptive Physiology, and Conservation* brings you up to speed on these significant changes, specifically examining how elasmobranch fishes – the sharks, skates, rays, and chimaeras – successfully survive in a wide range of habitats. Emphasizes Conservation of Threatened Species This multidisciplinary volume begins by examining elasmobranch biodiversity patterns and their integrated sensory systems. It then explores the physiological adaptations – from unique sensory modalities to compensatory mechanisms for physiological and environmental stress – that make these animals particularly well-suited for the range of habitats where they are found, in both oceanic and freshwater realms. Features Established Researchers and Introduces New Pioneers in the Field The book then considers the human interactions and anthropogenic effects on worldwide elasmobranch populations and the potential extinction risks posed by increasing threats from changes in habitat, changes in water chemistry, and growing commercial exploitation. This text truly is unrivaled in terms of coverage and readability, and it is a

must-have reference for marine biologists, fishery scientists, oceanographers, and also marine, zoo, and aquarium veterinarians. To address subject areas and subdisciplines where coverage was absent or superficial in volume one, Jeffrey Carrier and associates have assembled in the current volume a collection of works that reveal patterns of biodiversity, the physiological attributes that contribute to elasmobranchs' successful exploitation of oceanic and freshwater realms, and the unique issues associated with the interaction between elasmobranchs and humans, all of this with overarching attention to issues of conservation. We begin with chapters examining biodiversity. We have chosen to approach this discussion by presenting elasmobranchs as inhabitants of the range of zoogeographic provinces, realizing that significant overlap may occur for more pelagic species. This realization was reflected in the dialogue that occurred during preparation of the book between our chapter authors, and the recognition that many species simply cannot be confined to a specific habitat or range of habitats. We then continue by examining some of the unique physiological adaptations that allow these animals to exploit the range of habitats where they are found, from unique sensory modalities to compensatory mechanisms for physiological and environmental stress. Our concluding section presents some of the challenges faced by members of these groups. We have asked our authors to consider human interactions and anthropogenic effects on worldwide populations and the potential extinction risks posed from survival under increasing threats from changes in habitat, changes in water chemistry, and increasing commercial exploitation. Conservation of species under threat remains a theme throughout the book. Our authors represent an international group of investigators including established scientists whose work has been widely published and respected, and emerging younger scientists who have exploited recent advances in technology to ask and answer new questions as well as offering new insights and interpretations to enduring problems

in the fields of ecology and physiology. We have asked them to be speculative and challenging, and we have asked them to predict future areas for investigation in hopes that their work will both inspire and provoke additional studies of these fascinating animals. - from the Preface

**Volusia Voices** ,2015-12-15 VOLUSIA VOICES is an ambitious project to collect the stories that portray everyday Volusia County residents through both photography and first-person narratives. This is not the tale of movers and shakers, rather that of those on whose shoulders we stand. Gone is the era of handwritten letters and journals saved for future generations. The dynamic attributes of this county are seen in the faces and lives of her residents and come to life through their stories. From the beaches of the east to the ranches of the west; from the farmland of the south to the rich cultural sites of the north, VOLUSIA VOICES explores the county to seek Volusians who are extraordinary -- though they may not know it -- and show the rich diversity and character of this unique area. The goal of VOLUSIA VOICES is to preserve these stories and promote a sense of community through meeting Volusia County residents at work, home and play. Our stories make each of us great, and, by sharing them, we become richer in heart.
