Human Enhancement Drugs Katinka van de Ven, Kyle J. D. Mulrooney, Jim McVeigh, 2019-06-12
Despite increasing interest in the use of human enhancement drugs (HEDs), our understanding of this phenomenon and the regulatory framework used to address it has lagged behind. Encompassing public health, epidemiology, neuroethics, sport science, criminology, and sociology, this book brings together a broad spectrum of scholarly insights and research expertise from leading authorities to examine key international issues in the field of HEDs. As traditional and other new drug markets have occupied much of the academic attention, there has been a lack of scholarly focus on human enhancement drugs. This book provides readers with a much-needed understanding of the illicit drug market of HEDs. The authors, from a variety of cultural contexts, disciplines and perspectives, include both academics and practitioners. Topics explored in this collection amongst others include:

- The anti-doping industry and performance and image enhancing drugs
- Steroids and gender
- The use of cognitive enhancing drugs in academia
- The use of sunless synthetic tanning products
- The (online) trade of HEDs
- Regulations of the enhancement drugs market

This collection will serve as a reference for students, academics, practitioners, law enforcement and others working in this area to reflect on the current state of research and consider future priorities. This detailed exploration will provide a valuable knowledge base for those interested in human enhancement drugs, while also promoting critical discussion.

Opium and the People Virginia Berridge, Griffith Edwards, 1981 At the beginning of the 19th century, opium was widely used as an everyday remedy for common ailments. By the 1920s, it was classified as a dangerous drug. In an examination of the social context of drug taking in Victorian England, the book explains this decisive change in attitude. This revised edition examines how and why restrictive policies were put in place in the early decades of the 20th century and reveals fresh perspectives on the motivations which survive in the formation of current drug policies.

The Desert Michael Welland, 2014-09-15 From endless sand dunes and prickly cacti to shimmering mirages and green oases, deserts evoke contradictory images in us. They are lands of desolation, but also of romance, of blistering Mojave heat and biting Gobi cold. Covering a quarter of the earth's land mass and providing a home to half a billion people, they are both a physical reality and landscapes of the mind. The idea of the desert has long captured Western imagination, put on display in films and literature, but these portrayals often fail to capture the true scope and diversity of the people living there. Bridging the scientific and cultural gaps between perception and reality, *The Desert* celebrates our fascination with these arid lands and their inhabitants, as well as their importance both throughout history and in the world today. Covering an immense geographical range, Michael Welland wanders from the Sahara to the Atacama, depicting the often bizarre adaptations of plants and animals to these hostile environments. He also looks at these seemingly infertile landscapes in the context of their place in history—as the birthplaces not only of critical evolutionary adaptations, civilizations, and social progress, but also of ideologies. Telling the stories of the diverse peoples who call the desert home, he describes how people have survived there, their contributions to agricultural development, and their emphasis on water and its scarcity. He also delves into the allure of deserts and how they have been used in literature and film and their influence on fashion, art, and architecture. As Welland reveals, deserts may be difficult to define, but they play an active role in the evolution of our global climate and society at large, and their future is of the utmost importance. Entertaining, informative, and surprising, *The Desert* is an intriguing new look at these seemingly harsh and inhospitable landscapes.
