Intelligent Computing Kohei Arai, 2022-07-06 The book, "Intelligent Computing - Proceedings of the 2022 Computing Conference", is a comprehensive collection of chapters focusing on the core areas of computing and their further applications in the real world. Each chapter is a paper presented at the Computing Conference 2022 held on July 14-15, 2022. Computing 2022 attracted a total of 498 submissions which underwent a double-blind peer-review process. Of those 498 submissions, 179 submissions have been selected to be included in this book. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable as it provides the state-of-the-art intelligent methods and techniques for solving real-world problems. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

Precision Agriculture for Grain Production Systems Brett Whelan,James Taylor,2013-04-10
Precision Agriculture (PA) is an approach to managing the variability in production agriculture in a more economic and environmentally efficient manner. It has been pioneered as a management tool in the grains industry, and while its development and uptake continues to grow amongst grain farmers worldwide, a broad range of other cropping industries have embraced the concept. This book explains general PA theory, identifies and describes essential tools and techniques, and includes practical examples from the grains industry. Readers will gain an understanding of the magnitude, spatial scale and seasonality of measurable variability in soil attributes, plant growth and environmental conditions. They will be introduced to the role of sensing systems in measuring crop, soil and environment variability, and discover how this variability may have a significant impact on crop production systems. Precision Agriculture for Grain Production Systems will empower crop and soil science students, agronomy and agricultural engineering students, as well as agronomic advisors and farmers to critically analyse the impact of observed variation in resources on crop production and management decisions.

'Arme Rijke Taal' Audiovisual Translation and Minority Language Planning in Pluricentric Language Areas Reglindis De Ridder, 2015 This doctoral dissertation explores the language-planning role of audiovisual translation through a case study of Flemish public service broadcasting (VRT). VRT has since its establishment been a significant language-planning agent for the Dutch language in Belgium. Areas, like Belgium, where a smaller or minority language is spoken, generally rely more on translation activity than major language areas do. The written standard, therefore, is disseminated to a significant extent through translated texts rather than original texts. Subtitles in many such language areas have become significant disseminators of the written standard and can be an underestimated language-planning tool. This dissertation investigates the use of marked Belgian Dutch lexis in VRT television subtitles over a fifteen year period, and compares it to the common practice in both original and translated literary texts. The Dutch written standard, shared by Belgium, and the Netherlands in Europe, is still exclusively Netherlandic. VRT's general language policy, since the late 1990s, has gradually become more open to the use of the Belgian national variety. By means of a diachronic analysis of a representative

corpus of television subtitles, the extent to which this Belgian variety has recently been used specifically in subtitles (a written text type) is investigated. If VRT increasingly includes Belgian Dutch words and phrases in its subtitles, this practice could provide a counterbalance to the ongoing purist approach of the transnational Dutch publishing industry. This could mean that VRT, through its subtitles, is now contributing to the development of a richer, more inclusive Dutch written standard, reflecting the diversity of Dutch with all its national varieties (Netherlandic, Belgian, Surinam, and Caribbean Dutch). This research yields original data in relation to the use and dissemination of Belgian Dutch variants in Belgium, and in doing so illustrates the language planning scope and effects of audiovisual media and subtitles, in general.

Open Source Geospatial Tools Daniel McInerney, Pieter Kempeneers, 2014-11-22 This book focuses on the use of open source software for geospatial analysis. It demonstrates the effectiveness of the command line interface for handling both vector, raster and 3D geospatial data. Appropriate open-source tools for data

processing are clearly explained and discusses how they can be used to solve everyday tasks. A series of fully worked case studies are presented including vector spatial analysis, remote sensing data analysis, landcover classification and LiDAR processing. A hands-on introduction to the application programming interface (API) of GDAL/OGR in Python/C++ is provided for readers who want to extend existing tools and/or develop their own software.

Representations of Islam in the News Stefan Mertens,Hedwig de Smaele,2016-04-15 The representation of Islam is unquestionably a critical test for comparing journalistic reporting across countries and cultures. The Islamic religion has weight in international reporting (defining what we termed "foreign Islam"), but it is also the religion of numerically important minority groups residing in Europe ("national Islam"). The first part of the book is "setting the scene." Three chapters provide insights in dominant patterns of the representation of Islam as detected by various authors and studies involved with Islam representation in Europe. Part two, the core section of the book, contributes to

the development of the field of comparative journalism studies by comparing several countries and six media systems in Western Europe: the Dutch-speaking part of Belgium (Flanders), the French-speaking part of Belgium (Wallonia), the Netherlands, France, Germany, and the U.K. Part three of this book presents two reception studies, one qualitative and the other quantitative. Equally important, as the bulk of attention goes to Western Europe, is the extension towards the representation of Muslims and Islam outside Western Europe. Part four of the book is devoted to the representation of Islam in some of the so-called BRICs-countries: Russia, China, and India.

Forensic Science Advances and Their Application in the Judiciary System Danielle Sapse, Lawrence Kobilinsky, 2011-08-01 This volume examines how new cutting edge forensic techniques are currently being applied or have the potential to be applied in judicial proceedings. Examples include new applications of Raman spectroscopy, quantum chemistry, lithium in DNA analysis, and the burgeoning area of toxicogenetics. In each case legal issues are addressed, including the such as admissibility of evidence resulting from these techniques. A comparison between the American Judiciary system and the European system is included. Contributors offer their expertise from scientific and legal perspectives.

Limiting Global Warming to Well Below 2 °C:

Energy System Modelling and Policy Development

George Giannakidis, Kenneth Karlsson, Maryse

Labriet, B. Ó Gallachóir, 2018-03-31 This book presents the energy system roadmaps necessary to limit global temperature increase to below 2°C, in order to avoid the catastrophic impacts of climate change. It provides a unique perspective on and critical understanding of the feasibility of a well-below-2°C world by exploring energy system pathways, technology innovations, behaviour change and the macro-economic impacts of achieving carbon neutrality by mid-century. The transformative changes in the energy transition are explored using energy systems models and scenario analyses that are applied to various cities, countries and at a global scale to offer scientific evidence to underpin complex policy decisions relating to climate change mitigation and interrelated issues like energy security and the energy–water nexus. It includes several chapters directly related to the Nationally Determined Contributions proposed in the context of the recent Paris Agreement on Climate Change. In summary, the book collates a range of concrete analyses at different scales from around the globe, revisiting the roles of countries, cities and local communities in pathways to significantly reduce greenhouse gas emissions and make a well-below-2°C world a reality. A valuable source of information for energy modellers in both the industry and public sectors, it provides a critical understanding of both the feasibility of roadmaps to achieve a well-below-2°C world, and the diversity and wide applications of energy systems models.

Encompassing behaviour changes; technology innovations; macro-economic impacts; and other environmental challenges, such as water, it is also of interest to energy economists and engineers, as well as economic modellers working in the field of climate change mitigation.

Vrt Analyser: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed.

Vrt Analyser : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Vrt Analyser : Delia Owens "Where the Crawdads Sing" This mesmerizing

coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you guessing

until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
