Obamacare Wars Daniel Béland, Philip Rocco, Alex Waddan, 2023-02-10 Not five minutes after the Affordable Care Act (ACA) was signed into law, in March 2010, Virginia's attorney general was suing to stop it. And yet, the ACA rolled out, in infamously bumpy fashion, and rolled on, fought and defended at every turn—despite President Obama's claim, in 2014, that its proponents and opponents could finally “stop fighting old political battles that keep us gridlocked.” But not only would the battles not stop, as *Obamacare Wars* makes acutely clear, they spread from Washington, DC, to a variety of new arenas. The first thorough account of the implementation of the ACA, this book reveals the fissures the act exposed in the American federal system. *Obamacare Wars* shows how the law's intergovernmental structure, which entails the participation of both the federal government and the states, has deeply shaped the politics of implementation. Focusing on the creation of insurance exchanges, the expansion of Medicaid, and execution of regulatory reforms, Daniel Béland, Philip Rocco, and Alex Waddan examine how opponents of the ACA fought back against its implementation. They also explain why opponents of the law were successful in some efforts and not in others—and not necessarily in a seemingly predictable red vs. blue pattern. Their work identifies the role of policy legacies, institutional fragmentation, and public sentiments in each instance as states grappled with new institutions, as in the case of the exchanges, or existing structures, in Medicaid and regulatory reform. Looking broadly at national trends and specifically at the experience of individual states, *Obamacare Wars* brings much-needed clarity to highly controversial but little-understood aspects of the Affordable Care Act's odyssey, with implications for how we

understand the future trajectory of health reform, as well as the multiple forms of federalism in American politics.

The politics of heritage regeneration in South-East Europe Bold, John, Cherry, Martin, 2016-05-24 Recent developments in cultural heritage policy and practice in South-East Europe. Since 2003, the Council of Europe–European Commission joint initiative known as the “Ljubljana Process: rehabilitating our common heritage” has set out to unlock the potential of the region’s rich immovable cultural heritage, working with national authorities to accelerate the development of democratic, peaceful and open societies, stimulate local economies and improve the quality of life of local communities. In 2003, the region was overcoming the effects of the traumatic transition to a market economy. Since then, it has been hit hard by the economic crisis of 2008, and more recently by an unprecedented migration crisis. Despite the challenges facing the region in the field of cultural heritage, the present situation can be seen as an opportunity to use the lessons learned from the Ljubljana Process to avoid the traps laid by the cumulative and sometimes inconsistent heritage-protection legislation of the past 60 years, overcoming the legacy of the top-down approach that privileges the “high art” canon rather than the local heritage that reflects the culture of everyday life and which often means more to most people. The authors suggest that selecting from innovative practice elsewhere could make heritage management smarter so that it more directly meets the needs of modern society and individual citizens.

This volume reflects the views of international experts involved in the joint initiative and complements earlier studies on the impact of the Ljubljana Process by experts from within the region (Heritage for development in South-East Europe, edited by Gojko Rikolović and Hristina Mikić, 2014) and from the London School of Economics and Political Science (The wider benefits of investment in cultural heritage. Case studies in Bosnia and Herzegovina and Serbia, edited by Will Bartlett, 2015).

Yearbook of the United Nations 2014 United Nations, 2019-10-28 With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and administrative and budgetary matters, the Yearbook of the United Nations stands as the authoritative reference work on the annual activities and concerns of the Organization. Fully indexed, the Yearbook includes all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, uniquely placing them in a narrative context of United Nations consideration, deliberation and action. This sixty-eighth volume presents the work of the United Nations in dealing with recurring conflicts with severe humanitarian consequences including in the Syrian Arab Republic, where more than 12 million people were in need of basic food, clothing and shelter. The volume also highlights the Organization's rapid response to an escalatory global health emergency—the Ebola virus disease outbreak across West Africa. It documents the Organization's coordination of policy discussions to finalize a global sustainable development agenda, with the security of future generations as the core concern; and its efforts to rebuild societies emerging from conflict while keeping the fragile peace in other places. It further details the entry into force of the landmark Arms Trade Treaty, the missile downing of a passenger airliner in the midst of a geopolitical crisis in eastern Ukraine, and securing international human rights and humanitarian law and prosecuting abusers.

Ion Exchange and Solvent Extraction Arup K. Sengupta, 2017-07-12 Since the Second World War, the field of ion exchange has taken a dominant role in offering solutions to many problems in the developed and developing world. It has evolved to a wide array of applications, including mining, microelectronics, drug delivery and detection, food, fertilizers, chemical cleaning, catalysis, bioseparation, water management, environmental research and practices, and energy. The six chapters in this book represent diverse contributions from researchers around the globe who are making noticeable strides in the

field in currently important areas: Brackish water desalination Removing boron from water Sustainable approaches for synthesizing commercially important epoxide building blocks Solid-phase heavy-metal separation Separating concentrated ion mixtures in sorption columns Sensing toxic metals Ion Exchange and Solvent Extraction: A Series of Advances, Volume 22 provides a focused review of new materials and new processes that have developed and are rapidly growing. It describes cutting-edge research and practices in the use of ion exchange for building a cleaner, sustainable world and provides thoughtful insights on what ion exchange may do for us in the future.

Molten Salt Reactors and Thorium Energy Thomas James Dolan, 2017-06-08 Molten Salt Reactors is a comprehensive reference on the status of molten salt reactor (MSR) research and thorium fuel utilization. There is growing awareness that nuclear energy is needed to complement intermittent energy sources and to avoid pollution from fossil fuels. Light water reactors are complex, expensive, and vulnerable to core melt, steam explosions, and hydrogen explosions, so better technology is needed. MSRs could operate safely at nearly atmospheric pressure and high temperature, yielding efficient electrical power generation, desalination, actinide incineration, hydrogen production, and other industrial heat applications. Coverage includes: Motivation -- why are we interested? Technical issues -- reactor physics, thermal hydraulics, materials, environment, ... Generic designs -- thermal, fast, solid fuel, liquid fuel, ... Specific designs -- aimed at electrical power, actinide incineration, thorium utilization, ... Worldwide activities in 23 countries Conclusions This book is a collaboration of 58 authors from 23 countries, written in cooperation with the International Thorium Molten Salt Forum. It can serve as a reference for engineers and

scientists, and it can be used as a textbook for graduate students and advanced undergrads. Molten Salt Reactors is the only complete review of the technology currently available, making this an essential text for anyone reviewing the use of MSRs and thorium fuel, including students, nuclear researchers, industrial engineers, and policy makers. Written in cooperation with the International Thorium Molten-Salt Forum Covers MSR-specific issues, various reactor designs, and discusses issues such as the environmental impact, non-proliferation, and licensing Includes case studies and examples from experts across the globe

The Report: Trinidad & Tobago 2015 Oxford Business Group, 2015-08-03 Despite its small size, Trinidad and Tobago ranks highly on a number of economic development indicators. According to estimates by the IMF, per capita income in T&T was \$21,310 in 2014, the third-highest level in the Americas, after the US and Canada. Meanwhile, the World Bank categorises T&T as a high-income, non-OECD nation, while the World Economic Forum (WEF), in its reports on global competitiveness, sees T&T as an innovation-driven economy, like the US or the UK.

Where the Past meets the Future Leah Cheung Ah Li, 2018-09 Xi'an, the former Chang'an - home to the terracotta army and capital to 13 dynasties of Chinese emperors - experienced World Heritage fame in 1987 when the Mausoleum of the First Qin Emperor was listed. In 2014, five more heritage sites in Xi'an were listed as part of the Silk Roads World Heritage nomination. The ancient capital represents glorious moments of Chinese history and local citizens are proud of Xi'an's archaeological and historical status. However, the modern cityscape is as much shaped by high rises as by historical buildings and heritage policies intersect with demands for urbanization, modernization,

and economic growth. This book seeks to understand how modernity, history, and heritage are reconciled in this city where the past meets the future.

National and Regional Parliaments in the EU-Legislative Procedure Post-Lisbon Anna Jonsson Cornell, Marco Goldoni, 2017-01-12 Much has changed in European constitutional law after the Lisbon Treaty, not least the efforts to increase democratic legitimacy by engaging national legislatures and introducing a stricter subsidiary review process, namely the Early Warning Mechanism (EWM). This collection looks at how national parliaments have adapted to their new roles and looks at how the new system has impacted on relations between the EU legislative bodies and national parliaments. A team of experts from across Europe explore the effect of the EWM on the national constitutional orders; analyse the regional impact of EWM and evaluate the new system of scrutiny.
