Unlocking Galatians Again Clarence Reyneveld,2008-10 Unlocking Galatians Again is a verse-by-verse journey through Galatians. Like an underground cavern it has impressive chambers. Some hidden chambers will need to be opened and explored. Like the sun, St. Paul's epistle to the Galatians shines forth with light. During Luther's time it pierced the darkness. History shows us that when its light grows dim, God's people become like a wilted flower. When its light grows bright, we become like a thriving plant. It teaches us how to walk by faith by telling us where to focus our faith. Translation decisions can sometimes hinder some of its light from shining. For the Christian, a fresh discovery of Galatians can cause a burst of renewal. For the Pastor, it may change the way we preach and care for the spiritual needs of others. Walk with Luther through this cavern. You will discover spiritually impressive sights which he experienced while traveling through Galatians. After being ordained in 1987, Chaplain Clarence Reyneveld served as a Pastor in Illinois, Michigan, and Washington State. Since 1999 he has been involved in a television ministry, producing and presenting Bible Study programs which are aired in many homes mainly in Michigan. His unique blend of training and spiritual involvement gives him important qualifications to write this book.

Black Sun Geoffrey Wolff,2003-08-31 Includes an afterword by the author Harry Crosby was the godson of J. P. Morgan and a friend of Ernest Hemingway. Living in Paris in the twenties and directing the Black Sun Press, which published James Joyce among others, Crosby was at the center of the wild life of the lost generation. Drugs, drink, sex, gambling, the deliberate derangement of the senses in the pursuit of transcendent revelation: these were Crosby's pastimes until 1929, when he shot his girlfriend, the recent bride of another man, and then himself. Black Sun is novelist and master biographer Geoffrey Wolff's subtle and striking picture of a man who killed himself to make his life a work of art.

Off Center Masao Miyoshi,1991 In this provocative study, Miyoshi deliberately adopts an off-center perspective--one that restores the historical asymmetry of encounters between Japan and the United States, from Commodore Perry to Douglas MacArthur--to investigate the blindness that has characterized relations between the two cultures.

Colonial and Postcolonial Discourse in the Novels of Yŏm Sang-sŏp, Chinua Achebe, and Salman Rushdie Sun-sik Kim,2004 This book discusses the psychological topography of Korean, Nigerian, and Indian people by exploring the counter-colonial discourse through the study of works by three writers - Yom Sang-Sop, Chinua Achebe and Salman Rushdie - counter-colonial discourse in the works of these three writers strikes back at powerful colonial discourses, Soonsik Kim successfully brings out the Third World «voice» against the colonial legacy of the West and gives readers a taste of being «the Other». This book marks a significant transition in the critical attention of Third World discourse from mere projection to subjective viewpoint.

History Made, History Imagined David Walter Price,1999 In this provocative and original study, David Price investigates history as a form of poiesis -- the act of making in language -- and suggests that certain novels can provide the best means of engaging in historical interpretation. Contending that the fundamental act of narration itself, including the narration of history, expresses a system of values, Price explores the work of seven contemporary novelists who share a commitment to reexamining history as idea and a refusal to accept history as given. Within a theoretical framework based on Friedrich Nietzsche and Giambattista Vico, Price investigates how these writers -- Carlos Fuentes, Susan Daitch, Salman Rushdie, Michel Tournier, Ishmael Reed, Graham Swift, and Mario Vargas Llosa -- create a discursive space between history and literature, a space within which history can be questioned and the making of history explored. Through their novels, these writers replace the univocal expression of history as a description of what really happened with a polyvocality of competing discourses, languages, and points of view. Price's investigation of three modalities of the poietic novel -- the history of forgotten possibilities, the construction of countermemory and cultural critique, and history as myth -- has far-reaching implications for how we read and question the narratives we understand as history. By treating the past as a dynamic flow of values, rather than a fixed collection of facts, History Made, History Imagined fosters a deeper understanding not only of literature and philosophy but also of history and our relationship to it.

Energy Economics: A Modern Introduction Ferdinand E. Banks,2012-12-06 Energy is the go of things, as James Clerk Maxwell pointed out. This th simple truth was largely overlooked during the first 70 years of the 20 century, because in the industrial world most politicians, civil servants, and opinion makers were inclined to believe that virtually an infinite supply of reasonably priced energy would always be available, and so things would continue to 'go' in the manner to which many of their constituents and admirers had become accustomed. Similar opinions were held about fresh air, and water for consumption and agricultural uses. As a result, it was not until the last two decades of the century that serious courses in energy and environmental economics began to be offered at institutions of higher learning around the world. This book is intended as a comprehensive introductory text and/or reference book for courses of this nature having to do with energy economics. (I have also attempted to make the book useful for self study.) As far as I know, there are no energy economics text or reference books on the level of this book in the English language. Needless to say, if I am wrong then I apologise to their authors; but right or wrong, I would like to see more energy economics books of all descriptions now. We cannot afford to have the same kind of mistakes made with energy policy that (in much of the world) are being made with e. g. employment policy.
