### **Transforming Acquisitions and Collection Services** Michelle

Flinchbaugh, Chuck Thomas, Rob Tench, 2019-09-15 This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

*Working Knowledge* Thomas H. Davenport, Laurence Prusak, 2000-04-26 This influential book establishes the enduring vocabulary and concepts in the burgeoning field of knowledge management. It serves as the hands-on resource of choice for companies that recognize knowledge as the only sustainable source of competitive advantage going forward. Drawing from their work with more than thirty knowledge-rich firms, Davenport and Prusak--experienced consultants with a track record of success--examine how all types of companies can effectively understand, analyze, measure, and manage their intellectual assets, turning corporate wisdom into market value. They categorize knowledge work into four sequential activities--accessing, generating, embedding, and transferring--and look at the key skills, techniques, and processes of each. While they present a practical approach to cataloging and storing knowledge so that employees can easily leverage it throughout the firm, the authors caution readers on the limits of communications and information technology in managing intellectual capital.

*Increasing National Resilience to Hazards and Disasters* The National Academies, Disasters Roundtable, Committee on Science, Engineering, and Public Policy, Committee on Increasing National Resilience to Hazards and Disasters, 2011-09-26 Natural disasters are having an increasing effect on the lives of people in the United States and throughout the world. Every decade, property damage caused by natural disasters and hazards doubles or triples in the United States. More than half of the U.S. population lives within 50 miles of a coast, and all Americans are at risk from such hazards as fires, earthquakes, floods, and wind. The year 2010 saw 950 natural catastrophes around the world--the second highest annual total ever--with overall losses estimated at \$130 billion. The increasing impact of natural disasters and hazards points to increasing importance of resilience, the ability to prepare and plan for, absorb, recover from, or more successfully adapt to actual or potential adverse events, at the individual, local, state, national, and global levels. *Assessing National Resilience to Hazards and Disasters* reviews the effects of Hurricane Katrina and other natural and human-induced disasters on the Gulf Coast of Louisiana and Mississippi and to learn more

about the resilience of those areas to future disasters. Topics explored in the workshop range from insurance, building codes, and critical infrastructure to private-sector issues, public health, nongovernmental organizations and governance. This workshop summary provides a rich foundation of information to help increase the nation's resilience through actionable recommendations and guidance on the best approaches to reduce adverse impacts from hazards and disasters.

**Human Communication** Sherwyn P. Morreale, Brian H. Spitzberg, J. Kevin Barge, 2001 This book offers a unique and unified approach to competence and the basic processes of human communication backed by skill assessment. Beginning with the premise that all forms of communication have the potential to be viewed as competent depending on the context or situation, the text helps readers develop a framework for choosing among communication messages that will allow them to act competently. The theoretically-based and skills-oriented framework emphasizes the basic themes of motivation, knowledge and skills across interpersonal communication, electronically mediated communication, small group communication, and public speaking.

**Belgian Exceptionalism** Didier Caluwaerts, Min Reuchamps, 2021-11-24 This book takes stock of Belgium's exceptional and - for some foreign observers - schizophrenic position in the political world and explains its idiosyncrasy to a non-Belgian audience. Offering a broad and comprehensive analysis of Belgian politics, the guiding questions throughout each of the chapters of this book are: Is Belgium a political enigma, and why? Along which axes is Belgium exceptional compared to other countries? And what insights does a comparative study of Belgian politics have to offer? The book therefore provides a critical assessment of how Belgian politics stands out internationally, both in good and bad ways - including consociationalism, federalism, democratic innovations, Euroscepticism, government formation, gender equality, among others - and which factors can explain Belgium's exceptional position. Based on cutting-edge research findings, the book will be of wide interest to scholars and students of Belgian politics, European Politics and Comparative politics. **Musical Sense-Making** Mark Reybrouck, 2020-11-29 Musical Sense-Making: Enaction, Experience, and Computation broadens the scope of musical sense-making from a disembodied cognitivist approach to an experiential approach. Revolving around the definition of music as a temporal and sounding art, it argues for an interactional and experiential approach that brings together the richness of sensory experience and principles of cognitive economy. Starting from the major distinction between in-time and outside-of-time processing of the sounds, this volume provides a conceptual and operational framework for dealing with sounds in a real-time listening situation, relying heavily on the theoretical groundings of ecology, cybernetics, and systems theory, and stressing the role of epistemic interactions with the sounds. These interactions are considered from different perspectives, bringing together insights from previous theoretical groundings and more recent empirical research. The author's findings are framed within the context of the broader field of enactive and embodied cognition, recent action and perception studies, and the emerging field of neurophenomenology and

dynamical systems theory. This volume will particularly appeal to scholars and researchers interested in the intersection between music, philosophy, and/or psychology.

**Headquarters and Subsidiaries in Multinational Corporations S.**

Johnston, 2005-07-31 In the global business environment, new organizational forms come and go but in today's multinational corporations the headquarters-subsidiary link remains the primary channel by which the firm is managed. It facilitates strategy, control and coordination, and smoothes the progress of inter-unit product, personnel, factor and knowledge flows of every kind. Using data from CEOs of a large sample of Australian subsidiaries of foreign firms, this book brings new insights into the nature of this vital corporate relationship.

*Ritual in Deuteronomy* Melissa D. Ramos, 2021-04-20 Ritual in Deuteronomy explores the symbolic world of Deuteronomy's ritual covenant and curses through a lens of religious studies and anthropology, drawing on previously unexamined Mesopotamian material. This book focuses on the ritual material in Deuteronomy including commands regarding sacrifice, prayer objects, and especially the dramatic ritual enactment of the covenant including curses. The book's most unique feature is an entirely new comparative study of Deut 27-30 with two ritual texts from Mesopotamia. No studies to date have undertaken a comparison of Deut 27-30 with ancient Near Eastern ritual texts outside of the treaty oath tradition. This fresh comparison illuminates how the ritual life of ancient Israel shaped the literary form of Deuteronomy and concludes that the performance of oaths was a social strategy, addressing contemporary anxieties and reinforcing systems of cultural power. This book offers a fascinating comparative study which will be of interest to undergraduate and graduate students in biblical studies, classical Hebrew, theology, and ancient Near Eastern studies. The book's more technical aspects will also appeal to scholars of the Pentateuch, Deuteronomy, Biblical Law, Ancient Near Eastern History, Mesopotamian Studies, and Classics.

**Self-Determined Learning** Stewart Hase, Chris Kenyon, 2013-09-26 Heutagogy, or

self-determined learning, redefines how we understand learning and provides some exciting opportunities for educators. It is a novel approach to educational practice, drawing on familiar concepts such as constructivism, capability, andragogy and complexity theory. Heutagogy is also supported by a substantial and growing body of neuroscience research. Self-Determined Learning explores how heutagogy was derived, and what this approach to learning involves, drawing on recent research and practical applications. The editors draw together contributions from educators and practitioners in different fields, illustrating how the approach can be used and the benefits its use has produced. The subjects discussed include: the nature of learning, heutagogy in the classroom, flexible curriculum, assessment, e-learning, reflective learning, action learning and research, and heutagogy in professional practice settings.

**Europeanisation in Teacher Education** Vasileios Symeonidis, 2020-11-26 This book explores the phenomenon and process of Europeanisation in the field of teacher education. Drawing on comparative case studies in Austria, Greece and Hungary, it examines empirical data and analyses key themes around the continuum of teacher education, the development of teacher competence frameworks, and the support to teacher educators. The book is the first of its kind to systematically research the landscape of European teacher education, exploring the interactions between national and European influences in the trajectory of teacher education policy and practice. Chapters offer an original and in-depth understanding of European influences that draw on evidence from policy documents and interviews with relevant stakeholders. It argues that teacher education systems are being Europeanised, although at different speeds and directions for each country. Factors such as the socio-political and economic contexts, historical traits and policy actors' preferences at both national and institutional levels determine the translation process. This book will be of great interest for academics, educational researchers, practitioners and policymakers in Europe and beyond, informing wider discussions about the emerging European context in teacher education, education policy and what it means to be a European teacher.
