**Sound, Space and Sociality in Modern Japan** Joseph D.

Hankins, Carolyn S. Stevens, 2013-12-04 This book argues that sound – as it is created, transmitted, and perceived – plays a key role in the constitution of space and community in contemporary Japan. The book examines how sonic practices reflect politics, aesthetics, and ethics, with transformative effects on human relations. From right-wing sound trucks to left-wing protests, from early 20th century jazz cafes to contemporary avant-garde art forms, from the sounds of U.S. military presence to exuberant performances organized in opposition, the book, rich in ethnographic detail, contributes to sensory anthropology and the anthropology of contemporary Japan.

**Wild Religion** David Chidester, 2012-04-23 Wild Religion is a

wild ride through recent South African history from the advent of democracy in 1994 to the euphoria of the football World Cup in 2010. In the context of South Africa's political journey and religious diversity, David Chidester explores African indigenous religious heritage with a difference. As the spiritual dimension of an African Renaissance, indigenous religion has been recovered in South Africa as a national resource. Wild Religion analyzes indigenous rituals of purification on Robben Island, rituals of healing and reconciliation at the new national shrine, Freedom Park, and rituals of animal sacrifice at the World Cup. Not always in the national interest, indigenous religion also appears in the wild religious creativity of prison gangs, the global spirituality of neo-shamans, the ceremonial display of Zulu virgins, the ancient Egyptian theosophy in South Africa's Parliament, and the new traditionalism of South Africa's President Jacob Zuma. Arguing that the sacred is produced through the religious work of intensive interpretation, formal ritualization, and intense contestation, Chidester develops innovative insights for understanding the meaning and power of religion in a changing society. For anyone interested in religion, Wild Religion uncovers surprising dynamics

of sacred space, violence, fundamentalism, heritage, media, sex, sovereignty, and the political economy of the sacred.

**Bafana Republic and Other Satires** Mike van

Graan, 2020-06-01 This collection of satirical sketches takes readers on a sometimes cynical, sometimes hilarious trip through many of the issues that face democratic South Africa. The seed of this collection was sown in 2007 when South Africa won the right to host the 2010 FIFA World Cup. The debate about huge amounts of public funds being spent on a 'vanity project' instead of being used to improve the lives of the majority of the country's citizens inspired Mike van Graan, one of South Africa's leading contemporary political playwrights, to use sport as an entry point for satirical commentary. Van Graan follows this with piercing attention towards matters of the state. With themes ranging from the World Cup to the political football of land, from the violent abuse of women to state capture, this selection of satirical sketches takes readers on a rollercoaster trip through many of the issues that face democratic South Africa. The sketches come from six one-person revues, *Bafana Republic* (2007), *Bafana Republic: Extra Time* (2008), *Bafana Republic: Penalty Shootout* (2009), *Pay Back the Curry* (2016), *State Fracture* (2017) and *Land Acts* (2018). Van Graan uses a potent mix of comedy, poetry and drama to make points that hit hard at core issues which 21st-century South Africans are struggling with. Readers will laugh and cringe and sometimes cry, but one thing they will not be able to do is remain unaffected.

**Sound and Noise** Marcia Jenneth Epstein, 2020-10-30 This

book is about how you listen and what you hear, about how to have a dialogue with the sounds around you. Marcia Jenneth Epstein gives readers the impetus and the tools to understand the sounds and noise that define their daily lives in this groundbreaking interdisciplinary study of how auditory stimuli impact both individuals and communities. Epstein employs scientific and sociological perspectives to examine noise in

multiple contexts: as a threat to health and peace of mind, as a motivator for social cohesion, as a potent form of communication and expression of power. She draws on a massive base of specialist literature from fields as diverse as nursing and neuroscience, sociology and sound studies, acoustic ecology and urban planning, engineering, anthropology, and musicology, among others, synthesizing and explaining these findings to evaluate the ubiquitous effects of sound in everyday life. Epstein investigates speech and music as well as noise and explores their physical and cultural dimensions. Ultimately she argues for an engaged public dialogue on sound, built on a shared foundation of critical listening, and provides the understanding for all of us to speak and be heard in such a discussion. *Sound and Noise* is a timely evaluation of the noise that surrounds us, how we hear it, and what we can do about it.

**Vuvuzela Dawn** Luke Alfred, Ian Hawkey, 2019-04-01 In 2019, South Africa celebrates 25 years of democracy and the freedom that turned the country from a political pariah to one warmly embraced by the world. Nowhere was the welcome more visible, or more emotional, than in sport. *Vuvuzela Dawn* tells the stories of that return. From Bafana Bafana's Africa Cup of Nations win to the fabled '438' Proteas game, we go behind the scenes of the great moments and record-breaking triumphs from 1994 to the present. From Caster Semenya and Wayde van Niekerk to Benni McCarthy and Kevin Anderson, from twin World Cup rugby victories to the traumas of Kamp Staaldraad and Hansie Cronjé, *Vuvuzela Dawn* reveals the sporting dramas and passions that defined a quarter century.

Heritage Formation and the Senses in Post-apartheid South Africa Duane Jethro, 2019 In this innovative book, Duane Jethro creates a framework for understanding the role of the senses in processes of heritage making. He shows how the senses were important for crafting and successfully deploying new, nation-building heritage projects in South Africa during the post-apartheid

period. The book highlights how heritage dynamics are entangled in evocative, changing sensory worlds. *Heritage Formation and the Senses in Post-Apartheid South Africa* features five case studies that correlate with the five main Western senses. Examples include touch and the ruination of a series of art memorials; how vision was mobilised to assert the authority of the state sponsored Freedom Park project in Pretoria; how small memories of apartheid era social life in Cape Town informed contemporary struggles for belonging after forced removal; how taste informed debates about the attempted rebranding of Heritage Day as barbecue day; and how the sound of the vuvuzela, popularised during the FIFA 2010 Football World Cup, helped legitimise its unofficial African and South African heritage status. This book makes a valuable contribution to the field of sensory studies and, with its focus on aesthetics and material culture, is in synch with the broader material turn in the humanities. This is important reading for students and scholars of anthropology, sociology, sensory studies, and transnational studies.

*In Pursuit of the Unknown* Ian Stewart, 2012-03-13 The seventeen equations that form the basis for life as we know it. Most people are familiar with history's great equations: Newton's Law of Gravity, for instance, or Einstein's theory of relativity. But the way these mathematical breakthroughs have contributed to human progress is seldom appreciated. In *In Pursuit of the Unknown*, celebrated mathematician Ian Stewart untangles the roots of our most important mathematical statements to show that equations have long been a driving force behind nearly every aspect of our lives. Using seventeen of our most crucial equations -- including the Wave Equation that allowed engineers to measure a building's response to earthquakes, saving countless lives, and the Black-Scholes model, used by bankers to track the price of financial derivatives over time -- Stewart illustrates that many of the advances we now take for granted were made possible by mathematical discoveries. An approachable, lively, and

informative guide to the mathematical building blocks of modern life, *In Pursuit of the Unknown* is a penetrating exploration of how we have also used equations to make sense of, and in turn influence, our world.

*Sound as Popular Culture* Jens Gerrit Papenburg, Holger Schulze, 2016-03-18 Scholars consider sound and its concepts, taking as their premise the idea that popular culture can be analyzed in an innovative way through sound. The wide-ranging texts in this book take as their premise the idea that sound is a subject through which popular culture can be analyzed in an innovative way. From an infant's gurgles over a baby monitor to the roar of the crowd in a stadium to the sub-bass frequencies produced by sound systems in the disco era, sound—not necessarily aestheticized as music—is inextricably part of the many domains of popular culture. Expanding the view taken by many scholars of cultural studies, the contributors consider cultural practices concerning sound not merely as semiotic or signifying processes but as material, physical, perceptual, and sensory processes that integrate a multitude of cultural traditions and forms of knowledge. The chapters discuss conceptual issues

as well as terminologies and research methods; analyze historical and contemporary case studies of listening in various sound cultures; and consider the ways contemporary practices of sound generation are applied in the diverse fields in which sounds are produced, mastered, distorted, processed, or enhanced. The chapters are not only about sound; they offer a study through sound—echoes from the past, resonances of the present, and the contradictions and discontinuities that suggest the future.

@78 Angelo del Amore,2016-01-18 This is a true-life inspirational story about a young South African girl, Angelo del Amore, who travelled to Milan two days before her twenty-third birthday for a holiday. Little did she know her entire life was going to change and how much she would inspire and change all those she had met in Milan in a miraculous way. This book is a true fairytale that does not speak about the law of attraction or how the power of positive thought and unconditional love can construct as well as heal in abundance; it merely gives the simple actions of manifestation. Throughout this book you may identify with yourself in every way and be inspired by this Cinderella story and be motivated to follow your heart without question, come what may.

**Furry Logic** Matin Durrani,Liz Kalaugher,2016-10-06 The animal world is full of mysteries. Why do dogs slurp from their drinking bowls while cats lap up water with a delicate flick of the tongue? How does a tiny turtle hatchling from Florida circle the entire northern Atlantic before returning to the very beach where it hatched? And how can a Komodo dragon kill a water buffalo with a bite only as strong as a domestic cat's? These puzzles – and many more besides – are all explained by physics. From heat and light to electricity and magnetism, Furry Logic unveils the ways that more than 30 animals exploit physics to eat, drink, mate and dodge death in their daily battle for survival. Along the way, science journalists Matin Durrani and Liz Kalaugher introduce the great physicists whose discoveries helped us understand the animal world, as well as the animal experts of today who are scouring the planet to find and study the animals that seem to push the laws of physics to the limit. Presenting mind-bending physics principles in a simple and engaging way, Furry Logic will

appeal both to animal lovers and to those curious to see how physics crops up in the natural world. It's more of a 'howdunit' than a whodunit, though you're unlikely to guess some of the answers.

The Red Card Hayibo.com,2010 The Red Card is the best of the best from Hayibo.com. In print. On the page. In your own hands. Take a breath. Take a break. Have a laugh. Fresh, irreverent, topical news that'll tickle your twisted South African funny bone. Instant millionaire, Julius Malema, says his last few tax returns are not available for scrutiny because the dog ate them. Meanwhile he has accused a reporter of faking his signature, despite testimony from skeptical forensic experts who say that it is almost impossible to forge a thumbprint. Hayibo.com is South Africa's second best source of made up news after the SABC--BOOK Southern Africa.

**Lining Out the Word** William T. Dargan, 2006-06-27 This book, a milestone in American music scholarship, is the first to take a close look at an important and little-studied component of African American music, one that has roots in Europe, but was adapted by African American congregations and went on to have a profound influence on music of all kinds—from gospel to soul to jazz. Lining out, also called Dr. Watts hymn singing, refers to hymns sung to a limited selection of familiar tunes, intoned a line at a time by a leader and taken up in turn by the congregation. From its origins in seventeenth-century England to the current practice of lining out among some Baptist congregations in the American South today, William Dargan's study illuminates a unique American music genre in a richly textured narrative that stretches from Isaac Watts to Aretha Franklin and Ornette Coleman. *Lining Out the Word* traces the history of lining out from the time of slavery, when African American slaves adapted the practice for their own uses, blending it with other music, such as work songs. Dargan explores the role of lining out in worship and pursues the cultural implications of this practice far beyond the limits of the church, showing how African Americans wove African and European elements together to produce a powerful and unique cultural idiom. Drawing from an extraordinary range of sources—including his own fieldwork and oral sources—Dargan offers a compelling new perspective on the emergence of African American music in the United States.
