How Many Seeds in a Pumpkin? (Mr. Tiffin's Classroom Series) Margaret

McNamara, 2010-09-15 Mr. Tiffin and his students explore skip counting and estimation in a fun pumpkin-themed classroom experiment! This book makes a wonderful read-aloud companion to any math or science curriculum, and it's a fun way to reinforce counting skills at home. How many seeds are in a pumpkin? Mr. Tiffin asks his class as they gather around the big, medium, and small pumpkins on his desk. Robert, the biggest kid, guesses that the largest one has a million seeds; Elinor, sounding like she knows what she's talking about, guesses the medium one has 500 seeds; and Anna, who likes even numbers better than odd ones, guesses that the little one has 22. Charlie, the smallest boy in the class, doesn't have a guess. Counting pumpkin seeds is messy business, but once the slimy job is done, to everyone's surprise, the smallest pumpkin has the most seeds! As Charlie happily exclaims, Small things have a lot going on inside of them. And don't miss the newest addition to the Mr. Tiffin series, The Dinosaur Expert!

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Linguistics and the Teacher Ronald Carter,2012 *Linguistics and the Teacher* is a collection of essays by linguists on different aspects of the relationship between linguistics and education. All the contributors are united in their belief that linguistics should be a central element in the education of teachers, and argue for principled and systematic analysis in the study of the role of language in learning. The essays range from theoretical accounts of the nature of language study in teacher education to practical examples of how linguistics can help the teacher in such diverse contexts as the assessment of difficulty in textbooks, the teaching of literature, and analysing children's writing. The book offers models for analysis, specific syllabus and course proposals, and, in a key essay, discussion of those areas relevant to language and learning upon which most linguists would agree. The collection as a whole presents teachers with all the materials they need to make informed judgements about what has hitherto been regarded as a difficult area.

Bacterial Diversity and Systematics F.G. Priest,Alberto Ramos-Cormenzana,B.J. Tindall,2012-12-06 Bacterial taxonomy as a specialized discipline is practised by a minority but the applications of taxonomy are important to most, if not all microbiologists. It is the implementation of taxonomic ideas and practises which gives rise to identification and typing systems, procedures for the analysis and

characterization of biodiversity, hypotheses about the evolution of micro-organisms, and improved procedures for the isolation and implementation of bacteria in biotechnological processes. Without taxonomic theory providing a sound basis to these many facets of microbiology there would be severe problems faced by many scientists working with micro-organisms. Taxonomy comprises three sequential but independent processes; classification, nomenclature and identification. The first two stages are the prime concern of the specialist taxonomist but the third stage should result in identification schemes of value to all microbiologists. As the classification and identification of micro-organisms improves, largely due to the introduction of new technologies, so does its contribution to the subject as a whole. It therefore seemed timely to hold a conference in the autumn of 1993 devoted to microbial identification. Such a topic could not be addressed without some reference to the enabling discipline of classification, but the principal aims were to assess improvements in identification and typing and how these were benefiting microbiological topics ranging from ecological and biotechnological studies of extremophilic bacteria to the use of pyrolysis mass spectrometry in epidemiology. The meeting, which was held in Granada, Spain, was supported by FEMS (FEMS Symposium No.

Diffraction Reading Kai Merten, 2021-05-27 Putting the New Materialist figure of diffraction to use in a set of readings – in which cultural texts are materially read against their contents and their themes, against their readers or against other texts – this volume proposes a critical intervention into the practice of reading itself. In this book, reading and reading methodology are probed for their materiality and re-considered as being inevitably suspended between, or diffracted with, both matter and discourse. The history of literary and cultural reading, including poststructuralism and critical theory, is revisited in a new light and opened-up for a future in which the world and reading are no

longer regarded as conveniently separate spheres, but recognized as deeply entangled and intertwined. Diffractive Reading ultimately represents a new reading of reading itself: firstly by critiquing the distanced perspective of critical paradigms such as translation and intertextuality, in which texts encountered, processed or otherwise subdued; secondly, showing how all literary and cultural readings represent different 'agential cuts' in the world-text-reader constellation, which is always both discursive and material; and thirdly, the volume materializes, dynamizes and politicizes the activity of reading by drawing attention to reading's intervention in, and (co)creation of, the world in which we live.
