Australian Battalion Commanders in the Second World War Garth Pratten,2009-04-14 In

Australian Battalion Commanders in the Second World War, Garth Pratten explores, for the first time, the background, role and conduct of the commanding officers of Australian infantry battalions in World War II. Despite their vital role as the lynchpins of the battlefield, uniting the senior officers with the soldiers who fought, the battalion commanders have previously received scant attention in contemporary military history. This book redresses the balance, providing a gripping, meticulously researched and insightful account that charts the development of Australia's infantry commanding officers from part-time, ill-prepared, amateurs to seasoned veterans who, although still not professional soldiers, deserved the title of professional men of war. Drawing on extensive and original archival material, Pratten recreates battle scenes and brings to light many diverse personalities. It is a story of men confronting the timeless challenges of military leadership – mastering their own fear and discomfort - in order to motivate and inspire their troops to endure the maelstrom of war.

The Pleasures of God John Piper,2012-01-17 The author of *Desiring God* reveals the biblical evidence to help us see and savor what the pleasures of God show us about Him. Includes a study guide for individual and small-group use. Isn't it true—we really don't know someone until we understand what makes that person happy? And so it is with God! What does bring delight to the happiest Being in the universe? John Piper writes, that it's only when we know what makes God glad that we'll know the greatness of His glory. Therefore, we must comprehend "the pleasures of God." Unlike so much of what is written today, this is not a book about us. It is about the One we were made for—God Himself. In this theological masterpiece—chosen by *World Magazine* as one of the 20th Century's top 100 books, John Piper reveals the biblical evidence to help us see and savor what the pleasures of God show us about Him. Then we will be able to drink deeply—and satisfyingly—from the only well that offers living water. What followers of Jesus need now, more than anything else, is to know and love—behold and embrace—the great, glorious, sovereign, happy God of the Bible. "This is a unique and precious book that everybody should read more than once." —J.I. PACKER, Regent College, Vancouver, British Columbia

About Star Architecture Nadia Alaily-Mattar,Davide Ponzini,Alain Thierstein,2020-03-16 Cities across the world have been resorting to star architects to brand their projects, spark urban regeneration and market the city image internationally. This book shifts the attention from star architects to star architecture, arguing that the process of deciding about and implementing relevant architectural and urban projects is not the product of any single actor. Star architecture can, in fact, be better studied and understood as assembled by multiple actors and in its relationship with urban transformation. In its 18 chapters, the book presents a multidisciplinary collection of expert contributions in the fields of urban planning, architecture, media studies, urban economics, geography, and sociology, consistently brought together for the first time to deal with this topic. Through a vast array of case studies and analytical techniques touching over 20 cities in Europe, the book shows the positive and more problematic impacts of star architecture with reference to the preservation of built heritage, tourism and media. The book will be of interest to architects, sociologists, urban planners, and public administrators.

Design Governance Matthew Carmona,Claudio De Magalhaes,Lucy Natarajan,2016-12-19 Design Governance focuses on how we design the built environment where most of us live, work, and play

and the role of government in that process. To do so, it draws on the experience of the Commission for Architecture and the Built Environment (CABE), a decade-long, globally unique experiment in the governance of design. This book theorises design governance as an arm and aspiration of the state; tells the story of CABE, warts and all, and what came before and after; unpacks CABE's 'informal' toolbox: its methods and processes of design governance; and reflects on the effectiveness and legitimacy of design as a tool of modern-day government. The result is a new set of concepts through which to understand the governance of design as a distinct and important sub-field of urban design.

Anglizismen in Hispanoamerika Hendrik Detjen,2017-03-20 This work undertakes a first empirical and comparative investigation of Anglicisms in 12 Spanish-speaking Latin American countries. Unity and diversity are key themes in the study, which analyzes the use of English in daily newspapers, placing special emphasis on the graphic and morphological integration of borrowed terms. The study's findings relativize existing notions of the influence exerted by English in the region, both in terms of its extent and its geographical distribution. European Competition Law Lennart Ritter,W. David Braun,2005-01-01 No branch of European law has been as subject to expansion and change as competition law. Between the enormous forces of globalisation, technology, and EU enlargement, the Commission and national competition authorities have been compelled to keep rethinking their practices and procedures and issuing new regulations. Now, in the wake of its highly acclaimed predecessors, the new Third Edition of European Competition Law offers the practitioner everything required to act in accordance with the latest developments in the field. Along with the thorough guide to continuing practice that its readers have come to expect, European Competition Law in its Third Edition fully covers such areas as the following: the Commission's new assessment of distribution practices and vertical restraints, in particular the block exemptions granted by Regulations 2790/1999 and 1400/2002; procedure before national competition authorities and national courts for enforcement of European rules under Regulation 1/2003; the new Merger Control Regulation in force as of 1 May 2004; the new Transfer of Technology Regulation; and, the increased fines for hard-core cartel practices or abuse of dominant market position. The Third Edition is remarkable in that it actually previews the substantive and procedural rules that will be

coming into effect during 2004 and subsequent years. And, like prior editions, the work has no peer in its coverage of past administrative practice and the case law of the Court of Justice. All in all, European Competition Law, Third Edition, will be of immeasurable value to practitioners who need to keep informed about how EC competition laws are applied, so they can continue to render practical, meaningful advice to firms whose agreements, transactions and conduct in the marketplace are governed by competition rules.
