Images of Conflict Jean Bourgeois, Nicholas Saunders, Birger Stichelbaut, 2008-12-18 Striking aerial views of war, and of the scarred landscapes of its aftermath are the focus of this unique and multidisciplinary book. For the first time, the history, significance, and technology of military aerial photography are brought together and explored by military historians, archaeologists, and anthropologists. This new approach opens the door to a modern reassessment of military aerial imagery, reveals the concepts and philosophies that guided their production and interpretation, and illustrates the complex interaction between humans and technology in creating and understanding the landscapes of conflict.

A Story of the Psalms V. Steven Parrish, 2003 A Story of the Psalms is an interdisciplinary project that is informed especially by synchronic approaches to reading the Bible and the work of social scientists and theologians who have studied the contemporary landscape confronting religious communities, particularly congregations. Specifically, insights from narrative analysis are used to discern in the Book of Psalms a story with a plot that is told by multiple voices - engaged with one another and with God - as they address crucial junctures in Israel's life. These enduring voices offer guidance to congregations of an emerging church in a Post-Christendom era.

Republic of Images Alan Williams, 1992-03-01 Chronicling one of the greatest and most popular national cinemas, Republic of Images traces the evolution of French filmmaking from 1895—the year of the debut of the Cinematographe in Paris—to the present day. Alan Williams offers a unique

synthesis of history, biography, aesthetics and film theory. He brings to life all of the major directors, setting before us the cultures from which they emerged, and sheds new light on the landmark films they created. He distills what is historically and artistically unique in each of their careers and reveals what each artist has in common with the forebears and heirs of the craft. Within the larger story of French cinema, Williams examines the treasury of personal expression, social commentary, and aesthetic exploration that France has produced so consistently and exported so well. It is the tale of an industry rife with crises, and Williams offers a superb narrative of the economic, political, and social forces that have shaped its century-long history. He provides biographical sketches of filmmakers from the early pioneers of the silent era such as Louis Lumière and Alice Guy to modern directors such as Louis Malle, Claude Chabrol, and François Truffaut. Some of their careers, he shows, exemplify the significant contributions individuals made to the development of French filmmaking; others yield illuminating evidence of the problems and opportunities of a whole generation of filmmakers. Throughout, he presents critical analyses of significant films, from *The Assassination of the Duc de Guise* (1908) to works by the post-nouvelle vague directors. Williams captures the formal and stylistic developments of film in France over nearly one hundred years. Free of cant and jargon, *Republic of Images* is the best general account available of the rich interplay of film, filmmaker, and society. It will delight both general reader and student, as well as the viewer en route to the video store.

Intelligence Images from the Eastern Front Roy M. Stanley, 2016-11-30 Despite the Luftwaffe being ordered to destroy millions of aerial photos in 1945, the Allies found no less than twenty tons of photos in eleven locations, including a hoard in a Bavarian barn. These together with vast numbers of photographs taken by German soldiers used for Intelligence analysis were put into classified Allied Intelligence files at a time when USAAF and RAF imagery was being destroyed. Covering Iron Curtain countries they were valuable for cartography and target intelligence during the Cold War. The

captured German imagery (called GX) in this book show what the German Army knew about the Soviet Union before and during Operation Barbarossa. Examples show Eastern Front landforms, key cities such as Stalingrad, Moscow, Sevastopol, Leningrad and factories. They are accompanied by helpful comments from a skilled photo interpreter. This unique and diverse collection, some taken from 28,000 feet overhead, others taken by soldiers on the ground, reveal the war on the Eastern Front as it has never been seen before.

Military Helicopters Mark J. Harasymiw, 2013-01-01 During the Vietnam War, helicopters proved their worth to the US military. With brave crews aboard, they hovered low in the skies to rescue pilots and soldiers who were frighteningly close to enemy forces. How fascinating to think that the first helicopters couldn't even stay upright! In this book, readers will discover what it was like for the inventors of the helicopter, while also learning how this huge machine became the military necessity it is today. Exciting content, along with full-color photographs of daring rescues and high-tech equipment, will inspire readers to look to the skies. Detailed sidebars and fact boxes will keep readers engaged from cover to cover.

Zondervan Illustrated Bible Backgrounds Commentary: Esther John H. Walton, 2009 After a brief essay that introduces each book, a verse-by-verse commentary follows. Drawing upon linguistic analysis, archaeological evidence, history, other ancient Near Eastern literatures, and the like, the commentary provides the historical and cultural background against which the texts can be read and understood. --from publisher description.

Signals and Images Madeleine Bastide, 2012-12-06 Scientists challenging dominant paradigms are either ignored or attacked by the scientific mainstream. This book, however, contains a selection of scientific papers presented at the two last GIRI meetings (International Research Group on Very Low Dose and High Dilution Effects). The majority of these papers present results performed with succussed high dilutions (homeopathic dilutions), even beyond the Avogadro number. All presented models are classified, and their interpretation is possible either in the mechanistic paradigm or in an information paradigm. This new field of research introduces new scientific concepts which are supported by experimental results. Furthermore, this

nascent science is totally concerned with living organisms and, as such, it becomes necessary to define 'information' brought by non-molecular high dilutions. This book presents brain-storming work of this research group and is one of the starting points of a scientific evolution.

Images of the Divine: The Theology of Icons at the Seventh Ecumenical Council - Revised Edition Ambrosios Giakalis, 2005-08-01 This book, newly revised and updated, examines the Eastern Church's theology of icons chiefly on the basis of the acts of the Seventh Ecumenical Council of 787. The political circumstances leading to the outbreak of the iconoclast controversy in the eighth century are discussed in detail, but the main emphasis is on the theological arguments and assumptions of the council participants. Major themes include the nature of tradition, the relationship between image and reality, and the place of christology. Ultimately the argument over icons was about the accessibility of the divine. Icons were held by the iconophiles to communicate a deifying grace which raised the believer to participation in the life of God.

Special Forces John Hamilton, 2007-01-01 This book introduces readers to the elite special operations forces of each branch of the U.S. military. Historical information highlights the colonial scouts used during King Philip's War, Captain Robert Rogers' special forces during the French and Indian War, Colonel Thomas Knowlton, Brigadier General Daniel Morgan, and Colonel Francis Marion's rangers and irregulars during the Revolutionary War, the Union and the Confederacy's rangers during the American Civil War, the Army Rangers formed during World War II, and the importance of special forces during the Cold War, the Vietnam War, and the wars against terrorism. Readers will learn about the varied but intense training required of the few who qualify to become special forces, including navigation, first aid, parachuting, and weapons training involving pistols, sniper rifles, machine guns, explosives, hand grenades, and even night vision goggles, and their continued emphasis on excellence. Other chapters cover individual groups, including specialties such as desert and mountain training of the Army Rangers, missions, duties, and requirements such as foreign language skills of the Green Berets, the history and secrecy behind Delta Force and their job preventing terrorism, the advanced weapons and combat training, underwater and hostage rescue missions, and history of the Navy SEALs, the amphibious actions and unique perspective of Marine Corps Force Reconnaissance, and the close air support, search and rescue missions, and close work with Army Rangers and Navy SEALs of Air Force Special

Operations. Full-color photographs, sidebars, fun facts, a graphic timeline, a glossary, and an index accompany this easy-to-read text.

Images of the Nation Annemieke Galema,Barbara Henkes,Henk te Velde,1993 This collection of case studies investigates the significance and function of national identity. The authors see national consciousness in terms of the circumstances in which it arose, and in terms of the meaning which it had for a specific group or individual. Representations of the nation could serve to legitimize or support specific political or social agendas, or to provide people with a point of fixity amidst changing circumstances. The articles in this volume trace these aspects of national consciousness in the case of a single country: The Netherlands.
