The Live Music Business Andy Reynolds, 2021-11-29 The Live Music Business: Management and Production of Concerts and Festivals, Third Edition, shines a light on the enigmatic live music business, offering a wealth of inside advice and trade secrets to artists and bands looking to make a living in the industry. Previously published as The Tour Book, this new edition has been extensively revised, reorganized, and updated to reflect today's music industry. This practical guidebook examines the roles of the key players -- from booking agents to concert promoters, artist managers to talent buyers -- and the deals, conventions, and processes that drive this global business. Written by a touring professional with over 25 years of experience, this book elucidates why playing live is crucial to the success of any musician, band, or artist, explaining issues like: what managers, promoters, and agents do and how they arrange shows and tours; how to understand and negotiate show contracts; how to create a contract rider, and how the rider affects the money you earn from a show; how to appear professional and knowledgeable in an industry with its own conventions, language, and baffling technical terms; and a three-year plan using live performance to kickstart your music career. Intended for music artists and students, The Live Music Business presents proven live-music career strategies, covering every aspect of putting on a live show, from rehearsing and soundchecks to promotions, marketing, and contracts. In an era when performing live is more essential than ever, this is the go-to guidebook for getting your show on the road and making a living from music.

Designing Educational Project and Program Evaluations David A. Payne, 2012-12-06 Drawing upon experiences at state and local level project evaluation, and based on current research in the professional literature, Payne presents a practical, systematic, and flexible approach to educational evaluations. Evaluators at all levels -- state, local and classroom -- will find ideas useful in conducting, managing, and using evaluations. Special user targets identified are state department of education personnel and local school system administrative personnel. The volume can be used by those doing evaluation projects 'in the field', or as a text for graduate courses at an introductory level. The book begins with an overview of the generic evaluation process. Chapter Two is devoted to the criteria for judging the effectiveness of evaluation practice. Chapter Three addresses the all important topic of evaluation goals and objectives. Chapters Four, Five and Six basically are concerned with the approach, framework, or design of an evaluation study. Chapter Four contains a discussion of four major philosophical frameworks or metaphors and the implications of these frameworks for conducting an evaluation. Chapters Five and Six describe predominantly quantitative and qualitative designs, respectively. Design, implementation and operational issues related to instrumentation (Chapter Seven), management and decision making (Chapter Eight), and reporting and utilization of results (Chapter Nine) are next addressed. The final chapter of the book (Chapter Ten) considers the evaluation of educational products and materials.

Higher Education Through Open and Distance Learning Keith Harry, 2002-09-11 Published in association with the Commonwealth of Learning Open and distance learning has expanded dramatically in recent years across the world, across the spectrum of subject areas, and across educational levels. This book takes a detailed look at the state of the art of open and distance learning in higher education, and presents a fascinating picture of a world and its educational culture in transition. This edited collection contains authoritative analyses of key issues together with current accounts of practice in each region of the world. It includes *open and distance learning in relation to internationalisation, lifelong learning and flexible learning *costs of distance education *the impact of telecommunications *applications of open and distance learning in Africa, the Americas, Asia, Europe and Oceania. It draws together experts in the field from all over the world, and has a truly international perspective on the phenomenon of open and distance learning. Its unparalleled breadth of coverage makes it an indispensable work of reference for experts and newcomers alike.

Managing Technological Change Tony Bates, 2000 A required read for every university administrator grappling with the complexities of technology and education. Bates has combined an impressive depth of experience and practice to produce an authoritative and well-reasoned approach.--Bruce Pennycook, vice-principal, Information Systems and Technology, McGill University Digital technologies are revolutionizing the practices of teaching and learning at colleges and universities all around the world. This book will be helpful for all those who are planning and managing such organizational and technological change on their campuses.--Timothy W. Luke, executive director, Institute for Distance and Distributed Learning, Virginia Tech Implementing new technology at a college or university requires more than simply buying new computers and establishing a Web site. The successful use of technology for teaching and learning also demands major changes in teaching and organizational culture. In *Managing Technological Change*, Tony Bates -- a world-renowned expert on the use of technology in university teaching -- reveals how to create the new, technologically competitive academic organization. He draws from recent research and best practice case studies -- as well as on his thirty years of experience in using technology for teaching -- to provide practical strategies for managing change to ensure the successful use of technology. Readers will learn how to win faculty support for teaching with technology and get advice on appropriate decision-making and reporting structures. Other topics covered include reward systems, estimating costs of teaching by technology, and copyright issues. Bates also details the essential procedures for funding new technology-based systems, managing the technology, and monitoring its ongoing educational effectiveness in anticipation of future changes. Throughout the book, he maintains a focus on the human factors that must be addressed, identifying the risks and penalties of technologically based teaching and showing how to manage those hazards.

A Few Good Men, Too Many Chemicals Robert O'Dowd, 2019-11-30 A Few Good Men, Too Many Chemicals is the nonfiction story of U.S. Marines who were exposed to organic solvents, benzene, radiation, and other carcinogens in drinking water and through dermal contact and inhalation while working without protective clothing and face masks with toxic chemicals. Thousands of veterans and their families were once stationed at Marine Corps Air Station El Toro, CA, an EPA Superfund site and the premier Marine Corps jet fighter base until closed in July 1999. At Marine Corps Base Camp Lejeune, NC, another EPA Superfund site, the base wells were contaminated with organic solvents and benzene from 1953 to 1987 with an estimated one million people exposed to trichloroethylene (TCE), benzene and other toxic chemicals. Legislation to provide health care for Camp Lejeune, an active military installation, was passed in the 112th Congress. Lejeune veterans are eligible for VA health care and disability compensation for 8 of 15 health conditions approved for VA health care coverage. Many veterans have died without 'connecting the dots' between their killing diseases and military service. There is no VA health care and presumptive disability compensation for El Toro veterans. They have to fight the battle for VA benefits one Marine at a time. A Few Good Men, Too Many Chemicals documents the denial of responsibility and the cover-up by Marine Corps leadership of environmental contamination from veterans, their dependents, and the public at El Toro and Camp Lejeune. At El Toro, these include no usage records on TCE and other organic solvents used on the base for decades; Marine Corps' denial of ownership for 16 years of a major TCE plume spreading for miles into Orange County until a lawsuit forced the government to accept responsibility; the unexplained loss of all of the original well construction drawings (permanent records) and the loss of over 40 years of water

distribution engineering drawings; no records on the dates the base wells were abandoned but several engineering drawings showed the base wells part of the water distribution system after the purchase of a municipal water services contract; unexplained cut-off of pumping records when the base wells were clearly shown as not abandoned in engineering drawings; a radiation contaminated hangar shuttered and sealed until November 2018, years after the Navy reported the hangar free of radiation. At El Toro, 55-gallon drums of TCE waste were buried on the base for years to hide them from the Marine Corps Inspector General after their use was not authorized; the entire set of water distribution engineering drawings redrawn in 1986, the year after TCE was found in agricultural wells on and off the base and during the period when 10 Camp Lejeune's wells were found contaminated with TCE and abandoned; an El Toro Marine dead from Agent Orange exposure who never served in Vietnam; the dead Marine transported empty 55-gallon drums to the base's landfills; other Marines reported use of Agent Orange to spray the fence line to kill vegetation growth. Over 900 acres of the former base transferred to the FAA. After the determination that El Toro was not suitable as a civilian airport, the FAA passed ownership to the FBI. A Few Good Men, Too Many Chemicals reports the contaminants of concern at El Toro and Lejeune, the health effects of exposure to them as determined by the government and 130 other military bases that EPA identified as Superfund sites--the most toxic environmental sites in the U.S.

Modern Politics and Government Alan Ball,B. Guy Peters,2005-02-28 This substantially revised 7th edition of a classic text includes a new chapter on globalization and regionalization and broader coverage of democratic politics, interests and movements; of the media; of social and cultural influences on political behaviour and of public management. It has been systematically revised and updated throughout in the accessible down-to-earth style that has made it such a popular student choice for over 30 years.

Delivering Digitally Alastair Inglis,Vera Joosten,Peter Ling,2003-12-08 This text investigates courseware delivery where resources are based on the World Wibe Web and are computer-managed. It follows a structured approach and provides practical support on general principles, best practice, skills needed and decisions to be made.

Odd John Olaf Stapledon,2021-01-08 John Wainwright is extremely intelligent even if he is stunted in his physical development. He believes in communist ideas but is critical of mainstream Marxism. He is also quite vain and highly skillful in the arts of seduction. From a human viewpoint, he can be considered amoral or perhaps to be following a morality beyond human understanding. The novel explores the theme of the Übermensch (superman) in the character of Odd John whose supernormal human mentality inevitably leads to conflict with normal human society and the utopian colony founded by him and other superhumans.

Unrepentant: Disrobing The Emperor Kevin Annett,2011-03-16 Kevin Annett's story is a David/Goliath epic of one man's fight against the establishment of church and state in support of a subjugated people. ,

Zionism: Conflict without end? Alan Hart,2009 Volume III takes the story from the 1967 War and the creation of Greater Israel to the present and explores the question: Can President Obama deliver acceptable justice for Palestinians to achieve peace; and if not, is a final round of Zionist ethnic cleansing inevitable?

Popular Resistance in Palestine Mazin B. Qumsiyeh,2010-12-15 The Western media paint Palestinian resistance against Israeli occupation as exclusively violent: armed resistance, suicide bombings, and rocket attacks. In reality these methods are the exception to what is a peaceful and creative resistance movement. In this fascinating book, Dr Mazin Qumsiyeh synthesizes data from hundreds of original sources to provide the most comprehensive study of civil resistance in Palestine. The book contains hundreds of stories of the heroic and highly innovative methods of resistance employed by the Palestinians over more than 100 years. The author also analyzes the successes, failures, missed opportunities and challenges facing ordinary Palestinians as they struggle for freedom against incredible odds. This is the only book to critically and comparatively study the uprisings of 1920-21, 1929, 1936-9, 1970s, 1987-1991 and 2000-2006. The compelling human stories told in this book will inspire people of all faiths and political backgrounds to chart a better and more informed direction for a future of peace with justice.

Sharing The Land Of Canaan Mazin B. Qumsiyeh,2004-06-20 Examines human rights issues in the Occupied Territories and lays out plans for a lasting peace.
