The People's Republic of Walmart Leigh Phillips, Michal Rozworski, 2019-03-05 Since the demise of the USSR, the mantle of the largest planned economies in the world has been taken up by the likes of Walmart, Amazon and other multinational corporations For the left and the right, major multinational companies are held up as the ultimate expressions of free-market capitalism. Their remarkable success appears to vindicate the old idea that modern society is too complex to be subjected to a plan. And yet, as Leigh Phillips and Michal Rozworski argue, much of the economy of the West is centrally planned at present. Not only is planning on vast scales possible, we already have it and it works. The real question is whether planning can be democratic. Can it be transformed to work for us? An engaging, polemical romp through economic theory, computational complexity, and the history of planning, *The People's Republic of Walmart* revives the conversation about how

society can extend democratic decision-making to all economic matters. With the advances in information technology in recent decades and the emergence of globe-straddling collective enterprises, democratic planning in the interest of all humanity is more important and closer to attainment than ever before.

How Walmart Is Destroying America (And the World) Bill Quinn, 2012-12-12 After carving up the once lovingly cared-for downtowns of Small Town America, Wal-Mart launched a frontal assault on mom-and-pop businesses all over the globe. With 1.5 million employees operating more than 3,500 stores, Wal-Mart is now the world's largest private employer. In this third edition of *How Wal-Mart Is Destroying America (and the World)*, intrepid Texas newspaperman Bill Quinn continues the fight. Featuring detailed accounts of Wal-Mart's questionable business practices and the latest information on Wal-Mart lawsuits, vendor issues, and efforts to stop expansion, Quinn shows why Wal-Mart Stores, Inc., is arguably the most feared and despised corporation in the world. Whether you're a customer fed up with Wal-Mart's false claims, a vendor squeezed by strong-arm tactics, a worker pushed to increase the Waltons' bottom line, or a concerned citizen trying to save your hometown, this book will show you how to get Wal-Mart off your back and out of your backyard. BILL QUINN is a World War II veteran, retired newspaperman, and certified anti-Wal-Mart crusader. He lives with his wife, Lennie, in Grand Saline, Texas.

Doing Recent History Claire Bond Potter, Renee C. Romano, 2012-04-25 Recent history—the very phrase seems like an oxymoron. Yet historians have been writing accounts of the recent past since

printed history acquired a modern audience, and in the last several years interest in recent topics has grown exponentially. With subjects as diverse as Walmart and disco, and personalities as disparate as Chavez and Schlafly, books about the history of our own time have become arguably the most exciting and talked-about part of the discipline. Despite this rich tradition and growing popularity, historians have engaged in little discussion about the specific methodological, political, and ethical issues related to writing about the recent past. The twelve essays in this collection explore the challenges of writing histories of recent events where visibility is inherently imperfect, hindsight and perspective are lacking, and historiography is underdeveloped. Those who write about events that have taken place since 1970 encounter exciting challenges that are both familiar and foreign to scholars of a more distant past, including suspicions that their research is not historical enough, negotiation with living witnesses who have a very strong stake in their own representation, and the task of working with new electronic sources. Contributors to this collection consider a wide range of these challenges. They question how sources like television and video games can be better utilized in historical research, explore the role and regulation of doing oral histories, consider the ethics of writing about living subjects, discuss how historians can best navigate questions of privacy and copyright law, and imagine the possibilities that new technologies offer for creating transnational and translingual research opportunities. *Doing Recent History* offers guidance and insight to any researcher considering tackling the not-so-distant past.

Grocery Story Jon Steinman, 2019-05-07 Hungry for change? Put the power of food co-ops on your plate and grow your local food economy. Food has become ground-zero in our efforts to increase awareness of how our choices impact the world. Yet while we have begun to transform our communities and dinner plates, the most authoritative strand of the food web has received

surprisingly little attention: the grocery store—the epicenter of our food-gathering ritual. Through penetrating analysis and inspiring stories and examples of American and Canadian food co-ops, Grocery Story makes a compelling case for the transformation of the grocery store aisles as the emerging frontier in the local and good food movements. Author Jon Steinman: Deconstructs the food retail sector and the shadows cast by corporate giants Makes the case for food co-ops as an alternative Shows how co-ops spur the creation of local food-based economies and enhance low-income food access. Grocery Story is for everyone who eats. Whether you strive to eat more local and sustainable food, or are in support of community economic development, Grocery Story will leave you hungry to join the food co-op movement in your own community.

Predicting Trends and Building Strategies for Consumer Engagement in Retail Environments Granata, Giuseppe, Moretta Tartaglione, Andrea, Tsiakis, Theodosios, 2019-05-30 Global economic scenarios are increasing in complexity due to the recent global financial crisis, globalization, the evolution of ICT, and the changing behaviors of consumers. This has made it difficult to predict trends and build strategies within the retail industry. As a result, long-term forecasts and schedules are not possible, and more research is needed to explore today's consumer profile and set the frameworks for future recovery strategies. Predicting Trends and Building Strategies for Consumer Engagement in Retail Environments is a pivotal reference source that provides practical insights into improving the understanding of complex retail environments and consumer shopping behaviors in order to predict trends and develop strategies for retailers in times of economic crisis. While highlighting topics such as consumer engagement, industry models, and market globalization, this publication explores qualitative and quantitative methods of interest and the multidisciplinary approaches revolving around the industry. This book is ideally designed for

marketers, managers, practitioners, retail professionals, academicians, researchers, and students seeking current research on relationship marketing, digital marketing, service management, and complexity theories.
