**The Second Offline** Hidenori Tomita, 2021-09-01 This book presents current research on mobile Internet society. Past research was not able to show a clear analytical framework, thus was unable to close in on the fundamental changes in that society. This book, however, analyzes mobile Internet society by introducing the concept of “doubling of time and place” and the analytical framework of the “second offline.” The emergence of the smartphone has made Internet use easier, and now, people are constantly using online information in the midst of their daily lives. Our society is transitioning from the first offline society, a society without being connected to Internet, to the second offline society, where users are connected to the Internet at all times. In this second offline society, our sense of time and place are beginning to change. Broadcast and communication media have made possible the overlapping of different places, which has been called the doubling of place. Furthermore, virtual reality (VR) and augmented reality (AR) technologies have enabled the overlap of different times, which this book calls the doubling of time. The smartphone makes both possible. With the second offline and the doubling of time and place as keywords, the book takes into consideration research that includes, among other topics, the media usage of young adults, selfies, education, social media usage, mobile games, work stations, and consumer activity in the mobile Internet society.

Semantic Labeling of Places with Mobile Robots Óscar Martinez Mozos, 2010-01-10 During the last years there has been an increasing interest in the area of service robots. Under this category we find robots working in tasks such as elderly care, guiding, office and domestic assistance, inspection, and many more. Service robots usually work in indoor environments designed for humans, with offices and houses being some of the most typical examples. These environments are typically divided into places with different functionalities like corridors, rooms or doorways. The ability to learn such semantic categories from sensor data enables a mobile robot to extend its representation of the environment, and to improve its capabilities. As an example, natural language terms like corridor or room can be used to indicate the position of the robot in a more intuitive way when communicating with humans. This book presents several approaches to enable a mobile robot to categorize places in indoor environments. The categories are indicated by terms which represent the different regions in these environments. The objective of this work is to enable mobile robots to perceive the spatial divisions in indoor environments in a similar way as people do. This is an interesting step forward to the problem of moving the perception of robots closer to the perception of humans. Many approaches introduced in this book come from the area of pattern recognition and classification. The applied methods have been adapted to solve the specific problem of place recognition. In this regard, this work is a useful reference to students and researchers who want to introduce classification techniques to help solve similar problems in mobile robotics.

**Star Power** Brett P. S., Humankind had explored and colonized every sector with fleets of ships capable of folding space, thanks to massive Star Power engines. Intelligent alien life did not exist in the Milky Way, but who knew what threats possibly lurked across the dark space between galaxies?

Mapping Digital Game Culture in China Marcella Szablewicz, 2020-02-18 In this book, Marcella Szablewicz traces what she calls the topography of

digital game culture in urban China, drawing our attention to discourse and affect as they shape the popular imaginary surrounding digital games. Szablewicz argues that games are not mere sites of escape from Real Life, but rather locations around which dominant notions about failure, success, and socioeconomic mobility are actively processed and challenged. Covering a range of issues including nostalgia for Internet cafés as sites of youth sociality, the media-driven Internet addiction moral panic, the professionalization of e-sports, and the rise of the self-proclaimed loser (diaosi), *Mapping Digital Game Culture in China* uses games as a lens onto youth culture and the politics of everyday life in contemporary China. Based on ethnographic fieldwork conducted between 2009 and 2015 and first-hand observations spanning over two decades, the book is also a social history of urban China's shifting technological landscape.

*Advance Trends in Soft Computing* Mo Jamshidi, Vladik Kreinovich, Janusz Kacprzyk, 2013-11-18 This book is the proceedings of the 3rd World Conference on Soft Computing (WCSC), which was held in San Antonio, TX, USA, on December 16-18, 2013. It presents start-of-the-art theory and applications of soft computing together with an in-depth discussion of current and future challenges in the field, providing readers with a 360 degree view on soft computing. Topics range from fuzzy sets, to fuzzy logic, fuzzy mathematics, neuro-fuzzy systems, fuzzy control, decision making in fuzzy environments, image processing and many more. The book is dedicated to Lotfi A. Zadeh, a renowned specialist in signal analysis and control systems research who proposed the idea of fuzzy sets, in which an element may have a partial membership, in the early 1960s, followed by the idea of fuzzy logic, in which a statement can be true only to a certain degree, with degrees described by numbers in the interval  $[0,1]$ . The performance of fuzzy systems can often be improved with the help of optimization techniques, e.g. evolutionary computation, and by endowing the corresponding system with the ability to learn, e.g. by combining fuzzy systems with neural networks. The resulting "consortium" of fuzzy, evolutionary, and neural techniques is known as soft computing and is the main focus of this book.

*The Safebook* Seema Chari, 2022-04-25 Be careful... Mind that... WATCH OUT! How many times in a day do you hear these warnings? It's not surprising, either, because - let's face it - the world can be a dangerous place. From fire and electricity to roads and the Internet...nearly everything that makes life better also poses risks you may not be aware of. And you never know when a seemingly small hazard may turn into a real whammy. Now, if you want to be ready for tricky situations, keep your cool in an emergency and save the day, here's the book that helps you to: 1 Identify safety issues around you, 1 Take steps to prevent or handle emergencies, and 1 Be informed about what to do in worst-case scenarios and when to ask for assistance. Easy to follow, with illustrations and diagrams to explain unsafe situations and possible solutions, *The SafeBook* is your first step towards taking care - without the scare.

**Perhaps the Stars** Ada Palmer, 2021-11-02 From the 2017 John W. Campbell Award Winner for Best Writer, Ada Palmer's *Perhaps the Stars* is the final book of the Hugo Award-shortlisted *Terra Ignota* series. World Peace turns into global civil war. In the future, the leaders of Hive nations—nations without fixed location—clandestinely committed nefarious deeds in order to maintain an outward semblance of utopian stability. But the facade could only

last so long. The comforts of effortless global travel and worldwide abundance may have tempered humanity's darkest inclinations, but conflict remains deeply rooted in the human psyche. All it needed was a catalyst, in form of special little boy to ignite half a millennium of repressed chaos. Now, war spreads throughout the globe, splintering old alliances and awakening sleeping enmities. All transportation systems are in ruins, causing the tyranny of distance to fracture a long-united Earth and threaten to obliterate everything the Hive system built. With the arch-criminal Mycroft nowhere to be found, his successor, Ninth Anonymous, must not only chronicle the discord of war, but attempt to restore order in a world spiraling closer to irreparable ruin. The fate of a broken society hangs in the balance. Is the key to salvation to remain Earth-bound or, perhaps, to start anew throughout the far reaches of the stars? *Stowaway Star Runner* C.G. Harris, 2022-10-20 Who knew babysitting an alien would be so hard? Ben and the crew have set course for an alien planet, but the inhabitants are far from what they expected. They have answers that could get their baby Viraquin home but Ben isn't sure he's willing to pay the price for the well guarded secret. En route to the planet, they receive a distress call from a crippled ship and are bound by law to help. The life support system onboard is failing and the crew is dying. Ben and Lois are their last hope. The power couplings needed to ensure their survival are easy enough to get, they just have to be plundered from another ship. A perfect way for Ben and his crew to break into the space pirate business. Too bad they've targeted one of the most ruthless aliens in the galaxy as their mark. It's a race against time to escape destruction, save the crippled ship and learn the secret that can safely deliver the baby Viraquin home. *Stowaway Star Runner* is book 2 in the Viraquin Voyage space pirate series. Book 3, *Yuletide Space Ranger* now available.

**Beginning Light** Marie Silva, 2022-05-31 In the year 2536, The Unified Consortium Alliance is in a devastating war against a mysterious enemy known as the Prax Order. And they are in desperate need of help. Seeking out assistance in unclaimed space, they come in contact with the E-S'hanti Tribes. The older members of the Alliance knew who the E-S'hanti are and encouraged the other members to consider their offer of help, even though the E-S'hanti are as mysterious as their enemy. All the E-S'hanti wanted from the Alliance was for them to come to their territory on a space vessel designed by the E-S'hanti to go by the name of Oracle and two specific people were to be onboard: Captain Steven Garrison and Commander Cameron Quinn. Steven, Cameron and the crew of the Oracle will venture out into the unclaimed space to meet with the E-S'hanti while traversing through new personal relationships, the danger of their enemy chasing them, an enemy agent onboard to cause trouble and the legend that connects the two people specifically chosen for this ship. This is the story of their first mission.

*The Sister Verse and the Devouring Glass* Amelie C. Langlois, 2018-11-28 In the second book of the *Sister Verse*, Diana and her party must brave the surreal and violent wastes of the Dreadlands once again in their quest to recover the Devouring Glass. With the aid of a mysterious wanderer who can

bridge the void between worlds, they must infiltrate the darkling capital of Lao-Va, and come to terms with the truth of their world, or be damned to a fate worse than death. This book contains scenes of violence that may be unsuitable for some readers.

**Culture, Politics and Climate Change** Deserai A. Crow, Maxwell T. Boykoff, 2014-03-21 Focusing on cultural values and norms as they are translated into politics and policy outcomes, this book presents a unique contribution in combining research from varied disciplines and from both the developed and developing world. This collection draws from multiple perspectives to present an overview of the knowledge related to our current understanding of climate change politics and culture. It is divided into four sections – Culture and Values, Communication and Media, Politics and Policy, and Future Directions in Climate Politics Scholarship – each followed by a commentary from a key expert in the field. The book includes analysis of the challenges and opportunities for establishing successful communication on climate change among scientists, the media, policy-makers, and activists. With an emphasis on the interrelation between social, cultural, and political aspects of climate change communication, this volume should be of interest to students and scholars of climate change, environment studies, environmental policy, communication, cultural studies, media studies, politics, sociology.

**Machine Learning in Medical Imaging** Guorong Wu, Daoqiang Zhang, Luping Zhou, 2014-09-05 This book constitutes the refereed proceedings of the 5th International Workshop on Machine Learning in Medical Imaging, MLMI 2014, held in conjunction with the International Conference on Medical Image Computing and Computer Assisted Intervention, MICCAI 2014, in Cambridge, MA, USA, in September 2014. The 40 contributions included in this volume were carefully reviewed and selected from 70 submissions. They focus on major trends and challenges in the area of machine learning in medical imaging and aim to identify new cutting-edge techniques and their use in medical imaging.

*The Bloomsbury Handbook of Sonic Methodologies* Michael Bull, Marcel Cobussen, 2020-12-10 The field of Sound Studies has changed and developed dramatically over the last two decades involving a vast and dizzying array of work produced by those working in the arts, social sciences and sciences. The study of sound is inherently interdisciplinary and is undertaken both by those who specialize in sound and by others who wish to include sound as an intrinsic and indispensable element in their research. This is the first resource to provide a wide ranging, cross-cultural and interdisciplinary investigation and analysis of the ways in which researchers use a broad range of methodologies in order to pursue their sonic investigations. It brings together 49 specially commissioned chapters that ask a wide range of questions including; how can sound be used in current academic disciplines? Is sound as a methodological tool indispensable for Sound Studies and what can sound artists contribute to the discourse on methodology in Sound Studies? The editors also present 3 original chapters that work as provocative 'sonic methodological interventions' prefacing the 3 sections of the book.

*Youth-Led Social Movements and Peacebuilding in Africa* Ibrahim Bangura, 2022-05-23 This book critically examines and analyses the active role played by youth-led social movements in pushing for change and promoting peacebuilding in Africa, and their long-term impacts on society. Africa's history is characterised by youth movements. The continent's youth populations played pivotal roles in the campaign against colonialism and, ever since independence, Africa's youth have been at the center of social mobilisation. Most recently, social media has contributed significantly to a further rise in youth-led social movements. However, the impact of youth voices is often marginalised by patriarchal and gerontocratic approaches to governance, denying them the place, voice, and recognition that they deserve. Drawing on empirical evidence from across the continent, this book analyses the drivers and long-term impacts of youth-led social movements on politics in African societies, especially in the area of peacebuilding. The book draws attention to the innovative ways in which young people continue to seek to re-engineer social space and challenge contexts that deny them their voice, place, recognition and identity. This book will be of interest to researchers across the fields of social movement studies, youth studies, peace and conflict studies, history, political sciences, social justice, and African studies. Off the Map Niles Schwartz, 2018-06-11 A motion picture chronicling the last adventures of bank robber John Dillinger (Johnny Depp), *Public Enemies* was met with much bafflement upon its 2009 release. Director Michael Mann's terse storytelling and unorthodox use of high-definition digital cameras challenged viewers' familiarity with Hollywood's historical gangland elegance while highlighting *Public Enemies*' own place in a medium--and culture--undergoing sweeping technological change. In *Off the Map*, Niles Schwartz immerses us in Mann's representation of Dillinger, a subject increasingly aware of his own role as a romanticized frontier folk hero, in flight from an enveloping bureaucratic system. The cultural issues of Dillinger's 1930s anticipate the 21st century watershed moment for the moving image, as our relationship with the pictures surrounding us increasingly affects our own sense of identity, historical truth, and means of relating to each other. Mann's follow-up, the hacker thriller *Blackhat* (2015), reflects a world where *Public Enemies*' abstract surveillance state has since colonized the firmament of our everyday lives. Yet in this virtual labyrinth of surplus images, cinema may inwardly illuminate a transformative path for us. *Off the Map* places Mann's late works in deep focus, exploring our present relationship to cinema on a backdrop that swings from the blockbuster spectacle of *Avatar* to the curious intimacy of *Moonrise Kingdom*, ultimately suggesting the mysterious space between the viewer and the screen may yet become a sanctuary of deep spiritual reflection.
