Intelligent Multimedia Surveillance Pradeep K. Atrey,Mohan S. Kankanhalli,Andrea Cavallaro,2013-11-27 Intelligent multimedia surveillance concerns the analysis of multiple sensing inputs including video and audio streams, radio-frequency identification (RFID), and depth data. These data are processed for the automated detection and tracking of people, vehicles, and other objects. The goal is to locate moving targets, to understand their behavior, and to detect suspicious or abnormal activities for crime prevention. Despite its benefits, there is societal apprehension regarding the use of such technology, so an important challenge in this research area is to balance public safety and privacy. This edited book presents recent findings in the field of intelligent multimedia surveillance emerging from disciplines such as multimedia computing, computer vision, and artificial intelligence. It consists of nine chapters addressing intelligent video surveillance, video analysis of crowds, privacy issues in intelligent multimedia surveillance, RFID technology for localization of objects, object tracking using visual saliency information, estimating multiresolution depth using active stereo vision, and performance evaluation for video surveillance systems. The book will be of value to researchers and practitioners working on related problems in security, multimedia, and artificial intelligence.

Who Watches the Watchmen? Gary Ross,2016-01-23 Who Watches the Watchmen? could hardly be more timely as we debate the recent leaking of the largest trove of documents in American history. The WikiLeaks case drives home the need for what this book lays out: an approach to protecting classified information that goes beyond law enforcement. Gary Ross' application of Rational Choice Theory codifies, organizes, and extends what many of us have been trying to do instinctively when dealing with unauthorized disclosures. Watchmen attempts to answer two significant, timely questions: What is the extent of the threat to national security posed by the media's disclosure of classified information? What are a journalist's motivations and justifications for publishing this information? The author concludes that the dilemma between withholding information in the interest of national security and the constitutional guarantee of a free press cannot be solved, but can be better understood and more intelligently managed.

Albion's Seed David Hackett Fischer,1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Federal Guidelines for Opioid Treatment Programs U.S. Department of Health and Human Services,2019-11-23 The Federal Guidelines for Opioid Treatment Programs (Guidelines) describe the Substance Abuse and Mental Health Services Administration's (SAMHSA) expectation of how the federal opioid treatment standards found in Title 42 of the Code of Federal Regulations Part 8 (42 CFR ◆ 8) are to be satisfied by opioid treatment programs (OTPs). Under these federal regulations, OTPs are required to have current valid accreditation status, SAMHSA certification, and Drug Enforcement Administration (DEA) registration before they are able to administer or dispense opioid drugs for the treatment of opioid addiction.

Vagrant Nation Risa Lauren Goluboff,2016 People out of Place reshapes our understanding of the 1960s by telling a previously unknown story about often overlooked criminal laws prohibiting vagrancy. As Beats, hippies, war protesters, Communists, racial minorities, civil rights activists, prostitutes, single women, poor people, and sexual minorities challenged vagrancy laws, the laws became a shared constitutional target for clashes over radically different visions of the nation's future--
