How do we get ourselves out of the foreground of our thoughts and achieve compassion? The speech captures Wallace's electric intellect as well as his grace in attention to others. After his death, it became a treasured piece of writing reprinted in *The Wall Street Journal* and the *London Times*, commented on endlessly in blogs, and emailed from friend to friend. Writing with his one-of-a-kind blend of causal humor, exacting intellect, and practical philosophy, David Foster Wallace probes the challenges of daily living and offers advice that renews us with every reading.

Your Water Footprint Stephen Leahy,2014 A water footprint is the amount of fresh water used to produce the goods and services we consume, including growing, harvesting, packaging, and shipping. For example, one mango uses 82 gallons of water, one 9-ounce stick of butter uses 366, one 7-ounce chocolate bar uses 449, and 5-ounces of ground beef uses 634. Producing a smart phone uses 240 gallons of water, a cotton t-shirt 660, and a pair of jeans 2000. Our current water usage patterns are unsustainable-- only three percent of the world's water is drinkable, and due to climate change, population growth and pollution, water shortages are worsening across the globe. *Your Water Footprint* uses eye-catching infographics with accompanying text to explain how much water it takes to produce an item or carry out an activity, and offer tips on saving water. With knowledge, educated decisions can be made and changes can be implemented to reduce waste.

*Weird Water & Fuzzy Logic* Martin Gardner,1996 At a time when popular knowledge of basic science has sunk to a new low and books promoting angels, parapsychology, and bizarre forms of medicine and healing outnumber skeptical books by more than a thousand to one, Americans need a voice of sanity. *Weird Water* and *Fuzzy Logic* introduces readers to mind-wrenching probability paradoxes, recent attacks on the Big Bang Theory, and Marianne Williamson's success promoting The Course of Miracles, which is said to have been channeled by Jesus. Other columns address E-prime, a language that omits all

forms of the verb to be; Norman Vincent Peale's beliefs in the paranormal; repressed memory therapy; science blunders by famous writers; the influence of Transcendental Meditation on the career of Doug Henning; a critique of Klingon and other artificial languages; and much more.

*The Worth of Water* Gary White, Matt Damon, 2022-03-29 From the founders of nonprofits Water.org & WaterEquity Gary White and Matt Damon, the incredible true story of two unlikely allies on a mission to end the global water crisis for good On any given morning, you might wake up and shower with water, make your coffee with water, flush your toilet with water—and think nothing of it. But around the world, more than three-quarters of a billion people can't do any of that—because they have no clean water source near their homes. And 1.7 billion don't have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It's also solvable. That conviction is what brought together movie actor Matt Damon and water expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that works. Working with partners across East Africa, Latin America, South Asia, and Southeast Asia, they've helped over 40 million people access water and/or sanitation. In *The Worth of Water*, Gary and Matt take us along on the journey—telling stories as they uncover insights, try out new ideas, and travel between the communities they serve and the halls of power where decisions get made. With humor and humility, they illuminate the challenges of launching a brand-new model with extremely high stakes: better health and greater prosperity for people all over the world. *The Worth of Water* invites us to become a part of this effort—to match hope with resources, to empower families and communities, and to end the global water crisis for good. All the authors' proceeds from the sale of this book will be donated to Water.org.

*Searching For God And Finding Allah* Gene Netto, 2019-11-19 What does Islam say about Christianity, Jesus, the Trinity, the Holy Bible, and Almighty God? What does Islam say about the Absolute Truth of Islam, the Prophet Muhammad, and the Holy Qur'an (also spelled Koran)? If there is only One Almighty God, then Christians and Muslims must be praying to the same God. So, what are the differences between the two religions, and why do Muslims reject Christianity, the Bible, and Jesus as the Son of God, but still accept Jesus as a prophet of God? For non-devout and ex-Christians, this book will explain the problems with Christianity from an Islamic perspective. It will also explain that the Prophet Muhammad was sent to replace Jesus as the next person in a succession of prophets that started with the Prophet Adam and finished with the Prophet Muhammad. For Muslims who grew up without a strong religious education, this book will explain that all religions are not the same, that Christianity is no longer valid or accepted by God, and that we should use the logical brains that God gave us to understand Islam. In this book, you will discover that Islam is simply the continuation of Judaism and Christianity, that Islam is the One True Religion of Almighty God and always has been since the time of Adam and Eve, and that the Prophet Muhammad is the next messenger and also the Final Messenger from God, that Jesus promised to his followers. -Gene Netto

*White Man's Water* Erica Prussing, 2011-08-01 In recent years, efforts to recognize and accommodate cultural diversity have gained some traction in the politics of US health care. But to date, anthropological perspectives have figured unevenly in efforts to define and address mental health problems. Particularly challenging are examinations of Native peoples' experiences with alcohol. Erica Prussing provides the first in-depth assessment of the politics of Native sobriety by focusing on the Northern Cheyenne community in southeastern Montana, where for many decades the federally funded health care system has relied on the Twelve Step program of Alcoholics Anonymous. *White Man's Water* provides a thoughtful and careful analysis of Cheyenne views of sobriety and the politics that surround the selective appeal of Twelve Step approaches despite wide-ranging local critiques. Narratives from participants in these programs debunk long-standing stereotypes about "Indian drinking" and offer insight into the diversity of experiences with alcohol that actually occur among Native North Americans. This critical ethnography employs vivid accounts of the Northern Cheyenne people to depict how problems with alcohol are culturally constructed, showing how differences in age, gender, and other social features can affect involvement with both drinking and sobriety. These testimonies reveal the key role that gender plays in how Twelve Step program participants engage in a selective and creative process of appropriation at Northern Cheyenne, adapting the program to accommodate local cultural priorities and spiritual resources. The testimonies also illuminate community reactions to these adaptations, inspiring deeper inquiry into how federally funded health services are provided on the reservation. This book will appeal to readers with an interest in Native studies, ethnography, women's studies, and medical anthropology. With its critical consideration of how cultural context shapes drinking and sobriety, *White Man's Water* offers a multivocal perspective on alcohol's impact on health and the cultural complexities of sobriety.
