Factors Governing the Selection and Protection of Sources of Water Supply John Kurtz Hoskins,1921

Formulating Poorly Water Soluble Drugs Robert O. Williams III,Alan B. Watts,Dave A. Miller,2011-12-04 This volume is intended to provide the reader with a breadth of understanding regarding the many challenges faced with the formulation of poorly water-soluble drugs as well as in-depth knowledge in the critical areas of development with these compounds. Further, this book is designed to provide practical guidance for overcoming formulation challenges toward the end goal of improving drug therapies with poorly water-soluble drugs. Enhancing solubility via formulation intervention is a unique opportunity in which formulation scientists can enable drug therapies by creating viable medicines from seemingly undeliverable molecules. With the ever increasing number of poorly water-soluble compounds entering development, the role of the formulation scientist is growing in importance. Also, knowledge of the advanced analytical, formulation, and process technologies as well as specific regulatory considerations related to the formulation of these compounds is increasing in value. Ideally, this book will serve as a useful tool in the education of current and future generations of scientists, and in this context contribute toward providing patients with new and better medicines.

Selection and Definition of Performance Indicators for Water and Wastewater Utilities Patricia A. Crotty,AWWA Research Foundation,2004 Based on a 1995 charter for utility quality service program (QualServe), it was recognized that benchmarks were key to improved performance. This initial project identified 20 performance indicators, all which are defined and discusses in this text. Broad categories are: Organization Development, Customer Relations, Business Operations, Water Operations and Wastewater Operations. With input from over 300 utility employees, this report should be of interest to water utilities of all sizes
