JFK, Oswald and Ruby Burt W. Griffin, Warren Commission Assistant Counsel,2023-06-09 In this book, former Warren Commission lawyer Burt Griffin examines anew the Kennedy assassination, its various investigations, its effects on the Cold War and the civil rights movement, and the motives of Lee Harvey Oswald and Jack Ruby. Griffin begins with his own skeptical reaction to the assassination, proceeds to the Dallas police investigation, and continues with the efforts of himself and his colleagues to sift truth from those who concealed, withheld, or exaggerated evidence. After nearly six decades of study, Judge Griffin is satisfied that Oswald acted alone. He concludes that violence in the Cold War and civil rights movement caused Oswald to believe that blame for Kennedy's death might be placed on followers of rightwing activist and former U.S. Army general Edwin Walker. Walker was an outspoken enemy of Oswald's idol, Cuban president Fidel Castro, and a firm opponent of racial integration--

and Oswald had already attempted to murder Walker in April 1963. The author gives the Walker movement a more prominent place in the assassination story and traces the conflicting ambitions of Walker, Oswald, Kennedy and Ruby as they collided in October and November 1963. This book will help serious readers separate truth from fiction and to become examiners of how insignificant, unsuspected, powerless people driven by very personal needs and fears can, with the help of a firearm, alter the course of history.

Electromagnetic Scattering by Particles and Particle Groups

Michael I. Mishchenko, 2014-04-24 This self-contained and accessible book provides a thorough introduction to the basic physical and mathematical principles required in studying the scattering and absorption of light and other electromagnetic radiation by particles and particle groups. For the first time the theories of electromagnetic scattering, radiative transfer, and weak

localization are combined into a unified, consistent branch of physical optics directly based on the Maxwell equations. A particular focus is given to key aspects such as time and ensemble averaging at different scales, ergodicity, and the physical nature of measurements afforded by actual photopolarimeters. Featuring over 120 end-of-chapter exercises, with hints and solutions provided, this clear, one-stop resource is ideal for self-study or classroom use, and will be invaluable to both graduate students and researchers in remote sensing, physical and biomedical optics, optical communications, optical particle characterization, atmospheric physics and astrophysics.

Western Corn Rootworm Stefan Vidal,Ulrich Kuhlmann,C.

Richard Edwards,2005 This book provides a comprehensive review of current knowledge of this insect pest and how it might be managed both in North America and in Europe. Comparisons are drawn between plant protection techniques currently applied in North America and their potential application in Europe. Cultural, biotechnical and biological control measures are also addressed, as are ecological baseline data such as population dynamics of the pest in North America and Europe, economic thresholds and

aspects of its behaviour. This book will be of significant interest to those working in the areas of entomology and integrated crop protection throughout the world.--BOOK JACKET.

Advances in Production Management Systems. Artificial Intelligence for Sustainable and Resilient Production Systems
Alexandre Dolgui,Alain Bernard,David Lemoine,Gregor von Cieminski,David Romero,2021-09-01 The five-volume set IFIP AICT 630, 631, 632, 633, and 634 constitutes the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2021, held in Nantes, France, in September 2021.* The 378 papers presented were carefully reviewed and selected from 529 submissions. They discuss artificial intelligence techniques, decision aid and new and renewed paradigms for sustainable and resilient production systems at four-wall factory and value chain levels. The papers are organized in the following topical sections: Part I: artificial intelligence based optimization techniques for demand-driven

manufacturing; hybrid approaches for production planning and scheduling; intelligent systems for manufacturing planning and control in the industry 4.0; learning and robust decision support systems for agile manufacturing environments; low-code and model-driven engineering for production system; meta-heuristics and optimization techniques for energy-oriented manufacturing systems; metaheuristics for production systems; modern analytics and new AI-based smart techniques for replenishment and production planning under uncertainty; system identification for manufacturing control applications; and the future of lean thinking and practice

Part II: digital transformation of SME manufacturers: the crucial role of standard; digital transformations towards supply chain resiliency; engineering of smart-product-service-systems of the future; lean and Six Sigma in services healthcare; new trends and challenges in reconfigurable, flexible or agile production system; production management in food supply chains; and sustainability in production planning and lot-sizing

Part III: autonomous robots in delivery logistics; digital transformation approaches in production management; finance-driven supply chain; gastronomic service system design; modern scheduling and applications in industry 4.0; recent advances in sustainable

manufacturing; regular session: green production and circularity concepts; regular session: improvement models and methods for green and innovative systems; regular session: supply chain and routing management; regular session: robotics and human aspects; regular session: classification and data management methods; smart supply chain and production in society 5.0 era; and supply chain risk management under coronavirus Part IV: AI for resilience in global supply chain networks in the context of pandemic disruptions; blockchain in the operations and supply chain management; data-based services as key enablers for smart products, manufacturing and assembly; data-driven methods for supply chain optimization; digital twins based on systems engineering and semantic modeling; digital twins in companies first developments and future challenges; human-centered artificial intelligence in smart manufacturing for the operator 4.0; operations management in engineer-to-order manufacturing; product and asset life cycle management for smart and sustainable manufacturing systems; robotics technologies for control, smart manufacturing and logistics; serious games analytics: improving games and learning support; smart and sustainable production and supply chains; smart methods and techniques for sustainable supply chain

management; the new digital lean manufacturing paradigm; and the role of emerging technologies in disaster relief operations: lessons from COVID-19 Part V: data-driven platforms and applications in production and logistics: digital twins and AI for sustainability; regular session: new approaches for routing problem solving; regular session: improvement of design and operation of manufacturing systems; regular session: crossdock and transportation issues; regular session: maintenance improvement and lifecycle management; regular session: additive manufacturing and mass customization; regular session: frameworks and conceptual modelling for systems and services efficiency; regular session: optimization of production and transportation systems; regular session: optimization of supply chain agility and reconfigurability; regular session: advanced modelling approaches; regular session: simulation and optimization of systems performances; regular session: AI-based approaches for quality and performance improvement of production systems; and regular session: risk and performance management of supply chains *The conference was held online.

William Clark Russell and the Victorian Nautical Novel Andrew

Nash,2015-10-06 William Clark Russell wrote more than forty nautical novels. Immensely popular in their time, his works were admired by contemporary writers, such as Conan Doyle, Stevenson and Meredith, while Swinburne, considered him 'the greatest master of the sea, living or dead'. Based on extensive archival research, Nash explores this remarkable career.
