The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

People ask me what do I do for a living, that would take all day but I can say I was once a king of the road, a hobo by trade, a man of the street. School, sure, school of hard knocks and I got plenty of lumps to prove it. I would hop on trains and have been from the east coast to the west coast about 25 times and I do know all the trains in between. I've been known to have sticky fingers. I pick not only locks but old stogies, you know, cigarette buds off the ground and I've done it all from pushing broom to pot washing and digging graves but I rather not talk about that cos I never heard of dumping 3 or 4 bodies into the same pit. If you see me coming step aside cos if you don't I will send you to the promise land. Hey enjoy Roger Miller he too is a hobo like me, a King Of The Road, ciao Jimmy

Friends Robin Dunbar, 2021-03-04 'Fascinating...In essence, the number and quality of our friendships may have a bigger influence on our happiness, health and mortality risk than anything else in life save for giving up smoking' Guardian, Book of the Day Friends matter to us, and they matter more than we think. The single most surprising fact to emerge out of the medical literature over the last decade or so has been that the number and quality

of the friendships we have has a bigger influence on our happiness, health and even mortality risk than anything else except giving up smoking. Robin Dunbar is the world-renowned psychologist and author who famously discovered Dunbar's number: how our capacity for friendship is limited to around 150 people. In *Friends*, he looks at friendship in the round, at the way different types of friendship and family relationships intersect, or at the complex of psychological and behavioural mechanisms that underpin friendships and make them possible - and just how complicated the business of making and keeping friends actually is. Mixing insights from scientific research with first person experiences and culture, *Friends* explores and integrates knowledge from disciplines ranging from psychology and anthropology to neuroscience and genetics in a single magical weave that allows us to peer into the incredible complexity of the social world in which we are all so deeply embedded. Working at the coalface of the subject at both research and personal levels, Robin Dunbar has written the definitive book on how and why we are friends.
