New Technologies and the Media Gerard Goggin,2017-09-16 The landscape of the media is changing - and at an ever-increasing pace. New technologies are fast transforming the way we consume information, and the way we live our lives. New Technologies and the Media by Professor Gerard Goggin (University of Sydney) is an authoritative exploration of the impact of the internet, the iPad, and Wikileaks on contemporary news, journalism and broadcasting. Steering clear of technological jargon, this is a short, sharp, simple guide through this complex subject. This book is essential reading for all media students and researchers - and for anyone interested in getting to grips with the ways in which media is becoming a progressively more pervasive, intimate and powerful part of life in the 2010s. It engagingly examines the issues raised by the presence of new technologies across news, television, internet and mobiles. Under discussion are: new audiences forming around user-generated content; the future of news and journalism; the rapid shape-shifting of broadcasting in the face of the internet; an explosion of devices; the viewer as couch-commander; blogging, social media and citizen journalism and public-service media; the cultural politics of digital cultures and technologies. Featuring fascinating case studies of modern phenomena such as the iPhone, this book examines current cutting-edge technologies by situating them within the broader context of communications and media history. Written by an expert in the field, it cuts through the controversial and confusing debate surrounding the use of new technologies in the media and gives a clear, considered account of the major issues involved. By accessibly introducing the key theories of technology, this book will equip its readers with a solid critical approach that they can use across their studies, investigations and work in media. It provides the tools needed by students and researchers to accurately analyse and effectively evaluate how new technologies shape, and are shaped by, media. New Technology and the Media offers an excellent insight into an important, exciting, expanding area of interest.

Speaking the Truth Samuel Wells ,2018-09-28 ‘Truth’ is a difficult subject in a pluralistic culture, and ‘the truth’ is even more challenging. Yet the preacher’s call is to be a speaker of truth – the truth of God in Jesus Christ. What does it take to speak the truth faithfully as a preacher of the gospel, for that truth to be heard, and for words and ideas to generate actions and build relationships? Samuel Wells has learned that speaking the truth means telling the Christian story alongside the contemporary secular story. It means helping your hearers perceive both the harmonies and the dissonance between the two. It means inviting them, with both conviction and humility, to decide how their own story is going to be shaped by this truth. In this volume, he reflects on the practice of speaking about God, faith, the Bible, discipleship, resurrection, salvation, politics and truth, and on preaching that resonates in particular contexts. It is a book to encourage and give confidence to all preachers, and preachers in training.

User-focused and combining experience with research, the book will interest users of these kinds of technology, health professionals who might introduce and/or prescribe them, engineers who develop and sell assistive technological gadgets, and architects who build safe homes – as well as researchers and students who work in these fields.
