Erica Sadun, Steve Sande

*Fox 8* George Saunders,2013-04-09 From the #1 New York Times bestselling author of *Lincoln in the Bardo*, a darkly comic short story about the unintended consequences unleashed by our quest to tame the natural world—featuring gorgeous black-and-white illustrations by Chelsea Cardinal. Fox 8 has always been known as the daydreamer in his pack, the one his fellow foxes regard with a knowing snort and a roll of the eyes. That is, until he develops a unique skill: He teaches himself to speak “Yuman” by hiding in the bushes outside a house and listening to children’s bedtime stories. The power of language fuels his abundant curiosity about people—even after “danjer” arrives in the form of a new shopping mall that cuts off his food supply, sending Fox 8 on a harrowing quest to help save his pack. Told with his distinctive blend of humor and pathos, Fox 8 showcases the extraordinary imaginative talents of George Saunders, whom The New York Times called “the writer for our time.”

"If you want to achieve more (without going nuts), read this book."—Charles Duhigg, author of The Power of Habit Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Weather by the Numbers Kristine C. Harper, 2012-01-13 The history of the growth and professionalization of American meteorology and its transformation into a physics- and mathematics-based scientific discipline. For much of the first half of the twentieth century, meteorology was more art than science, dependent on an individual forecaster's lifetime of local experience. In Weather by the Numbers, Kristine Harper tells the story of the

transformation of meteorology from a “guessing science” into a sophisticated scientific discipline based on physics and mathematics. What made this possible was the development of the electronic digital computer; earlier attempts at numerical weather prediction had foundered on the human inability to solve nonlinear equations quickly enough for timely forecasting. After World War II, the combination of an expanded observation network developed for military purposes, newly trained meteorologists, savvy about math and physics, and the nascent digital computer created a new way of approaching atmospheric theory and weather forecasting. This transformation of a discipline, Harper writes, was the most important intellectual achievement of twentieth-century meteorology, and paved the way for the growth of computer-assisted modeling in all the sciences.
