James Baldwin Brown

**Mariners Weather Log** ,1983 November issue includes abridged index to yearly volume.

**Wars of the Americas [2 volumes]** David F. Marley,2008-02-11 A comprehensive account of every major war and battle fought in the Americas, this revised edition of the award-winning Wars of the Americas offers up-to-date scholarship on the conflicts that have shaped a hemisphere. When it was first published in 1998, Wars of the Americas: A Chronology of Armed Conflict in the Western Hemisphere was the only major reference focused exclusively on warfare in all its forms in North, Central, and South America over the past five centuries. Now this acclaimed resource returns in a dramatically expanded new edition. For its second edition, Wars of the Americas has been doubled in size to two full volumes: the first covers all wars and major battles from the earliest Spanish conquests through the 18th-century colonial rivalries that gripped the hemisphere. The second volume covers covers the American Revolutionary War and all subsequent conflicts up to the present. In addition to exhaustive updating throughout and a deeper focus on the historical context of each conflict, the new edition includes new coverage of the present-day drug cartel wars, international terrorism, and the ever-evolving relationships between the United States and the nations of Latin America.

*Energy Transition, Climate Change, and COVID-19* Fateh Belaïd,Anna Cretì,2021-12-06 This volume analyzes the impacts of the COVID-19 pandemic on energy transition and climate change from an economic perspective. Since its emergence in early 2020, the COVID-19 pandemic has had a powerful effect on multiple facets of the global economy. The unknown scope and duration of the pandemic and its associated economic shocks have made energy security and the process of clean energy transition highly unpredictable. To combat this, this edited volume presents a wide range of theoretical and empirical research at the nexus of the COVID-19 pandemic and energy, resource, and environmental economics. Chapters focus on four major themes: the impact of crises on energy security, the role of resilient energy systems in society, the challenges of clean energy transition, and economic impacts of COVID-19 on climate change. Providing rigorous analysis of an evolving situation that will continue to impact the global energy market, this volume will be of interest to researchers and students of energy economics, environmental economics, and resource economics as well as policy professionals involved in climate change and energy transition.
