War North of 80 Wilhelm Dege,2004 Dege was leader of a German weather station in a remote corner of Svalbard during the winter of 1944-45. It was secret, because the Allies were trying to prevent the Germans from tracking weather in the north. Though he and his crew knew the war had ended, it was not until May 1945 that the Allies sent a vessel north to fetch them; thus they were the last German troops to surrender. His account was published in German in 1954, and his here translated by William Barr, a historian of Arctic exploration. The English edition incorporates material from his typescript that was not included in the original. It is co-published with the Arctic Institute of North America and the University Press of Colorado, and distributed in the US by Michigan State University Press. Routledge Diccionario Técnico Inglés Routledge,1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficultly accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

Climate Variability and Change in the Rift Valley and Blue Nile Basin, Ethiopia Abate Mekuriaw Bizuneh,2013 This study deals with three interrelated problems. First, it pursues the quest for local knowledge to understand climate variability and change at local levels. Due to controversies, uncertainties, skepticism and embedded economic and political interests in the climate change discourse, effective world collective action is more likely to delay for quite some time to come. Moreover, as climate change discourse remains very weak at engaging local knowledge, policies that emanate from the discourse might be less responsive to local climate problems both in terms of policy ingredients and time frame. So, having highlighting the paramount importance of local knowledge, this study documents and critically analyzes this knowledge system among subsistence farmers in Ethiopia. Secondly, it analyzes the economic impacts of climate variability and change and adaptation through quantitative methods with a special focus on crop production. Finally, it analyzes the factors that influence adaptive behavior. In so doing, it challenges the traditional approach of adaptation research and brings in a conceptual framework borrowed from psychosocial theory and empirically tests the approach in explaining adaptive behavior of farmers.
