Authors of the Storm Gary Alan Fine, 2010-10-21 Whether it is used as an icebreaker in conversation or as the subject of serious inquiry, the weather is one of the few subjects that everyone talks about. And though we recognize the faces that bring us the weather on television, how government meteorologists and forecasters go about their jobs is rarely scrutinized. Given recent weather-re...

Towards the “Perfect” Weather Warning Brian Golding, 2022-06-20 This book is about making weather warnings more effective in saving lives, property, infrastructure and livelihoods, but the underlying theme of the book is partnership. The book represents the warning process as a pathway linking observations to weather forecasts to hazard forecasts to socio-economic impact forecasts to warning messages to the protective decision, via a set of five bridges that cross the divides between the relevant organisations

and areas of expertise. Each bridge represents the communication, translation and interpretation of information as it passes from one area of expertise to another and ultimately to the decision maker, who may be a professional or a member of the public. The authors explore the partnerships upon which each bridge is built, assess the expertise and skills that each partner brings and the challenges of communication between them, and discuss the structures and methods of working that build effective partnerships. The book is ordered according to the “first mile” paradigm in which the decision maker comes first, and then the production chain through the warning and forecast to the observations is considered second. This approach emphasizes the importance of co-design and co-production throughout the warning process. The book is targeted at professionals and trainee professionals with a role in the warning chain, i.e. in weather services, emergency management agencies, disaster risk reduction agencies, risk management sections of infrastructure agencies. This is an open access book.

The Weather Obsession Lawrie Zion,2018-02-08 We have come a long way since the days when weather information could only be found in the back pages of newspapers. The Weather Obsession takes

the temperature of modern weather media and investigates how it has fuelled our fascination with all things climatic. Weather information now pervades everything from our mobile devices to online news and social media, while the Bureau of Meteorology is a daily destination for millions of us. What has made weather so much more than a mere talking point? What happens when this data becomes big business? And what is at stake when it comes to how the media frames our understanding of the relationship between extreme weather and climate change? The Weather Obsession lifts the lid on our insatiable appetite for meteorological media and shows that while we might not have stopped worrying about the forecast, almost all of us have learnt to love the BOM.

Stormy Weather Mark Maslin, 2002 Stormy Weather provides a unique, accessible and comprehensive account of the dramatic effects of global warming around the world. Analysing the causes and reasons for storms and why they are so destructive and also documenting the freak weather and mega-storms we have experienced over the last decade, it draws attention to the precarious state of our world today, and how things are set to get worse as time goes on. The final chapter of the book provides hope and encouragement in a discussion of the measures that could and should be taken before it is too late, to mitigate disastrous storms and save many thousands of precious lives and to ultimately slow down the gradual erosion of our planet.
