The Long-Run Performance of Global Equity Offerings Stephen R. Foerster,1999 This study investigates the long-run return performance of non-U.S. firms that raise equity capital in U.S. markets. Overall, our sample of 333 global equity offerings with U.S. depositary receipt (ADR) tranches from 35 countries in Asia, Latin America, and Europe under-perform local and global benchmarks by 8% to 39% over the three years following issuance. We show that differences in long-run returns are related to the scope and magnitude of investment barriers that induce segmentation of capital markets around the world. Specifically, companies from emerging markets and those that issue equity by way of Rule 144A private placements significantly underperform publicly-listed issues and those of companies in developed markets. We also show that inter-market competition for order flow in the post-issuance period affects their long-run return performance. Post-issuance cumulative abnormal returns are most significantly and positively related to the ability of the offering to generate a larger share of U.S. trading volume.

Thank You Power Deborah Norville,2008-10-07 Deborah Norville's groundbreaking and persuasive book argues that gratitude is the secret key to unlocking one's full life potential. Thank You. Can such small words hold life-changing power? Yes! Rooted in science, presented from a spiritual perspective, Thank You Power details the surprising life improvements that can stem from the practice of gratitude. In this eye-opening book, Deborah Norville brings together for the first time the behavioral and psychological research that prove what people of faith have long known: giving thanks brings life blessings. Beginning with two small words, thank you, Norville shows how anyone can be happier and more resilient, have better relationships, improved health, and less stress. After two years of scientific research, Norville brings it all together with powerful personal stories of thank you power in action and gives specific steps for readers to cultivate thank you power and put it to work in their own lives.

RedDevil 4 Eric C. Leuthardt,2014-02-04 RedDevil 4 is spine-tingling techno-thriller based on cutting edge research from surgeon and inventor Eric C. Leuthardt. Renowned neurosurgeon Dr. Hagan Maerici is on the verge of a breakthrough in artificial intelligence that could change the way we think about human consciousness. Obsessed with his job and struggling to save his marriage, Dr. Maerici is forced to put his life's work on the line when a rash of brutal murders strikes St. Louis. Edwin Krantz, an aging, technophobic detective, and his partner, Tara Dezner, are tasked with investigating the horrifying killings. Shockingly, the murders have all been committed by prominent citizens who have no obvious motives or history of violence. Seeking an explanation for the suspects' strange behavior, Krantz and Denzer turn to Dr. Maerici, who believes that the answer lies within the killers' brains themselves. Someone is introducing a glitch into the in-brain computer systems of the suspects—a virus that turns ordinary citizens into murderers. With time running out, this trio of unlikely allies must face a gauntlet of obstacles, both human and A.I., as they attempt to avert disaster. Empirical Asset Pricing Turan G. Bali,Robert F. Engle,Scott Murray,2016-02-26 “Bali, Engle, and Murray have produced a highly accessible introduction to the techniques and evidence of modern empirical asset pricing. This book should be read and absorbed by every serious student of the field, academic and professional.” Eugene Fama, Robert R. McCormick Distinguished Service Professor of Finance, University of Chicago and 2013 Nobel Laureate in Economic Sciences “The empirical analysis of the cross-section of stock returns is a monumental achievement of half a century of finance research. Bali, Engle, and Murray’s clear and careful guide to these issues provides a firm foundation for future discoveries.” John Campbell, Morton L. and Carole S. Olshan Professor of Economics, Harvard University “Bali, Engle, and Murray provide clear and accessible descriptions of many of the most important empirical techniques and results in asset pricing.” Kenneth R. French, Roth Family Distinguished Professor of Finance, Tuck School of Business, Dartmouth College “This exciting new book presents a thorough review of what we know about the cross-section of stock returns. Given its comprehensive nature, systematic approach, and easy-to-understand language, the book is a valuable resource for any introductory PhD class in empirical asset pricing.” Lubos Pastor, Charles P. McQuaid Professor of Finance, University of Chicago Empirical Asset Pricing: The Cross Section of Stock Returns is a comprehensive overview of the most important findings of empirical asset pricing research. The book begins with thorough expositions of the most prevalent econometric techniques with in-depth discussions of the implementation and interpretation of results illustrated through detailed examples. The second half of the book applies these techniques to demonstrate the most salient patterns observed in stock returns. The phenomena documented form the basis for a range of investment strategies as well as the foundations of contemporary empirical asset pricing research. Empirical Asset Pricing: The Cross Section of Stock Returns also includes: Discussions on the driving forces behind the patterns observed in the stock market An extensive set of results that serve as a reference for practitioners and academics alike Numerous references to both contemporary and foundational research articles Empirical Asset Pricing: The Cross Section of Stock Returns is an ideal textbook for graduate-level courses in asset pricing and portfolio management. The book is also an indispensable reference for researchers and practitioners in finance and economics. Turan G.
