The Past Web Daniel Gomes, Elena Demidova, Jane Winters, Thomas Risse, 2021-06-30 This book provides practical information about web archives, offers inspiring examples for web archivists, raises new challenges, and shares recent research results about access methods to explore information from the past preserved by web archives. The book is structured in six parts. Part 1 advocates for the importance of web archives to preserve our collective memory in the digital era, demonstrates the problem of web ephemera and shows how web archiving activities have been trying to address this challenge. Part 2 then focuses on different strategies for selecting web content to be preserved and on the media types that different web archives host. It provides an overview of efforts to address the preservation of web content as well as smaller-scale but high-quality collections of social media or audiovisual content. Next, Part 3 presents examples of initiatives to improve access to archived web information and provides an overview of access mechanisms for web archives designed to be used by humans or automatically accessed by machines. Part 4 presents research use cases for web archives. It also discusses how to engage more researchers in exploiting web archives and provides inspiring research studies performed using the exploration of web archives. Subsequently, Part 5 demonstrates that web archives should become crucial infrastructures for modern connected societies. It makes the case for developing web archives as research infrastructures and presents several inspiring examples of added-value services built on web archives. Lastly, Part 6 reflects on the evolution of the web and the sustainability of web archiving activities. It debates the requirements and challenges for web archives if they are to assume the responsibility of being societal infrastructures that enable the preservation of memory. This book targets academics and advanced professionals in a broad range of research areas such as digital humanities, social sciences, history, media studies and information or computer science. It also aims to fill the need for a scholarly overview to support lecturers who would like to introduce web archiving into their courses by offering an initial reference for students.

The Web as History Niels Brügger, Ralph Schroeder, 2017-03-06 The World Wide Web has now been in use for more than 20 years. From early browsers to today's principal source of information, entertainment and much else, the Web is an integral part of our daily lives, to the extent that some people believe 'if it's not online, it doesn't exist.' While this statement is not entirely true, it is becoming increasingly accurate, and reflects the Web's role as an indispensable treasure trove. It is curious, therefore, that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society, despite making good use of letters, novels, newspapers, radio and television programmes, and other pre-digital artefacts. This volume argues that now is the time to ask what we have learnt from the Web so far. The 12 chapters explore this topic from a number of interdisciplinary angles – through histories of national web spaces and case studies of different government and media domains – as well as an introduction that provides an overview of this exciting new area of research.

9/11 Ten Years Later David Ray Griffin, 2012-04-10 On the tenth anniversary of the September 11, 2001 terrorist attacks, David Ray Griffin reviews the troubling questions that remain unanswered *9/11 Ten Years Later* is David Ray Griffin's tenth book about the tragic events of September 11, 2001. Asking in the first chapter whether 9/11 justified the war in Afghanistan, he explains why it did not. In the following three chapters, devoted to the destruction of the World Trade Center, Griffin asks why otherwise rational journalists have endorsed miracles (understood as events that contradict laws of science). Also, introducing the book's theme, Griffin points out that 9/11 has been categorized by some social

scientists as a state crime against democracy. Turning next to debates within the 9/11 Truth Movement, Griffin reinforces his claim that the reported phone calls from the airliners were faked, and argues that the intensely debated issue about the Pentagon—whether it was struck by a Boeing 757—is quite unimportant. Finally, Griffin suggests that the basic faith of Americans is not Christianity but nationalist faith—which most fundamentally prevents Americans from examining evidence that 9/11 was orchestrated by U.S. leaders—and argues that the success thus far of the 9/11 state crime against democracy need not be permanent.

Critical Cyberculture Studies David Silver, Adrienne Massanari, 2006-09 This work indexes the literature of the German Early and High Middle Ages according to geographical location. Separate articles investigate the major literary centers - such as Fulda, Regensburg, and Braunschweig. The compilation illustrates both the regional concentrations and interconnections of the period, providing for the first time a compact reference work for regional literary historiography.

Towards a Philosophy of Digital Media Alberto Romele, Enrico Terrone, 2018-05-17 This book uses the conceptual tools of philosophy to shed light on digital media and on the way in which they bear upon our existence. At the turn of the century, the rise of digital media significantly changed our world. The digitizing of traditional media has extraordinarily increased the circulation of texts, sound, and images. Digital media have also widened our horizons and altered our relationship with others and with ourselves. Information production and communication are still undoubtedly significant aspects of digital media and life. Recently, however, recording, registration and keeping track have taken the upper hand in both online practices and the imaginaries related to them. The essays in this book therefore focus primarily on the idea that digital media involve a significant overlapping between communication and recording.

Trying to Make It Rajeev V. Gundur, 2022-08-15 Trying to Make It is R. V. Gundur's journey from the US-Mexico border to America's heartland, from America's prisons to its streets, in search of the true story of the drug trade and the people who participate in it. The book begins in the Paso del Norte area, encompassing the sister cities of Ciudad Juárez and El Paso, which has been in the public eye as calls for securing the border persist. From there, it moves on to Phoenix, which was infamously associated with the drug trade through a series of kidnappings. Finally, the book goes on to Chicago, which has been a lightning rod of criticism for its gangs and violence. Gundur highlights the similarities and differences that exist in the American drug trade within the three sites and how they relate to current drug trade narratives in the US. At each stop, the reader is transported to the city's historical and contemporary contexts of the drug trade and introduced to the individuals who have lived them. Drug retailers, street and prison gang members, wholesalers, and the law enforcement personnel who try to stop them offer readers a comprehensive look at how various illicit enterprises work together to supply the drugs that American users demand. Most importantly, through a combination of macro- and microlevel vantage points, and comparative analysis of three key sites in illicit drug operations, the stories in Trying to Make It remind us that the people involved in the drug trade, for the most part, do not deserve vilification. Far from being a seemingly uniform, widespread threat or an unlimited array of bogeymen and women, they are ordinary people, living ordinary lives, just trying to make it.

Digital Extremisms Mark Littler, Benjamin Lee, 2020-01-25 This book explores the use of the internet by (non-Islamic) extremist groups, drawing together research by scholars across the social sciences and humanities. It offers a broad overview of the best of research in this area, including research contributions that address far-right, (non-Islamic) religious, animal rights, and nationalist violence online, as well as a discussion of the policy and

research challenges posed by these unique and disparate groups. It offers an academically rigorous, introductory text that addresses extremism online, making it a valuable resource for students, practitioners and academics seeking to understand the unique characteristics such risks present.

9.11: The New Evidence Ian Henshall, 2021-09-09 The original 9/11 Revealed attracted lavish praise from reviewers in the Daily Mail and Sunday Times for the 'huge gaps' it exposed in the official 9/11 story. It became a non-fiction bestseller despite a wall of silence by the broadcast media and condemnation in a special web page set up by the US State Department. Since then the story has produced many sinister new twists, including: Pentagon whistleblowers have accused the 'Independent 9/11 Commission' of lying; long-suppressed eyewitness testimony has been released confirming multiple explosions in the Twin Towers before and during their collapses; the much vaunted video purporting to prove that Flight 77 hit the Pentagon showed nothing at all; and an analysis of terrorist trials and arrests since 2001 indicates that far from the '600 Al Qaeda sleeper cells in the US' (CIA) there were none at all. In this sequel to 9/11 Revealed, Ian Henshall examines the precedents of black operations by the US/UK, from Northern Ireland to Italy, from Vietnam to Kosovo; he looks at the various 9/11 theories, including the latest twists in the official story, and tests them against the evidence. Finally, he asks what might happen when the storm of popular outrage collides with the regime in Washington and London and outlines the radical changes needed if Washington and London are ever again to function as genuine democracies.

The Internet Under Crisis Conditions National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on the Internet Under Crisis Conditions: Learning from September 11, 2003-01-31 This report presents findings of a workshop featuring representatives of Internet Service Providers and others with access to data and insights about how the Internet performed on and immediately after the September 11 attacks. People who design and operate networks were asked to share data and their own preliminary analyses among participants in a closed workshop. They and networking researchers evaluated these inputs to synthesize lessons learned and derive suggestions for improvements in technology, procedures, and, as appropriate, policy.

The Oxford Handbook of Endangered Languages Kenneth L. Rehg, Lyle Campbell, 2018-07-18 The endangered languages crisis is widely acknowledged among scholars who deal with languages and indigenous peoples as one of the most pressing problems facing humanity, posing moral, practical, and scientific issues of enormous proportions. Simply put, no area of the world is immune from language endangerment. The Oxford Handbook of Endangered Languages, in 39 chapters, provides a comprehensive overview of the efforts that are being undertaken to deal with this crisis. A comprehensive reference reflecting the breadth of the field, the Handbook presents in detail both the range of thinking about language endangerment and the variety of responses to it, and broadens understanding of language endangerment, language documentation, and language revitalization, encouraging further research. The Handbook is organized into five parts. Part 1, Endangered Languages, addresses the fundamental issues that are essential to understanding the nature of the endangered languages crisis. Part 2, Language

Documentation, provides an overview of the issues and activities of concern to linguists and others in their efforts to record and document endangered languages. Part 3, Language Revitalization, includes approaches, practices, and strategies for revitalizing endangered and sleeping (dormant) languages. Part 4, Endangered Languages and Biocultural Diversity, extends the discussion of language endangerment beyond its conventional boundaries to consider the interrelationship of language, culture, and environment, and the common forces that now threaten the sustainability of their diversity. Part 5, Looking to the Future, addresses a variety of topics that are certain to be of consequence in future efforts to document and revitalize endangered languages.

Michael Moss on Archives Julie Mcleod, Andrew Prescott, Susan Stuart, David Thomas, 2023-11-17 Michael Moss on Archives brings together selected outputs from an internationally renowned archival scholar, who explored the theory and practice of archives and records management. Comprising a selection of 11 of Moss' most significant archival writings, the book demonstrates the development of his thinking in archival theory and practice over the past 20 years. Michael Moss was a towering figure in modern archival writing and was able to push the boundaries of the discipline, notably with his analysis of how modern governments create records and his speculations about the future of the archive in the digital world. Bringing together in one place Moss' most significant writings, alongside a comprehensive bibliography, this book documents a significant contribution to British and international archival theory and practice. Each essay is preceded by a critical introduction, written by a leading archival scholar, assessing the piece and setting it in a wider archival or historical context, while an overall introduction by the editors provides biographical information and describes the development of Michael's archival thinking. Michael Moss on Archives will be of interest to scholars and students engaged in the study of archival science, library and information science, history, digital humanities, and media studies. It should also be of interest to professionals who work in archives and records management.

The Diary Batsheva Ben-Amos, Dan Ben-Amos, 2020-03-10 The diary as a genre is found in all literate societies, and these autobiographical accounts are written by persons of all ranks and positions. The Diary offers an exploration of the form in its social, historical, and cultural-literary contexts with its own distinctive features, poetics, and rhetoric. The contributors to this volume examine theories and interpretations relating to writing and studying diaries; the formation of diary canons in the United Kingdom, France, United States, and Brazil; and the ways in which handwritten diaries are transformed through processes of publication and digitization. The authors also explore different diary formats, including the travel diary, the private diary, conflict diaries written during periods of crisis, and the diaries of the digital era, such as blogs. The Diary offers a comprehensive overview of the genre, synthesizing decades of interdisciplinary study to enrich our understanding of, research about, and engagement with the diary as literary form and historical documentation.
