The New Digital Storytelling Bryan Alexander,2017-07-20 Newly revised and updated, this is the essential guide to state-of-the-art digital storytelling for audiences, creators, and teachers. Written for everyone interested in the communication potential of digital media, including educators, marketers, communication professionals, and community activists, this is the ultimate guide to harnessing technology for storytelling. No other book covers the digital

storytelling movement as thoroughly as this updated second edition of a popular work, nor does any incorporate as many technologies, from video to augmented reality, mobile devices to virtual reality. The book combines history, analysis, and practical guidance about digital storytelling. It begins with a history that encompasses an exploration of storytelling itself, as well as a description of narratives using digital tools from the 1980s through 2000. From there, the author dives into modern digital storytelling, offering analysis and guidance regarding the use of digital video, podcasting, social media, gaming, mobile devices, and virtual and augmented reality. The work concludes with practical advice about how to create and share digital stories using the most current tools so even the new would-be storyteller can create their first digital narrative. Of course, the second edition is updated to take into account the many ways the field has advanced since the original book appeared. With many new examples of digital stories, this edition's evidence base is current and fresh. New or transformed technologies are also addressed, including virtual reality; mobile devices that have become mainstream tools for creating, sharing, and experiencing digital stories; and the wide variety of new storytelling apps and services.

Thermoforming of Single and Multilayer Laminates
Syed Ali Ashter, 2013-11-07 Thermoforming of Single and Multilayer Laminates explains the fundamentals of lamination and plastics thermoforming technologies along with current and new developments. It focuses on properties and

thermoforming mechanics of plastic films and in particular single and multilayered laminates, including barrier films. For environmental and economic reasons, laminates are becoming increasingly important as a replacement for solid sheets and paint finishes in many industries, including transportation, packaging, and construction. Yet the processes of film formability during the extensive deformation and elevated temperatures experienced in conventional processing technologies, such as thermoforming, are poorly understood by most engineers. This book covers production processes, such as extrusion, calendaring, and casting, as well as mechanical and impact testing methods. It also describes how testing protocols developed for metals can be leveraged for plastic films and laminates, and includes a thorough discussion on methods for performing optical strain analysis. Applications in transportation vehicles and packaging, including packaging for food, medical and electronics applications, sports equipment, and household appliances, are discussed. Safety, recycling and environmental aspects of thermoforming and its products complete the book. First comprehensive source of information and hands-on guide for the thermoforming of multilayered laminates Covers applications across such sectors as automotive, packaging, home goods, and construction Introduces new testing methods leveraging protocols used for metals

The Politicisation of Social Europe Corti, Francesco, 2022-01-14 While for some scholars the Euro crisis dashed the dream of Social Europe,

this thought-provoking book proposes a more nuanced assessment, challenging the notion of austerity as the only way forward. Tracing the evolution of the political debate on European social integration and its interplay with the European economic governance after the Euro crisis, it sheds light on the conflict dynamics and political conditions that enabled the progressive shift away from the initial post-crisis EU 'conservative reflex', towards a new European holding environment for flourishing welfare states.
