Marsha Ann Tate

Web Analytics 2.0 Avinash Kaushik,2009-10-26 Adeptly address today's business challenges with this powerful new book from web analytics thought leader Avinash Kaushik. Web Analytics 2.0 presents a new framework that will permanently change how you think about analytics. It provides specific recommendations for creating an actionable strategy, applying analytical techniques correctly, solving challenges such as measuring social media and multichannel campaigns, achieving optimal success by leveraging experimentation, and employing tactics for truly listening to your customers. The book will help your organization become more data driven while you become a super analysis ninja!

Electronic Commerce United States. Congress. House. Committee on Commerce,1998

Electronic Commerce: Building tomorrow's information infrastructure; doing business online; the future of the domain name system; consumer protection in cyberspace; privacy in cyberspace United States. Congress. House. Committee on Commerce,United States. Congress. House. Committee on Commerce. Subcommittee on Health and the Environment,1998

Introduction to the Semantic Web and Semantic Web Services Liyang Yu,2007-06-14 Even though the semantic Web is a relatively new and dynamic area of research, a whole suite of components, standards, and tools have already been developed around it. Using a concrete approach, *Introduction to the Semantic Web and Semantic Web Services* builds a firm foundation in the concept of the semantic Web, its principal technologies, its real-world applications, and its relevant coding examples. This introductory yet comprehensive book covers every facet of this exciting technology. After an introduction to the semantic Web concept, it discusses its major technical enablers and the relationships among these components. The author then presents several applications of the semantic Web, including Swoogle, FOAF, and a detailed design of a semantic Web search engine. The book concludes with discussions on how to add semantics to traditional Web service descriptions and how to develop a search engine for semantic Web services. Covering the building blocks of an advanced Web technology, this practical resource equips you with the tools to further explore the world of the semantic Web on your own.

Library Literature & Information Science ,2004 An index to library and information science literature.

Web Wisdom Marsha Ann Tate,Janet E. Alexander,1999-03-01 Web Wisdom is an essential reference for anyone needing to evaluate or establish information quality on the World Wide Web. The book includes easy to use checklists for step-by-step quality evaluations of virtually any Web page. The checklists can also be used by Web authors to help them ensure quality information on their pages. In addition, Web Wisdom addresses other important issues, such as understanding the ways that advertising and sponsorship may affect the quality of Web information. It features: * a detailed discussion of the items involved in evaluating Web information; * checklists tailored to the creation and evaluation of specific Web page types (advocacy, business, informational, news, personal, entertainment); * over 40 screen captures illustrating the principles presented in the book; * discussion of copyright issues and meta tags; and * a glossary of terms and bibliography.

your direct connection to the work of the World Wide Web Consortium (W3C) as it helps members understand the forces behind current developments and leads the way to further innovation.

Knitting the Semantic Web Jane Greenberg, Eva Méndez Rodríguez, 2013-04-03 The Semantic Web, extends the popular, day-to-day Web, enabling computers and people to effectively work together by giving information well-defined meaning. Knitting the Semantic Web explains the interdisciplinary efforts underway to build a more library-like Web through “semantic knitting.” The book examines foundation activities and initiatives leading to standardized semantic metadata. These efforts lead to the Semantic Web—a network able to support computational activities and provide people with services efficiently. Leaders in library and information science, computer science, and information intensive domains provide insight and inspiration to give readers a greater understanding of the evolution of the Semantic Web. Librarians and information professionals are uniquely qualified to play a major role in the development and maintenance of the Semantic Web. Knitting the Semantic Web closely examines this crucial relationship in detail. This single source reviews the foundations, standards, and tools underlying the Semantic Web and presents thoughtful perspectives in the context of 2.0 developments. Many chapters include figures to illustrate concepts and ideas, and the entire text is extensively referenced. Topics in Knitting the Semantic Web include: RDF, its expressive power, and its ability to underlie the new Library catalog card for the coming century the value and application for controlled vocabularies SKOS (Simple Knowledge Organization System), the newest Semantic Web language managing scheme versioning in the Semantic Web Physnet portal service for physics Semantic Web technologies in biomedicine developing the United Nations Food and Agriculture ontology Friend Of A Friend (FOAF) vocabulary specification—with a real world case study at a university Web/Library 2.0 and more Knitting the Semantic Web is a stimulating resource for professionals, researchers, educators, and students in library and information science, computer science, information architecture, Web design, and Web services.

Test Collection Based Evaluation of Information Retrieval Systems Mark Sanderson, 2010-06-03 Use of test collections and evaluation measures to assess the effectiveness of information retrieval systems has its origins in work dating back to the early 1950s. Across the nearly 60 years since that work started, use of test collections is a de facto standard of evaluation. This monograph surveys the research conducted and explains the methods and measures devised for evaluation of retrieval systems, including a detailed look at the use of statistical significance testing in retrieval experimentation. This monograph reviews more recent examinations of the validity of the test collection approach and evaluation measures as well as outlining trends in current research exploiting query logs and live labs. At its core, the modern-day test collection is little different from the structures that the pioneering researchers in the 1950s and 1960s conceived of. This tutorial and review shows that despite its age, this long-standing evaluation method is still a highly valued tool for retrieval research.

Government Information Insider, 1997

Web Wisdom Marsha Ann Tate, 2018-10-10 The World Wide Web has undergone tremendous growth since the first edition of Web Wisdom: How to Evaluate and Create Information Quality on the Web was conceived and written in the mid to late 1990s. The phenomenal global expansion of the internet, together with the increasing sophistication of online technologies and software applications, requires us to be more savvy Web users, especially given the growing complexity of Web-based information. This new edition of Web Wisdom covers key issues that users and creators of Web resources need to know regarding reliable and useful information on the Web, including social media content. Written in a straightforward and accessible format, the book also provides critical evaluation techniques and tools to enhance Web-based research and the creation of high quality content. Features Includes checklists comprised of basic questions to ask when evaluating or creating web resources Provides an expanded discussion of copyright, trademark, and other related issues with specific reference to web authoring Contains a chapter devoted exclusively to social media applications and their unique evaluation challenges Presents a new section that addresses the evaluation challenges that are related to combining traditional and social media content Offers a new

section focused on computer-generated text and its allied evaluation challenges Introduces a revised and expanded companion website that provides a variety of supplemental materials related to the evaluation and creation of web content as well as links to additional examples This book demonstrates how to adapt and apply the five core traditional evaluation criteria (authority, accuracy, objectivity, currency, coverage) originally introduced in the first edition, to the modern-day Web environment.
