**The Cashless Revolution** Martin Chorzempa, 2022-10-04 Financial Times, Best Books of 2022: Economics The startling picture of how China's revolution in finance and technology is changing both Wall Street and the way individuals manage their personal finances. The future of finance – the way Wall Street operates and how individuals manage their money – is on the verge of upheaval. And the force underlying the change comes from China, where finance and technology are being merged into a system with consequences that resonate far beyond China's border. The changes of this global revolution in finance and technology – fintech – will be as powerful as those wrought in social media, retailing and advertising by giants such as Amazon, Facebook, Google, and Twitter, which have overturned how we shop and communicate. China reinvented money with lightning speed, transforming a backward, antiquated cash-based finance system into one centered on super-apps created by technology giants Alibaba and Tencent. More powerful than anything available outside of China, they allow their billion users to pay, borrow, invest, buy goods and services, travel, chat (and far more) all fused together in one mobile phone application. Think Facebook, Google, Twitter, Goldman Sachs, Amazon, J.P. Morgan Chase all rolled into one app. We in the West need to understand China's cashless revolution for reasons ranging from the macroeconomic to issues of personal liberty: The cutting edge of finance is now in China, forcing major financial firms in the United States and the West to figure out how not to be left behind. China's cashless revolution is also a harbinger of our future if we let the genie out of the bottle and allow big tech to become big finance. As money goes digital and central banks around the world consider launching digital currencies, we may have both immense convenience and a frightening concentration of power that could violate our privacy, stifle competition, increase financial risk, and give big firms or the government more control over our financial lives. And, once this genie is out of the bottle, the struggle to put it back in may be impossible.

**WeChat and the Chinese Diaspora** Wanning Sun, Haiqing Yu, 2022-03-31 WeChat (the international version of Weixin), launched in 2012, has rapidly become the most favoured Chinese social media. Globally available, equally popular both inside and outside China and widely adopted by Chinese migrants, WeChat has fundamentally changed the ways in which Mandarin-speaking migrants conduct personal messaging, engage in group communication and community business activities, produce and distribute news, and access and share information. This book explores a wide range of issues connected to the ways in which WeChat works and is used, across the world among the newest members of the Chinese diaspora. Arguing that digital/social media afford a great degree of individual agency, as well as a collective capacity for sustaining an 'imagined community', the book shows how WeChat's assemblage of infrastructure and regulatory frameworks, technical capabilities, content and sense of community has led to the construction of a particular kind of diasporic Chinese world, at a time marked both by China's rise, and anxiety about Chinese influence in the West. Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Fashion Communication** Teresa Sádaba, Nadzeya Kalbaska, Francesca Cominelli, Lorenzo Cantoni, Marta Torregrosa Puig, 2021-09-20 These conference proceedings are the output of one of the first academic events of its nature happening globally, targeting fashion from a communication sciences perspective, including, in a broad sense, cultural heritage studies and marketing. The chapters present theoretical and empirical interdisciplinary work on how various communication practices impact the fashion industry and on societal fashion-related practices and values. The special focus of this volume is how digital transformation is changing the field and its utility to practitioners. Using these academic insights, practitioners can understand the core causes and reasons for trends and developments in the field of fashion communication and marketing.

**Online News-Prompted Public Spheres in China** Xuanzi Xu, 2022-10-25 This book argues that there are constant formations of online public spheres in present-day China, prompted by never-ending news. It contends that these publics are chronic, although individually they are usually transient. They

are networked, which enables them to go viral in hours, and they may engender unexpected consequences. These features explain why online public spheres survive in China even though censorship and information manipulation are pervasively and strategically maneuvered to guide or manufacture “public opinion”. The book also proposes that there are deeply entangled structural factors bolstering China's online news-prompted public spheres: the continuous flow of news information, the countless public spaces facilitated by China’s digital infrastructure and the rise of rights-conscious netizens. Pushing forward a new way of conceptualizing the idea of public spheres, this book contends clearly that public spheres are most often sparked by chronic news in today's media-saturated societies. Delving into the life cycles of public spheres, it goes beyond static analysis of individual public spheres and instead studies their five qualities, which, except for the networked quality, have never been systematically addressed in scholarship.

Beijing's Global Media Offensive Joshua Kurlantzick, 2022-12 A major analysis of how China is attempting to become a media and information superpower around the world, seeking to shape the politics, local media, and information environments of both East Asia and the World. Since China's ascendancy toward major-power status began in the 1990s, many observers have focused on its economic growth and expanding military. China's ability was limited in projecting power over information and media and the infrastructure through which information flows. That has begun to change. Beijing's state-backed media, which once seemed incapable having a significant effect globally, has been overhauled and expanded. At a time when many democracies' media outlets are consolidating due to financial pressures, China's biggest state media outlets, like the newswire Xinhua, are modernizing, professionalizing, and expanding in attempt to reach an international audience. Overseas, Beijing also attempts to impact local media, civil society, and politics by having Chinese firms or individuals with close links buy up local media outlets, by signing content-sharing deals with local media, by expanding China's social media giants, and by controlling the wireless and wired technology through which information now flows, among other efforts. In *Beijing's Global Media Offensive* - a major analysis of how China is attempting to build a media and information superpower around the world, and how this media power integrates with other forms of Chinese influence - Joshua Kurlantzick focuses on how all of this is playing out in both China's immediate neighborhood - Southeast Asia, Taiwan, Australia, and New Zealand - and also in the United States and many other parts of the world. He traces the ways in which China is trying to build an information and influence superpower, but also critically examines the new conventional wisdom that Beijing has enjoyed great success with these efforts. While China has worked hard to build a global media and information superpower, it often has failed to reap gains from its efforts, and has undermined itself with overly assertive, alienating diplomacy. Still, Kurlantzick contends, China's media, information and political influence campaigns will continue to expand and adapt, helping Beijing exports its political model and protect the ruling Party, and potentially damaging press freedoms, human rights, and democracy abroad. An authoritative account of how this sophisticated and multi-pronged campaign is unfolding, *Beijing's Global Media Offensive* provides a new window into China's attempts to make itself an information superpower.

*Adventures in the Chinese Economy: 16 Years from the Inside* Sven Agten, 2021-05-04 This book provides an insightful overview of the social-economical trends in modern China, their global influence, and the disrupting consequences for businesses and countries all over the world. It is a fresh look at the business conditions that Western firms face in China, poised to become the world's largest and most dynamic economy. Using a vast array facts and data, combined with personal stories and experiences, Mr. Agten provides an accessible and entertaining glimpse at Chinese megatrends, such as the development of the middle class, innovation and upskilling, digitalization of Chinese society, rising labor costs and more. This book is a must-read for entrepreneurs, executives and economists seeking to understand the Chinese market.

**The Civil Power of the News** Jackie Harrison, 2019-10-18 This landmark book is concerned with the civil power of the news. This power can be

seen in the ways the news engages with public sentiment through a focus on three invariant civil concerns: identity, legitimacy and risk. The book analyses how news stories engage with these concerns to make civil and anti-civil judgements, which influence public sentiment and determine the boundaries we place and maintain around the society we live in. Through historical and contemporary examples of this boundary shaping and maintenance, *The Civil Power of the News* presents a bold and original account of the architecture of news, the influence it has on our conceptions of civility, and, ultimately, the power it wields.

Detecting Fake News on Social Media Kai Shu, Huan Liu, 2022-05-31 In the past decade, social media has become increasingly popular for news consumption due to its easy access, fast dissemination, and low cost. However, social media also enables the wide propagation of fake news, i.e., news with intentionally false information. Fake news on social media can have significant negative societal effects. Therefore, fake news detection on social media has recently become an emerging research area that is attracting tremendous attention. This book, from a data mining perspective, introduces the basic concepts and characteristics of fake news across disciplines, reviews representative fake news detection methods in a principled way, and illustrates challenging issues of fake news detection on social media. In particular, we discussed the value of news content and social context, and important extensions to handle early detection, weakly-supervised detection, and explainable detection. The concepts, algorithms, and methods described in this lecture can help harness the power of social media to build effective and intelligent fake news detection systems. This book is an accessible introduction to the study of detecting fake news on social media. It is an essential reading for students, researchers, and practitioners to understand, manage, and excel in this area. This book is supported by additional materials, including lecture slides, the complete set of figures, key references, datasets, tools used in this book, and the source code of representative algorithms. **The SAGE Encyclopedia of Journalism** Gregory A. Borchard, 2022-01-28 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

The Digital War Winston Ma, 2021-01-19 What new directions in China's digital economy mean for us all China is the largest homogenous digital market on Earth: unified by language, culture, and mobile payments. Not only a consumer market of unrivaled size, it's also a vast and hyperactive innovation ecosystem for new technologies. And as China's digital economy moves from a consumer-focused phase to an enterprise-oriented one, Chinese companies are rushing to capitalize on ways the newer wave of tech—the Internet of Things, AI, blockchain, cloud computing, and data analytics (iABCD)—can unlock value for their businesses from non-traditional angles. In China's Data Economy, Winston Ma—investment professional, capital markets attorney, adjunct professor of digital economy, and bestselling author—details the profound global implications of this new direction, including how Chinese apps for services such as food delivery expand so quickly they surpass their U.S. models within a couple of years, and how the sheer scale and pace of Chinese innovation might lead to an AI arms race in which China and the U.S. vie aggressively for leadership. How China's younger netizens participate in their evolving digital economy as consumers, creators, and entrepreneurs Why Online/Office (OMO, Online-merge-with-Offline) integration is viewed as the natural next step on from the O2O (Online-to-Offline) model used in the rest of the world The ways in which traditional Chinese industries such as retail, banking, and insurance are innovating to stay in the game What emerging markets can learn from China

as they leapfrog past the personal computer age altogether, diving straight into the mobile-first economy Anyone interested in what's next for Chinese digital powerhouses—investors, governments, entrepreneurs, international business players—will find this an essential guide to what lies ahead as China's flexes new digital muscles to create new forms of value and challenge established tech giants across the world.

**Donald J. Trump's Presidency** Chuka Onwumechili, 2023-12-04 This book captures Donald J. Trump's presidency by addressing the remarkable tropes that defined that period. It offers research-based investigations of the communicative aspects of Trump's presidency, with a focus on race, immigration, xenophobia, and social conflicts as they interact with communication. The book utilizes research data to capture critical moments of the presidency. Chapters examine metadiscourse during President Trump's press events, where he accused the media of "Nasty Question" and "Fake News", offer computational framing analysis to expose the communication of racism and xenophobia in US-Mexico cross-border wall discourses, and provide critical textual analysis of select episodes of CW's critically acclaimed TV show *Jane the Virgin*, exposing how citizenship, or lack thereof shapes one's relationship to the state and surrounding communities. They also offer textual analysis to demonstrate how a predominantly White newsroom differs from a newsroom that is racially diverse, against the backdrop of the coverage of two politically charged issues of Black Lives Matter and Deferred Action for Childhood Arrivals (DACA), and explore interdisciplinary concepts related to understanding immigrants' and sojourners' believability evaluation of disinformation. Donald J. Trump's Presidency will be a key resource for scholars and researchers of communication studies, political communication, media and cultural studies, race and ethnic studies, and political science, while also appealing to anyone interested in the communicative aspects of Trump's presidency and American politics. This book was originally published as a special issue of the *Howard Journal of Communications*.

**Internet Mercenaries and Viral Marketing: The Case of Chinese Social Media** Wu, Mei, 2013-09-30 Social media and emerging internet technologies have expanded the ideas of marketing approaches. In particular, the phenomenon of the internet in China challenges the common perception of new media environments. *Internet Mercenaries and Viral Marketing: The Case of Chinese Social Media* presents case studies, textual analysis, media reviews, and in-depth interviews in order to investigate the Chinese "pushing hand" operation from the conceptual perspective of communications and viral marketing. This book is significant to researchers, marketers, and advocates interested in the persuasive influence of social networks.

**Xinjiang Year Zero** Darren Byler, Ivan Franceschini, Nicholas Loubere, 2022-01-25 Since 2017, the Chinese authorities have detained hundreds of thousands of Uyghurs, Kazakhs and other Muslim minorities in 'reeducation camps' in China's northwestern Xinjiang autonomous region. While the official reason for this mass detention was to prevent terrorism, the campaign has since become a wholesale attempt to remould the ways of life of these peoples—an experiment in social engineering aimed at erasing their cultures and traditions in order to transform them into 'civilised' citizens as construed by the Chinese state. Through a collection of essays penned by scholars who have conducted extensive research in the region, this volume sets itself three goals: first, to document the reality of the emerging surveillance state and coercive assimilation unfolding in Xinjiang in recent years and continuing today; second, to describe the workings and analyse the causes of these policies, highlighting how these developments insert themselves not only in domestic Chinese trends, but also in broader global dynamics; and, third, to propose action, to heed the progressive Left's call since Marx to change the world and not just analyse it. 'Xinjiang Year Zero' provides an analysis of the processes of dispossession being experienced by Uyghurs and other indigenous peoples of China's Uyghur region that is sorely needed today. Most politicians and their followers today, whether on the left or the right, view what is happening to the peoples of this region through a twentieth-century lens steeped in dichotomies that are obsolete in describing the nature of states today—those of capitalism vs socialism and democracy vs totalitarianism. The contributors to this volume explore what

is happening in Xinjiang in the context of the twenty-first century's racialised and populist-fuelled state power, global capitalist exploitation, and ubiquitous surveillance technology. At the same time, they invite the reader to reflect on how the processes of dispossession in the Uyghur region during the twenty-first century are repeating the colonial practices of the nineteenth and twentieth centuries that have shaped our current global system of inequality and oppression. The result offers an analysis of what is happening in Xinjiang that emphasises its interconnectedness to what is happening around us everywhere in the world. If you believe that the repression in this region is a fabrication to 'manufacture consent' for a cold war between the "West" and China, you need to read this book. Afterwards, you will understand that if you want to stop a return to the twentieth-century geopolitical conflicts embodied in the idea of a cold war, you must establish solidarity with the Indigenous peoples of China's northwest and call for the end to the global processes fuelling their dispossession both inside China and outside.' — Sean R. Roberts, Director of International Development Studies, The George Washington University's Elliott School of International Affairs, and author of *The War on the Uyghurs* 'Xinjiang Year Zero provides a highly readable and utterly necessary account of what is happening in Xinjiang and why. By showing how the mass detentions of Uyghurs and other Xinjiang Muslims are linked to both global capitalism and histories of settler colonialism, the edited book offers new ways of understanding the situation and thus working toward change. A must-read not only for those interested in contemporary China, but also for anyone who cares about digital surveillance and dispossession around the globe.' — Emily T. Yeh, University of Colorado Boulder, author of *Taming Tibet: Landscape Transformation and the Gift of Chinese Development* 'The crisis in Xinjiang has engendered its own crisis of interpretation and action at a time of growing geopolitical rivalry: how to condemn the atrocities without supporting hawkish voices, particularly among US politicians, who seek to Cold War-ise the US relationship with "Communist China"? How to critique China for colonialism, racism, assimilationism, extra-legal internment, and coerced labour when many Western nations are built on a history of those same things? Xinjiang Year Zero not only provides non-specialists a thorough, readable, up-to-date account of events in Xinjiang. This much-needed book also offers a broader framing of the crisis, drawing comparisons to settler colonialism elsewhere and revealing direct connections to global capitalism and to the rise of technological surveillance everywhere.' — James A. Millward, Georgetown University, author of *Eurasian Crossroads: A History of Xinjiang*

*The Great Firewall of China* James Griffiths, 2019-03-14 'Readers will come away startled at just how fragile the online infrastructure we all depend on is and how much influence China wields – both technically and politically' – Jason Q. Ng, author of *Blocked on Weibo* 'An urgent and much needed reminder about how China's quest for cyber sovereignty is undermining global Internet freedom' – Kristie Lu Stout, CNN 'An important and incisive history of the Chinese internet that introduces us to the government officials, business leaders, and technology activists struggling over access to information within the Great Firewall' – Adam M. Segal, author of *The Hacked World Order* Once little more than a glorified porn filter, China's 'Great Firewall' has evolved into the most sophisticated system of online censorship in the world. As the Chinese internet grows and online businesses thrive, speech is controlled, dissent quashed, and attempts to organise outside the official Communist Party are quickly stamped out. But the effects of the Great Firewall are not confined to China itself. Through years of investigation James Griffiths gained unprecedented access to the Great Firewall and the politicians, tech leaders, dissidents and hackers whose lives revolve around it. As distortion, post-truth and fake news become old news James Griffiths shows just how far the Great Firewall has spread. Now is the time for a radical new vision of online liberty.

Australian Foreign Policy Michael O'Keefe, 2023-08-10 How does Australia's unique geographical, cultural and historical position influence its approach to foreign policy? What key challenges does Australia face on the world stage, and how can it overcome them? Reflecting the messy reality of foreign policy decision-making, this book helps you to understand the changes and continuities in Australia's approach. For example, does the US withdrawal from Vietnam in 1973 and collapse of South Vietnam continue to cast a shadow over Australian foreign policy, or is it relevant only in

understanding the dynamics of the cold war? Using an Australian Strategic Culture framework, O'Keefe sheds light on the characteristics that make Australia behave in a way different to any other country and equips you with analytic skills to understand the main debates, such as: - In what sense could Australia be seen as a 'good' international citizen? - Have national interests trumped global responsibilities? - How does the intersection between civil society and public opinion interact with foreign policy making? This book is essential reading if you are a student of Australian foreign policy, as well as of broader Australian domestic politics and international relations.

**Morrison's Miracle** Anika Gauja, Marian Sawyer, Marian Simms, 2020-07-01 This book, the 17th in the federal election series and the ninth sponsored by the Academy of the Social Sciences in Australia, provides a comprehensive account of the 2019 Australian election, which resulted in the surprise victory of the Coalition under Scott Morrison. It brings together 36 contributors who analyse voter behaviour, campaign strategies, regional variations, polling, ideology, media and the new importance of memes and digital campaigning. Morrison's victory underlined the continuing trend toward the personalisation of politics and the loss of trust in political institutions, both in Australia and across western democracies. Morrison's Miracle is indispensable for understanding the May 2019 Coalition victory, which surprised many observers and confounded pollsters and political pundits.

**The Perfect Police State** Geoffrey Cain, 2021-06-29 A riveting investigation into how a restive region of China became the site of a nightmare Orwellian social experiment—the definitive police state—and the global technology giants that made it possible Blocked from facts and truth, under constant surveillance, surrounded by a hostile alien police force: Xinjiang's Uyghur population has become cursed, oppressed, outcast. Most citizens cannot discern between enemy and friend. Social trust has been destroyed systematically. Friends betray each other, bosses snitch on employees, teachers expose their students, and children turn on their parents. Everyone is dependent on a government that nonetheless treats them with suspicion and contempt. Welcome to the Perfect Police State. Using the haunting story of one young woman's attempt to escape the vicious technological dystopia, his own reporting from Xinjiang, and extensive firsthand testimony from exiles, Geoffrey Cain reveals the extraordinary intrusiveness and power of the tech surveillance giants and the chilling implications for all our futures.

*The Grifter's Club* Sarah Blaskey, Nicholas Nehamas, Caitlin Ostroff, Jay Weaver, 2020-08-04 An astonishing look inside the gilded gates of Mar-a-Lago, the palatial resort where President Trump conducts government business with little regard for ethics, security, or even the law. Donald Trump's opulent Palm Beach club Mar-a-Lago has thrummed with scandal since the earliest days of his presidency. Long known for its famous and wealthy clientele, the resort's guest list soon started filling with political operatives and power-seekers. Meanwhile, as Trump re-branded Mar-a-Lago the Winter White House and began spending weekends there, state business spilled out into full view of the club's members, and vast sums of taxpayer money and political donations began flowing into its coffers, and into the pockets of the president. The Grifter's Club is a breakthrough account of the impropriety, intrigue, and absurdity that has been on display in the place where the president is at his most relaxed. In these pages, a team of prizewinning Miami Herald journalists reveal the activities and motivations of the strange array of charlatans and tycoons who populate its halls. Some peddle influence, some seek inside information, and some just want to soak up the feeling of unfettered access to the world's most powerful leaders. With the drama of an expose and the edgy humor of a Carl Hiaasen novel, *The Grifter's Club* takes you behind the velvet ropes of this exclusive club and into its bizarre world of extravagance and scandal.
