**Webinars A-Z –Your Ultimate Guide to Online Success** NISHANT BAXI,2020-02-06 Do you detest those excruciating seminars which you have to attend in order to sell your products? Do you want to update yourself and try being technologically advanced, a techno-geek? We'll tell you exactly what you could do to be one. Ever heard of a webinar? Well, many people haven't so if you don't know anything, it's just fine! A webinar is basically a seminar which is presented over the internet, or Web. Web seminars, web conferences and internet meetings are all synonyms for this new technology and are used in sales and marketing applications, to influence potential customers. Unlike webcasts, where the audience can only watch and listen, webinars are presentations where the members of the large audience can interact with the presenter via the internet. Hassle free and sleek! Webinars are used for a variety of purposes – internet-based meetings, remote training and one-to-one meetings sharing details over their computer desktops. Hosting such webinars require knowledge about specific software that configures the presenter and the audience's computers for easy communication. If you are keen on keeping yourself up-to-date with the world of technology, you might just want to know more about the various features of this web wonder! We guess you might just want to present seminars using this software rather than having to present product via a webcast! Well, we guess an integrated net telephone conferencing for audio seminars, the ability of the audience to view the presenter's screen during live product demos, a continuous streaming video and scope for animated and interactive presentations, the unique features of recording and playback options, the option of segregating the audience into subgroups to help interact better, to be able to present questionnaires and polls to the audience and even manage question and answer sessions during the seminar, all seem to be a boon to you to boost your career options! Isn't the software just the thing you were looking for to cut down on the hassles of hosting a seminar?

Content Inc.: How Entrepreneurs Use Content to Build Massive Audiences and Create Radically Successful Businesses Joe Pulizzi,2015-09-04 The NEW Rulebook for Entrepreneurial Success What's the surest way to startup failure? Follow old, outdated rules. In Content Inc., one of today's most sought-after content-marketing strategists reveals a new model for entrepreneurial success. Simply put, it's about developing valuable content, building an audience around that content, and then creating a product for that audience. Notice a shift? Author Joe Pulizzi flips the traditional entrepreneurial approach of first creating a product and then trying to find customers. It's a brilliant reverse-engineering of a model that rarely succeeds. The radical six-step business-building process revealed in this book is smart, simple, practical, and cost-effective. And best of all, it works. It's a strategy Pulizzi used to build his own successful company, Content Marketing Institute, which has landed on Inc. magazine's list of fastest growing private companies for three years straight. It's also a strategy countless other entrepreneurs use to build their own multi-million dollar companies. Build an audience and you'll be able to sell pretty much anything you want. Today's markets are more dynamic and customers are more fickle than ever before. Why would you put all your eggs in one basket before securing a loyal customer base? Content Inc. shows you how to get customers first and develop products later. It's the best way to build a solid, long-lasting business positioned for today's content-driven world. This is the simple but profoundly successful entrepreneurial approach of one of today's most creative business minds. A pioneer of content marketing, Pulizzi has cracked to code when it comes to the power of content in a world where marketers still hold fast to traditional models that no longer work. In Content Inc., he breaks down the business-startup process into six steps, making it simple for you to visualize, launch, and monetize your own business. These steps are: • The "Sweet Spot": Identify the intersection of your unique competency and your personal passion • Content Tilting: Determine how you can "tilt" your sweet spot to find a place where little or no competition exists • Building the Base: Establish your number-one channel for disseminating content (blog, podcast, YouTube, etc.) • Harvesting Audience: Use social-media and SEO to convert one-time visitors into long-term subscribers • Diversification: Grow your business by expanding into multiple delivery channels • Monetization: Now that your expertise is established, you can begin charging money for your products or services This model has worked wonders for Pulizzi and countless other examples detailed in the book. Connect these six pieces like a puzzle, and before you know it, you'll be running your own profitable, scalable business. Pulizzi walks you step by step through the process, based on his own success (and failures) and real-world multi-million dollar examples from multiple industries and countries. Whether you're seeking to start a brand-new business or drive innovation in an existing one, Content Inc. provides everything you need to reverse-engineer the traditional entrepreneurial model for better, more sustainable success. Joe Pulizzi is an entrepreneur, professional speaker, and podcaster. He is the founder of several startups, including the Content Marketing Institute (CMI), recognized as the fastest growing business media company by Inc. magazine in 2014. CMI produces Content Marketing World, the world's largest content marketing event, and publishes the leading content marketing magazine, Chief Content Officer. Pulizzi's book Epic Content Marketing was named one of Fortune magazine's Five Must Read Business Books of the Year.

**Webinars For Dummies** Sharat Sharan,John Carucci,2014-07-14 Gather an audience from around the globe with webinars Webinars For Dummies takes the guesswork and uncertainty out of webinar creation. Written by John Carucci under the guidance of webinar technology company ON24, the book provides a roadmap for creating a webinar that effectively communicates to the audience without boring them to sleep. Webinars For Dummies gives you the insider's perspective on techniques that have been proven effective time and again. Webinars are becoming increasingly common as a way for businesses to connect with customers and partners without distance being a factor. Whether they take the form of a live presentation, a PowerPoint slideshow, or a combination of both, the beauty of the webinar is that it can be archived and viewed again after the initial set presentation. But this feature also adds a burden to the webinar creator, as the presentation must be understood outside of the live context. Creating what is essentially an archival presentation means considering a host of factors surrounding both content and organization. Webinars For Dummies includes all the information your business needs to start creating custom webcasts, including: A webinar overview, and how to determine your need, budget, and available tools Topic selection, script creation, graphic production, and marketing Creation advice, including live troubleshooting and how to handle viewer questions Archiving tips, and how to integrate webinars into a marketing plan You'll also find special tips for effective production and marketing, tips for readying yourself for the webinar, and case studies that illustrate successful webinar techniques. Modern business is rarely localized, and webinars are an effective way to communicate live, on a global scale. Webinars For Dummies helps you ensure your business doesn't get left behind.
