Modest Fashion Reina Lewis,2013-05-30 Increasing numbers of women are engaging in the development and discussion of modest dressing; a movement matched by a growing media and popular demand for intelligent commentary about the topic. Modest Fashion sets out to meet that need. As a trend, modest dressing is spreading across the world, yet it is rarely viewed as 'fashion'. Studying consumers and producers, retailers and bloggers, Modest Fashion provides an up to the minute account of the art of dressing modestly - and fashionably. Leading scholars in the area, along with journalists, fashion designers, entrepreneurs and bloggers discuss the emergence of a niche market for modest fashion among and between Jewish, Christian and Muslim faith groups as well as secular dressers. Crossing creeds and cultures, analysing commentary alongside commerce, the book probes the personal and the political as well as religious, aesthetic and economic implications of contemporary dress practices and the debates that surround them.

European Cinema and Television Ib Bondebjerg,Eva Novrup Redvall,Andrew Higson,2016-04-19 This book offers comparative studies of the production, content, distribution and reception of film and television drama in Europe. The collection brings together scholars from the humanities and social sciences to focus on how new developments are shaped by national and European policies and practices, and on the role of film and television in our everyday lives. The chapters explore key trends in transnational European film and television fiction, addressing issues of co-production and collaboration, and of how cultural products circulate across national borders. The chapters investigate how watching film and television from neighbouring countries can be regarded as a special kind of cultural encounter with the possibility of facilitating reflections on national differences within Europe and negotiations of what characterizes a national or a European identity respectively.

Live Online Chess: Social Features & Downsides Jose Fadul,2012-10-26 The book features social network analysis of the author's live rated online chess games with various players (including high and middle-strength computer software) from different time zones and cultures around the world. For most of them the social features and downsides of real-time online chess were investigated and documented, including social magnetism, gambling, anonymity and use of pseudonyms, nationalism, Lesbian-Gay-Bisexual-Transgender (LGBT) issues, Islamophobia, and social stratification and mobility. The accompanying game annotations and post-game discussions mainly dwell on responsible participation and civil discourse using live online chess games as medium. Online chess has become a test case for us as an international/trans-national group to think about how we can live in a socially-differentiated society, where its members subscribe to a plurality of forms of knowledge arising from considerably different environments, experiences and genetic makeup.

Digital Pursuit IV. Attila Kokenyesi-Bartos,2022-02-21 The exact operation of the internet and our digital devices is a mystery to many, even though we use it every day. We run into technical problems that we often cannot solve on our own. When we become a victim of crime, we feel even more vulnerable in this virtual space. Digital crooks can't wait to take advantage of the unpreparedness of others. They take the opportunity to obtain our confidential information and assets as soon as they can. The security of our own data and assets, the data we handle in the course of our work and that of our workplace comes under risk every time we connect to the internet. Many of us will sooner or later meet the first digital fraudsters, blackmailers, and bullies. What can we do to prevent our beautiful new digital world becoming a nightmare? This publication seeks to provide an answer to this. As a legal practitioner, the author has encountered several similar crimes, describing from his experience what happens in a real criminal investigation when digital data needs to be found. We examine in detail the tools and methods that members of the investigating authorities also work with on a regular basis. We analyze one by one the solutions that can be used to do this to understand how is it possible, which we considered to be impossible: identifying the unknown, faceless digital crooks based on the digital traces they have left behind. Our publication starts from the basics and helps you learn in a simple, fun way everything that benefits anyone who cares about their own digital security. We also provide knowledge that is a good starting point for future experts who wish to familiarize themselves with the world of cybercriminals more seriously due of their occupation and studies.

Soft computing represents a collection or set of computational techniques in machine learning, computer science, and some engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. After a through peer-review process, the 16th SOCO 2021 International Program Committee selected 78 papers which are published in these conference proceedings and represents an acceptance rate of 48%. In this relevant edition, a special emphasis is put on the organization of special sessions. Seven special sessions are organized related to relevant topics as follows: applications of machine learning in computer vision; soft computing applied to autonomous robots and renewable energy systems; optimization, modeling, and control by soft computing techniques (OMCS); challenges and new approaches toward artificial intelligence deployments in real-world scenarios; time series forecasting in industrial and environmental applications (TSF); soft computing methods in manufacturing and management systems and applied machine learning. The selection of papers was extremely rigorous in order to maintain the high quality of the conference, and we would like to thank the members of the program committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the SOCO conference would not exist without their help.

World Heritage and Climate Change Chiara Bertolin,Jim Perry,2020-12-23 Natural World Heritage sites, such as the Serengeti, or Natural and Cultural Heritage sites, such as the Historic Centre of Rome, have the common feature of being a treasured resource of global importance. The 1121 properties on the World Heritage (WH) list have permanent recognized value for humankind. Most of those >1000 locations are at some risk from changes in climate. Globally, scholars and managers seek to understand current and future climatic stresses, mitigation and adaptation opportunities. There is a strong need for the “So

What?” in World Heritage studies. The invited papers in this volume address natural, cultural and mixed WH sites, and each offers a fresh perspective on assessing the degree of risk from changing climate and guidance on acting to mitigate and adapt to climate changes to provide new awareness and tools to improve their state of conservation for the future.

Unreason Kendrick Frazier,Benjamin Radford,2023-12-15 UNREASON: Exploring Pseudoscience, Conspiracies, and Extraordinary Claims is a collection of forty-five of the best articles the legendary Skeptical Inquirer magazine has published in the past decade. Featuring articles from writers including Neil deGrasse Tyson on the process of science, Richard Dawkins on the standards of truth, Elizabeth Loftus on memory, Steven Pinker on the notion of progress, and many others covering topics from the politicization of science to the frightening rise of misinformation, each entry in this collection se scientific examination to bear in order to ferret out the facts and misconceptions behind popular claims. All of the articles within are interesting and readable. Yet they are also quite diverse. Some articles reinforce and complement each other; others (as happens in science) may voice disagreements or differing perspectives. But they all have one thing in common: a respect for evidence—a demand for the best, most well-tested, most scientifically reliable information. Readers will learn: Why and how conspiracy rumors start, spread, and readily gain believers How to stay afloat in a sea of disinformation and survive the age of misinformation Why and how we form beliefs and adhere to them so powerfully How and why memory is fallible—and what we can do about it How pseudoexperiments mislead the public about science Unreason will arm readers with scientific knowledge to curb the misinformation and misconceptions that increasingly threaten our civil discourse. Even further, these essays present a way for us to be better citizens, equipped to deal with the winds of misinformation and disinformation swirling about us and better able to look ahead to a world where science and reason—indeed just good old common sense—can prevail.

It includes contributions by Rastko Jakovljevic, Ahmad Faudzi Musib, Choduraa Tumat and Bernard Kleikamp, Hoh Chung Shih, Huang Wan, Gisa Jähnichen, Liu Xiangkun, Sulwyn Lok and Andrew Filmer, Chinthaka P. Meddegoda, Nishadi Prageetha Meddegoda, Christopher A. Miller, Renzi, Nicola, Timkehet Teffera, Xue Tong, Adilia Yip, and Zhong Wei Cheng. All scholars make valuable contributions in questions about sound manipulation or about musical instruments of humans as part of nature. Did you know that Jimi Hendrix manipulated his sound effects or how many waza trumpets of the Berta are quickly tuned and which instruments accompany a joik in reality? These, and many other questions are answered in the diverse articles compiled in this volume. They celebrate diversity in their own way.

Distant Wars Visible Wendy Kozol,2014-10-15 In our wired world, visual images of military conflict and political strife are ubiquitous. Far less obvious, far more elusive, is how we see such images, how witnessing military violence and suffering affects us. Distant Wars Visible brings a new perspective to such enduring questions about conflict photography and other forms of visual advocacy, whether in support of U.S. military objectives or in critique of the nation at war. At the book’s center is what author Wendy Kozol calls an analytic of ambivalence—a critical approach to the tensions between spectacle and empathy provoked by gazing at military atrocities and trauma. Through this approach, Distant Wars Visible uses key concepts such as the politics of recoil, the notion of looking elsewhere, skeptical documents, and ethical spectatorship to examine multiple visual cultural practices depicting war, on and off the battlefield, from the 1999 NATO bombings in Kosovo to the present. Kozol’s analysis draws from collections of family photographs, human rights photography, independent film production, photojournalism, and other examples of war’s visual culture, as well as extensive visual evidence of the ways in which U.S. militarism operates to maintain geopolitical dominance—from Fallujah and Abu Ghraib to the most recent drone strikes in Pakistan. Throughout, Kozol reveals how factors such as gender, race, and sexuality construct competing visualizations of identity in a range of media from graphic narrative and film to conflict photography and battlefield souvenirs—and how contingencies and contradictions in visual culture shape the politics and ethics of witnessing.
