

Weight Scale 20

Yi-Tong Ma

Honest Weight Bob Terry,2000-05-24 Honest Weight is the 20th century story of Toledo Scale, beginning with their fight in the first decade for weights and measures laws to outlaw dishonest scales. In narrative form, it tells the living history of the company, beginning with the founder after he was dramatically fired by National Cash Register Company. Henry Theobald then started a scale and cash register company to compete with his old boss, the legendary John Patterson of NCR. It's the story of the inventors, leaders, craftsmen and technical breakthroughs, beginning in the first year of the 20th century up to current times. Included is the story of the innovative sales techniques developed by Theobald that led to tight-fisted merchants being willing to spend four and five times as much for a Toledo "No Springs-Honest Weight" scale than for the scale it replaced. This led to Toledo becoming the best known scale brand in the nation. It includes the story of how a plastic came to be developed for Toledo Scale under the leadership of the company's second president Hubert Bennett that led him to establish a separate, wholly owned company. This company, Plaskon, became the largest plastic company in the United States for a brief time. It tells of Toledo Scale's World War II contributions in which the company played a top-secret part in the production of the Norden bombsight and the atomic bomb. The story includes quotations from both retired company executives and current employees. It includes information obtained from an unpublished factual manuscript covering the company's first 50 years, other company archives and the Toledo Blade. A dozen historical photos are displayed, which include the first DeVilbiss computing scale, a Toledo Cash Register, and a Phinney scale which was the first patented computing scale. A few Phinney scales were manufactured in 1870. Since Toledo Scale couldn't locate one to prove they were actually manufactured, they lost a huge lawsuit to Dayton Scale that almost broke the company. Also shown is a photo of Norman Bel Geddes' 1929-30 radical designs of a new factory and plant campus for Toledo Scale, never built due to the depression. The story includes the transition to electronic scales begun by the company's third president Harris McIntosh. This transition was completed in the final quarter of the century. And finally, the human story that resulted from the evolution of several different ownership's is told, until just a few years ago, Toledo Scale disappeared as a separate brand and was merged into Mettler-Toledo, Inc.

Irish National Inventory of Historic Scientific Instruments Charles Mollan,1995-11-15 Carried out over a period of ten years, this is a listing of scientific instruments dating before 1920, preserved in many collections throughout the island of Ireland. It gives location, date, and description for each of the more than 5,000 entries, together, where appropriate, with relevant accompanying detail. It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated. It also preserves information about collections which have since been lost, sold, or otherwise dispersed.

How Much Do You Weigh? Erin Nieto,2011-10-03 Reviews from advance readers: Powerful and empowering, Nice book, great idea, and good conversation starter, Lovely....addresses such an important topic You step on your bathroom scale and take a glance downward at the number the scale reads. But how do you process that information? If you're like most of us, you have anxiety about it no matter what the number is. Perhaps you are ashamed of your weight because you feel that you need to lose 10 or 20 or 100 pounds to be closer to what your estimate of the ideal weight is. Perhaps you are ashamed of your weight because you are often teased for being so skinny. Perhaps you have no idea what anyone else weighs either, so always feel that your weight is wrong, wrong, wrong. And as a result, you are insecure about it. And that is tough. To let that number, which you feel is wrong, dictate how you feel about yourself. To let it interfere with your relationship to food, to exercise, to clothes, to each other. Sucking the joy out of those relationships which are meant to nourish us, protect us, and make us stronger. But can it just be what it is? Can we, for once, own our weight and offer no apology? Would we burst into flames? The author's hypothesis was that making this private, embarrassing information public would be a helpful thing. That it would give the rest of us some kind of real-life compass when we're staring down at our own bathroom scales; an example beyond the photoshopped 100lb models in the size zero jeans. That women of all sizes have the awesome; it's not reserved for those of us close enough to the diabolical cultural standard, because the awesome comes from within. From our enjoyment of life, our families and friends, and the world around us. The end result: A photobook featuring 24 women and the number that is their weight. Putting it out there for the world to see. No apologies. No hedging. Letting it be what is it is, and opening up the secret for you, so you can see that beauty comes in all shapes and sizes, stigma be damned.
