**Servitization and Physical Asset Management** Michael John Provost, 2018-12-31 Servitization and Physical Asset Management, third edition, was developed to provide a structured source of guidance and reference information on the business opportunities linked to servitization and the management of physical assets. A growing trend in the global economy, servitization focuses on the actual deliverables of an asset from the perspective of the customer: electricity instead of the power plant, thrust instead of the engine, mobility instead of a plane or a car. The book offers high-level overviews of how to servitized and manage assets from a variety of perspectives, reviewing nearly

1,500 books, magazine articles, papers and presentations and websites. Written by Michael J. Provost, Ph.D., and a subject matter expert in modeling, simulation, analysis and condition monitoring, *Servitization and Physical Asset Management*, third edition, is an invaluable reference to those considering providing asset management services for the products they design and manufacture. It is also meant to support middle management wishing to know what needs to be done to look after the assets they are responsible for and who to approach for help, and academics doing research in this field. Michael Provost, is a British engineer with a doctoral degree in thermal power from Cranfield University.

**Opening Strategy** Richard Whittington, 2019-03-21 Strategy is becoming more 'open' - more transparent and more inclusive. *Opening Strategy* tells the story of how corporate strategists and strategy consultants have worked since the middle of the last century to open up the strategy process. First strategic planning, then strategic management, and now 'open strategy' have all brought more people into the strategy process and provided more strategic information, for the benefit of both business and society at large. Informed by interviews with corporate strategists and consultants at leading firms such as General Electric and McKinsey & Co, and drawing on the historical archives of strategy's pioneers, this book provides vivid insights into the trials and tribulations of practice change in the strategy profession. Above all, it stresses the hard work of the little recognized and sometimes eccentric individuals who have been leaders in practice change. By building on a wide range of illustrations, covering both successes and failures, the book draws out general lessons for practice innovation in strategy. Those studying the topic will be able to set standard strategy techniques in historical and social context and develop new areas for investigation, while practising executives and consultants should gain a sense of how to innovate in strategy - and

how not to.

*Stopping the Spies* Jane Duncan, 2018-06-01 Is South Africa on its way to becoming a surveillance state, and will it need a whistleblower? In 2013, former National Security Agency (NSA) contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens. International outrage resulted, but the Snowden documents revealed only the tip of the surveillance iceberg. Apart from insisting on their rights to tap into communications, more and more states are placing citizens under surveillance, tracking their movements and transactions with public and private institutions. The state is becoming like a one-way mirror, where it can see more of what its citizens do and say, while citizens see less and less of what the state does, owing to high levels of secrecy around surveillance. In this book, Jane Duncan

assesses the relevance of Snowden's revelations for South Africa. In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state. Duncan challenges members of civil society to be concerned about and to act on the ever-expanding surveillance capacities of the South African state. Is surveillance used for the democratic purpose of making people safer, or is it being used for the repressive purpose of social control, especially of those considered to be politically threatening to ruling interests? She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses.

*Ecolinguistics* Arran Stibbe, 2015-05-01 The increasingly rapid destruction of the ecological systems that support life is calling into question some of the fundamental stories that we live by: stories of unlimited economic growth, of consumerism, progress, individualism, success, and the human domination of nature. Ecolinguistics shows how linguistic analysis can help reveal the stories we live by, open them up to question, and contribute to the search for new stories. Bringing together the latest ecolinguistic studies with new theoretical insights and practical analyses, this book charts a new course for ecolinguistics as an engaged form of critical enquiry. Featuring: A framework for understanding the theory of ecolinguistics and applying it practically in real life; Exploration of diverse topics from consumerism in lifestyle magazines to Japanese nature haiku; A comprehensive glossary giving concise descriptions of the linguistic terms used in the book; Discourse analysis of a wide range of texts including newspapers, magazines, advertisements, films, nonfiction books, and visual images. This is essential reading for undergraduates, postgraduates and researchers working in the areas of Discourse Analysis and Language and Ecology.

**Language Policy in Business** Elisabeth Barakos, 2020-11-15 Language Policy in Business: Discourse, ideology and practice provides a critical sociolinguistic and discursive understanding of language policy in a minority language context. Focusing on Welsh-English bilingualism in private sector businesses in Wales, the book unpacks the circulating discourses, ideologies and practices of promoting bilingualism as a sociocultural and economic resource in the globalised knowledge economy. It sheds light on businesses as ideological sites for struggles over language revitalisation, which has been characterised by tensions and discursive shifts from essentialist ideologies about language, identity, nation and territory, to an increased commodification of bilingualism. The book is premised on the understanding that language is a focal point for articulating and living out historical power relationships and inequalities, and that language policy processes are never apolitical. It adds to a body of literature about bilingualism in minority language contexts and, more broadly, about how the fields of politics, business and society are inextricably related.
