Costs of Alternative Revenue-generation Systems Patrick Balducci,2011 TRB's National Cooperative Highway Research Program (NCHRP) Report 689: Costs of Alternative Revenue-Generation Systems presents a framework for analysis of the direct costs incurred in generating the revenues that support federal-aid and state highway construction, operations, and maintenance and uses that framework to estimate unit costs for fuel taxes, tolling, vehicle-miles of travel fees, and cordon pricing schemes.--pub. desc.

House of Commons - Transport Committee: Local Authority Parking Enforcement - HC 118 Great Britain: Parliament: House of Commons: Transport Committee,2013-10-23 The use of parking charges and fines specifically to raise revenue by local authorities is neither acceptable nor legal. Annual parking accounts would allow the public to see how much local revenue is derived from the enforcement of fines, and what proportion of this come from on or off street parking charges. It's right that parking charges be determined locally, but hard to justify fines that substantially exceed penalties for more serious offences like speeding. DfT's statutory guidance should stipulate that local authorities implement a 'grace period' of 5 minutes after the expiry of paid-for time on any paid parking before enforcement officers issue a Penalty Charge Notice (PCN). The Guidance should be clarified and updated, particularly in relation to rules for loading and unloading. A 25% penalty charge discount should also be introduced for motorists who pay within 7 days of losing any appeal to a parking tribunal. Local authorities currently offer a 50% discount if motorists pay their penalty charge within 14 days, but this is not available to motorists who appeal to a tribunal. Motorists should also not have to appeal against PCNs where tribunal adjudicators have repeatedly identified a problem such as poor signage. Adjudicators should also be given powers to allow appeals where local authorities fail to follow statutory guidance concerning the use cameras. While businesses cannot be completely exempt from parking restrictions, local authorities must also ensure that the need to restrict parking and manage congestion does not stifle the ability of businesses to trade and help grow the economy

Parking and the City Donald Shoup,2018-04-11 Donald Shoup brilliantly overcame the challenge of writing about parking without being boring in his iconoclastic 800-page book *The High Cost of Free Parking*. Easy to read and often entertaining, the book showed that city parking policies subsidize cars, encourage sprawl, degrade urban design, prohibit walkability, damage the economy, raise housing costs, and penalize people who cannot afford or choose not to own a car. Using careful analysis and creative thinking, Shoup recommended three parking reforms: (1) remove off-street parking requirements, (2) charge the right prices for on-street parking, and (3) spend the meter revenue to improve public services on the metered streets. *Parking and the City* reports on the progress that cities have made in adopting these three reforms. The successful outcomes provide convincing evidence that Shoup's policy proposals are not theoretical and idealistic but instead are practical and realistic. The good news about our decades of bad planning for parking is that the damage we have done will be far cheaper to repair than to ignore. The 51 chapters by 46 authors in *Parking and the City* show how reforming our misguided and wrongheaded parking policies can do a world of good. Rooney Rob L. Ruck,Maggie Jones Patterson,Michael P. Weber,2010-04-01 Born to an Irish Catholic working-class family on the Northside of Pittsburgh, Art Rooney (1901–88) dabbled in semipro baseball and boxing before discovering that his real talent lay not in playing sports but in promoting them. Though he was at the center of boxing, baseball, and racing in Pittsburgh and beyond, Rooney is best remembered for his contribution to the NFL, in particular to the Pittsburgh Steelers, the team he founded in 1933. As Rooney led the team in the early years, he came to be known as football's greatest loser; his influence, however, was instrumental in making the NFL the best-run league in American pro sports. The authors show how Rooney saw professional football—and the Steelers—through the Depression, World War II, the ascension of TV, and the development of the NFL. The book also follows him through the Steelers' dynasty years under Rooney's sons, with four Super Bowl titles in the 1970s alone. The first authoritative look at one of the most iconic figures in the history of the NFL, this book is both a critical chapter in the story of football in America and a thoroughly engaging in-depth introduction to a character unlike any other in the annals of American sports.

Care and the City Angelika Gabauer,Sabine Knierbein,Nir Cohen,Henrik Lebuhn,Kim Trogal,Tihomir Viderman,Tigran Haas,2021-10-25 Care and the City is a cross-disciplinary collection of chapters examining urban social spaces, in which caring and uncaring practices intersect and shape people's everyday lives. While asking how care and uncaring are embedded in the urban condition, the book focuses on inequalities in caring relations and the ways they are acknowledged, reproduced, and overcome in various spaces, discourses, and practices. This book provides a pathway for urban scholars to start engaging with approaches to conceptualize care in the city through a critical-reflexive analysis of processes of urbanization. It pursues a systematic integration of empirical, methodological, theoretical, and ethical approaches to care in urban studies, while overcoming a crisis-centered reading of care and the related ambivalences in care debates, practices, and spaces. These strands are elaborated via a conceptual framework of care and situated within broader theoretical debates on cities, urbanization, and urban development with detailed case studies from Europe, the Americas, and Asia. By establishing links to various fields of knowledge, this book seeks to systematically introduce debates on care to the interconnecting fields of urban studies, planning theory, and related disciplines for the first time.

Confirmatory Factor Analysis J. Scott Long,1983-09-01 A statistical method that will appeal to two groups in particular - those who are currently using the more traditional technique of exploratory factor analysis and those who are interested in the analysis of covariance structures, commonly known as the LISREL model. The first group will find that this technique may be more appropriate to the analysis of their research problems while the second group will find that confirmatory factor analysis is a useful first step to understanding the LISREL model. This book, and its companion volume, Covariance Structure Models, are designed to be read consecutively. The proofs presented are simple, but the reader must feel comfortable with matrix algebra in order to understand the model.

Beating the Fascists Sean Birchall,2011 The compelling account of the extraordinary activities of Anti-Fascist Action (AFA) - by those who were there on the frontline - an organised and committed group of ordinary working class people who, during the 1980s and 1990s took the fight to the far right - and won! Following the electoral collapse of the National Front in 1979, fascists went on the rampage. Race attacks escalated. NF/BNP gangs employed violence on the streets, on the terraces and to control the music scene. Young anti-fascists stepped up. A new hardline leadership emerged and AFA was formed in 1985. A state of war was how one rueful BNP leader would describe what happened next. Not only is Beating the Fascists a meticulously researched study, it is also a much-needed piece of history from below. Throughout, the voices of working class anti-fascists come across hard, clear, and without apology. Illuminating and sometimes chilling by turn, the running commentary they provide helps ensure the tempo never flags. Gradually the reader is drawn into an outlaw world of back street idealism, paramilitary style violence and heroic self-sacrifice.--Publisher.
