**Bryant Austin**

Whales: 101 Fun Facts & Amazing Pictures (Featuring The World's Top 7 Whales) Janet Evans, 2013-10-23 This book depicts the wonder of the world of Whales in all its glory. Children are given a well-rounded understanding of this beautiful mammal: its anatomy, feeding habits and behavior. The following Whales are featured: \* The awesome Blue Whale \* The loveable Beluga Whale \* The notorious Killer Whale \* The endangered Humpback Whale \* The shy Minke Whale \* The loud Sperm Whale \* The tusked Narwhal The pictures look great even in black and white and are excellent on the full color kindle. The description in the large text beneath is simple enough for early readers or for a parent to guide a child through. There are also picture captions that provide more information to talk about with your child. Alternatively, a child of any age (even the child in you) can just look at the images and appreciate its beauty. Enjoy!

*Beautiful Whale* Bryant Austin, 2018-06-05 DIV Photographer and conservationist Bryant Austin's breathtaking photographic project Beautiful Whale is the first of its kind: It chronicles his fearless attempts to reach out to whales as fellow sentient beings. Featuring Austin's intimate images—some as detailed as a single haunting eye—that result from encounters based on mutual trust, Beautiful Whale captures the grace and intelligence of these magnificent creatures. Austin spent days at a time submerged, motionless, in the waters of remote spawning grounds waiting for humpback, sperm, and minke whales to seek him out. As oceanographer Sylvia A. Earle says in her foreword to the book, "As an ambassador from the ocean—and to the ocean—Bryant Austin is not only a source of inspiration. He is cause for hope.†? Praise for Beautiful Whale: "You can't help thinking, with every passing page, that this is what's it's like to swim with the whales.†? —The Wall Street Journal /div

**The Whale in the Living Room** John Ruthven, 2021-06-17 The Whale in the Living Room follows the thrilling adventures of film-maker, John Ruthven, as he travels the globe, dives into our oceans and passionately recounts his life-affirming experiences. What creatures could remain

undiscovered in the 95 per cent of the seas that have not been thoroughly explored? How vast, really, are our oceans? The surface of Mars and Venus are better known to us than Earth's seabed. Yet to map the world's ocean to even 100-metre blocks of accuracy, something that environmentalists say is essential for its protection, could take another 300 years. Even creatures that are known to us, like the giant squid, have proved too difficult to accurately capture on film. Quite literally immersed in his subject, John can help readers understand the magnitude of our planet's oceans and why it is so important for us to protect our seas and the creatures that inhabit them. He is the only producer to have worked full-time on both series of Blue Planet, as well as nearly fifty other films about the sea. Through his first-hand experience, John shows us the loneliness of whale calves in the deep blue, the fear of seals as they dodge great white sharks near the coast, or the curiosity of octopus staring back at us through the camera. His book takes us through the blue rings of South Pacific coral atolls, on submarine rides into the abyss with ancient life forms, and up close and personal encounters with singing humpback whales that make you feel the water around you. The Whale in the Living Room, like the proverbial 'elephant in the room', is also about how, until recently, we have been largely blind to our polluting of the seas. John, for example, explores how plastic 'went wild' in the ocean; tries to understand how we got into this mess; and see if we can ever untangle the oceans from its grip.
